The Social Construction of Reality - Peter L. Berger 2011-04-26

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

Social Geographies - Ruth Panelli 2004-01-31

How do we describe ourselves? Where have we, do we, will we, live our lives? Why are the differences between people a source of tension? How can social change occur? Social geography can assist in addressing these questions. It provides ways of understanding and living in our

contemporary world. Providing students with the resources to understand both the theoretical and empirical approaches social geographers take when investigating social difference, this text outlines key theoretical approaches and traces the core geographies of difference: class, gender, race/ethnicity, and sexuality. It concludes by showing how geographers work across these ideas of difference to understand questions of identity, power and action. Using illustrative examples from around the world, *Social Geographies* includes: - Individual chapters on the main theoretical approaches to difference - Individual chapters on the key concepts of identity, power and action - Reviews of the core literature, with suggestions for further reading - Biographies of key contemporary social geographers - Glossary of key terms For students beginning human geography courses, or in social geography modules, this book is the essential primer.

Between the World and Me - Ta-Nehisi Coates 2015-07-14
#1 NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • NAMED ONE OF TIME'S TEN BEST NONFICTION BOOKS OF THE DECADE • PULITZER PRIZE FINALIST • NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST • ONE OF OPRAH'S "BOOKS THAT HELP ME THROUGH" • NOW AN HBO ORIGINAL SPECIAL EVENT
Hailed by Toni Morrison as "required reading," a bold and personal literary exploration of America's racial history by "the most important essayist in a generation and a writer who changed the national political conversation about race" (Rolling Stone) NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly
In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

Gravel Roads - Ken Skorseth 2000

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on

what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

[The Meaning of Difference](#) - Karen Elaine Rosenblum 1996

A collection of readings that offers an integrated and comparative examination of contemporary American constructions of race, sex, social class and sexual orientation. Race - Alan H. Goodman 2012-11-05

Perspectives on race today Featuring new and engaging essays by noted anthropologists and illustrated with full color photos, *RACE: Are We So Different?* is an accessible and fascinating look at the idea of race, demonstrating how current scientific understanding is often inconsistent with popular notions of race. Taken from the popular national public education project and museum exhibition, it explores the contemporary experience of race and racism in the United States and the often-invisible ways race and racism have influenced laws, customs, and social institutions.

White Women, Race Matters - Ruth Frankenberg 1993

[The Meaning of Difference: American Constructions of Race, Sex and Gender, Social Class, Sexual Orientation, and Disability](#) - Toni-Michelle Travis 2011-02-11

The Meaning of Difference focuses on the social construction of difference as it operates in American formulations of race and ethnicity, sex and gender, social class, sexual orientation, and disability. The conceptual structure of this text-reader comes from four framework essays that address the construction of difference, the experience of difference, the social meaning of difference, and social actions that might bridge differences. Each framework essay is followed by a set of readings selected for readability, conceptual depth, and applicability to a variety of statuses. Boxed inserts throughout offer first-person accounts, many of them from students. The readings in this edition, which include twenty-four new readings and ten new personal accounts, have been selected to speak to contemporary assumptions of a "post-racial" America.

Playing in the Dark - Toni Morrison 2007-07-24

An immensely persuasive work of literary criticism that opens a new chapter in the American dialogue on race—and promises to change the way we read American literature—from the acclaimed Nobel Prize winner Morrison shows how much the themes of freedom and individualism, manhood and innocence, depended on the existence of a black population that was manifestly unfree—and that came to serve white authors as embodiments of their own fears and desires. According to the Chicago Tribune, Morrison "reimagines and remaps the possibility of America." Her brilliant discussions of the "Africanist" presence in the fiction of Poe, Melville, Cather, and Hemingway leads to a dramatic reappraisal of the essential characteristics of our literary tradition. Written with the artistic vision that has earned the Nobel Prize-winning author a pre-eminent place in modern letters, *Playing in the Dark* is an invaluable read for avid Morrison admirers as well as students, critics, and scholars of American literature.

[Stamped from the Beginning](#) - Ibram X. Kendi 2016-04-12

The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, *Stamped from the Beginning* offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

[Black Feminist Thought](#) - Patricia Hill Collins 2002-06-01

In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that

is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

Impossible Subjects - Mae M. Ngai 2014-04-27

This book traces the origins of the "illegal alien" in American law and society, explaining why and how illegal migration became the central problem in U.S. immigration policy—a process that profoundly shaped ideas and practices about citizenship, race, and state authority in the twentieth century. Mae Ngai offers a close reading of the legal regime of restriction that commenced in the 1920s—its statutory architecture, judicial genealogies, administrative enforcement, differential treatment of European and non-European migrants, and long-term effects. She shows that immigration restriction, particularly national-origin and numerical quotas, remapped America both by creating new categories of racial difference and by emphasizing as never before the nation's contiguous land borders and their patrol. Some images inside the book are unavailable due to digital copyright restrictions.

Understanding Racial and Ethnic Differences in Health in Late Life - National Research Council 2004-09-08

As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

I Was Their American Dream - Malaka Gharib 2019-04-30

"A portrait of growing up in America, and a portrait of family, that pulls off the feat of being both intimately specific and deeply universal at the same time. I adored this book."—Jonny Sun "[A] high-spirited graphical memoir . . . Gharib's wisdom about the power and limits of racial identity is evident in the way she draws."—NPR WINNER OF THE ARAB AMERICAN BOOK AWARD • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • The New York Public Library • Kirkus Reviews *I Was Their American Dream* is at once a coming-of-age story and a reminder of the thousands of immigrants who come to America in search for a better life for themselves and their children. The daughter of parents with unfulfilled dreams themselves, Malaka navigated her childhood chasing her parents' ideals, learning to code-switch between her family's Filipino and Egyptian customs, adapting to white culture to fit in, crushing on skater boys, and trying to understand the tension between holding onto cultural values and trying to be an all-American kid. Malaka Gharib's triumphant graphic memoir brings to life her teenage antics and illuminates earnest questions about identity and culture, while providing thoughtful insight into the lives of modern immigrants and the generation of millennial children they raised. Malaka's story is a heartfelt tribute to the American immigrants who have invested their future in the promise of the American dream. Praise for *I Was Their American Dream* "In this time when immigration is such a hot topic, Malaka Gharib puts an engaging human face on the issue. . . . The push and pull first-generation kids feel is portrayed with humor and love, especially humor. . . . Gharib pokes fun at all of the cultures she lives in, able to see each of them with an outsider's wry eye, while

appreciating them with an insider's close experience. . . . The question of 'What are you?' has never been answered with so much charm."—Marissa Moss, *New York Journal of Books* "Forthright and funny, Gharib fiercely claims her own American dream."—Booklist "Thoughtful and relatable, this touching account should be shared across generations."—*Library Journal* "This charming graphic memoir riffs on the joys and challenges of developing a unique ethnic identity."—*Publishers Weekly*

Just Us - Claudia Rankine 2020-09-08

FINALIST FOR THE 2021 ANDREW CARNEGIE MEDAL FOR EXCELLENCE IN NONFICTION *Citizen* changed the conversation—*Just Us* urges all of us into it As everyday white supremacy becomes increasingly vocalized with no clear answers at hand, how best might we approach one another? Claudia Rankine, without telling us what to do, urges us to begin the discussions that might open pathways through this divisive and stuck moment in American history. *Just Us* is an invitation to discover what it takes to stay in the room together, even and especially in breaching the silence, guilt, and violence that follow direct addresses of whiteness. Rankine's questions disrupt the false comfort of our culture's liminal and private spaces—the airport, the theater, the dinner party, the voting booth—where neutrality and politeness live on the surface of differing commitments, beliefs, and prejudices as our public and private lives intersect. This brilliant arrangement of essays, poems, and images includes the voices and rebuttals of others: white men in first class responding to, and with, their white male privilege; a friend's explanation of her infuriating behavior at a play; and women confronting the political currency of dying their hair blond, all running alongside fact-checked notes and commentary that complements Rankine's own text, complicating notions of authority and who gets the last word. Sometimes wry, often vulnerable, and always prescient, *Just Us* is Rankine's most intimate work, less interested in being right than in being true, being together.

The Meaning of Difference - Karen Elaine Rosenblum 2006

The Meaning of Difference is a text-reader about the social construction of difference as it operates in American formulations of race, sex and gender, social class, and sexual orientation. The book is based on the conviction that similar processes are at work in the construction of differences of color, sex and gender, class, and sexuality and that these processes likely also apply to other master statuses such as disability. Four framework essays provide the conceptual structure for the book. Following each framework essay is a set of readings that illustrate the concepts and processes described in the essays. The readings have been selected for readability, conceptual depth, and applicability to a variety of statuses.

A Troublesome Inheritance - Nicholas Wade 2015-04-28

Drawing on startling new evidence from the mapping of the genome, an explosive new account of the genetic basis of race and its role in the human story Fewer ideas have been more toxic or harmful than the idea of the biological reality of race, and with it the idea that humans of different races are biologically different from one another. For this understandable reason, the idea has been banished from polite academic conversation. Arguing that race is more than just a social construct can get a scholar run out of town, or at least off campus, on a rail. Human evolution, the consensus view insists, ended in prehistory. Inconveniently, as Nicholas Wade argues in *A Troublesome Inheritance*,

the consensus view cannot be right. And in fact, we know that populations have changed in the past few thousand years—to be lactose tolerant, for example, and to survive at high altitudes. Race is not a bright-line distinction; by definition it means that the more human populations are kept apart, the more they evolve their own distinct traits under the selective pressure known as Darwinian evolution. For many thousands of years, most human populations stayed where they were and grew distinct, not just in outward appearance but in deeper senses as well. Wade, the longtime journalist covering genetic advances for *The New York Times*, draws widely on the work of scientists who have made crucial breakthroughs in establishing the reality of recent human evolution. The most provocative claims in this book involve the genetic basis of human social habits. What we might call middle-class social traits—thrift, docility, nonviolence—have been slowly but surely inculcated genetically within agrarian societies, Wade argues. These “values” obviously had a strong cultural component, but Wade points to evidence that agrarian societies evolved away from hunter-gatherer societies in some crucial respects. Also controversial are his findings regarding the genetic basis of traits we associate with intelligence, such as literacy and numeracy, in certain ethnic populations, including the Chinese and Ashkenazi Jews. Wade believes deeply in the fundamental equality of all human peoples. He also believes that science is best served by pursuing the truth without fear, and if his mission to arrive at a coherent summa of what the new genetic science does and does not tell us about race and human history leads straight into a minefield, then so be it. This will not be the last word on the subject, but it will begin a powerful and overdue conversation.

The Meaning of Difference - Karen Elaine Rosenblum 2015

The Social Construction of Difference and Inequality: Race, Class, Gender and Sexuality - Tracy E. Ore 2006

This anthology examines the social construction of race, class, gender, and sexuality and the institutional bases for these relations. While other texts discuss various forms of stratification and the impact of these on members of marginalized groups, Ore provides a thorough discussion of how such systems of stratification are formed and perpetuated and how forms of stratification are interconnected. The anthology supplies sufficient pedagogical tools to aid the student in understanding how the material relates to her/his own life and how her/his own attitudes, actions, and perspectives may serve to perpetuate a stratified system.

The Production of Difference - David R. Roediger 2014-04-10

"In this eye-opening book, David Roediger and Elizabeth Esch offer a radically new way of understanding the history of management in the United States, placing race, migration, and empire at the center of what has sometimes been narrowly seen as a search for efficiency and economy. Ranging from the antebellum period to the coming of the Great Depression, the book examines the extensive literature slave masters produced on how to manage and "develop" slaves; explores what was perhaps the greatest managerial feat in U.S. history, the building of the transcontinental railroad, which pitted Chinese and Irish work gangs against each other; and concludes by looking at how these strategies survive today in the management of hard, low-paying, dangerous jobs in agriculture, military support, and meatpacking. Roediger and Esch convey what slaves, immigrants, and all working people were up against as the objects of managerial control. Managers explicitly ranked racial groups, both in terms of which labor they were best suited for and their relative value compared to others. The authors show how whites relied on such alleged racial knowledge to manage and believed that the "lesser races" could only benefit from their tutelage. These views wove together managerial strategies and white supremacy not only ideologically but practically, every day at workplaces. Even in factories governed by scientific management, the impulse to play races against each other, and to slot workers into jobs categorized by race, constituted powerful management tools used to enforce discipline, lower wages, keep workers on dangerous jobs, and undermine solidarity."--Publisher's description.

Familial Fitness - Sandra M. Sufian 2022-01-21

The first social history of disability and difference in American adoption, from the Progressive Era to the end of the twentieth century. Disability and child welfare, together and apart, are major concerns in American society. Today, about 125,000 children in foster care are eligible and waiting for adoption, and while many children wait more than two years to be adopted, children with disabilities wait even longer. In *Familial Fitness*, Sandra M. Sufian uncovers how disability operates as a fundamental category in the making of the American family, tracing major shifts in policy, practice, and attitudes about the adoptability of

disabled children over the course of the twentieth century. Chronicling the long, complex history of disability, *Familial Fitness* explores how notions and practices of adoption have—and haven't—accommodated disability, and how the language of risk enters into that complicated relationship. We see how the field of adoption moved from widely excluding children with disabilities in the early twentieth century to partially including them at its close. As Sufian traces this historical process, she examines the forces that shaped, and continue to shape, access to the social institution of family and invites readers to rethink the meaning of family itself.

Critical Perspectives on Racial and Ethnic Differences in Health in Late Life - National Research Council 2004-10-16

In their later years, Americans of different racial and ethnic backgrounds are not in equally good-or equally poor-health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course.

Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

Kindred - Octavia E. Butler 2004-02-01

From the New York Times bestselling author of *Parable of the Sower* and MacArthur “Genius” Grant, Nebula, and Hugo award winner *The* visionary time-travel classic whose Black female hero is pulled through time to face the horrors of American slavery and explores the impacts of racism, sexism, and white supremacy then and now. “I lost an arm on my last trip home. My left arm.” Dana’s torment begins when she suddenly vanishes on her 26th birthday from California, 1976, and is dragged through time to antebellum Maryland to rescue a boy named Rufus, heir to a slaveowner’s plantation. She soon realizes the purpose of her summons to the past: protect Rufus to ensure his assault of her Black ancestor so that she may one day be born. As she endures the traumas of slavery and the soul-crushing normalization of savagery, Dana fights to keep her autonomy and return to the present. Blazing the trail for neo-slavery narratives like Colson Whitehead’s *The Underground Railroad* and Ta-Nehisi Coates’s *The Water Dancer*, Butler takes one of speculative fiction’s oldest tropes and infuses it with lasting depth and power. Dana not only experiences the cruelties of slavery on her skin but also grimly learns to accept it as a condition of her own existence in the present. “Where stories about American slavery are often gratuitous, reducing its horror to explicit violence and brutality, *Kindred* is controlled and precise” (New York Times). “Reading Octavia Butler taught me to dream big, and I think it’s absolutely necessary that everybody have that freedom and that willingness to dream.” —N. K. Jemisin The series adaption from FX premieres December 13 on Hulu. Developed for television by writer/executive producer Branden Jacobs-Jenkins (*Watchmen*), executive producers also include Joe Weisberg and Joel Fields (*The Americans*, *The Patient*), and Darren Aronofsky (*The Whale*). Janicza Bravo (*Zola*) is director and an executive producer of the

pilot. Kindred stars Mallori Johnson, Micah Stock, Ryan Kwanten, and Gayle Rankin.

Relational Formations of Race - Natalia Molina 2019-02-26

Relational Formations of Race brings African American, Chicana/Latina, Asian American, and Native American studies together in a single volume, enabling readers to consider the racialization and formation of subordinated groups in relation to one another. These essays conceptualize racialization as a dynamic and interactive process; group-based racial constructions are formed not only in relation to whiteness, but also in relation to other devalued and marginalized groups. The chapters offer explicit guides to understanding race as relational across all disciplines, time periods, regions, and social groups. By studying race relationally, and through a shared context of meaning and power, students will draw connections among subordinated groups and will better comprehend the logic that underpins the forms of inclusion and dispossession such groups face. As the United States shifts toward a minority-majority nation, Relational Formations of Race offers crucial tools for understanding today's shifting race dynamics.

Talking Difference - Mary Crawford 1995-06-22

'I love the warmth and wit in this book, but I say this in no way to detract from the seriousness of its subject matter and its incisive treatment by Mary Crawford... this is a great book and an important book which articulates current critical thinking about research around gender and language. Mary Crawford writes brilliantly, powerfully and lucidly... I thoroughly recommend it' - British Psychological Society Psychology of Women Section Newsletter This refreshing re-evaluation of current wisdom - both academic and popular - about men's and women's language critically assesses the abundant social science research of recent years and its representation in the mass media. Exploring a wide range of topics, from talk shows to self-help books, Mary Crawford offers a new understanding of the role of language practices in both maintaining - and disrupting - gender inequality. The book addresses such provocative questions as: Why has the study of gender and language so often focused on the limitations of women's talk? How do academic practices constrain our understanding of how gender relations are re-created and maintained in language use? Why do assertiveness texts usually ignore indirect modes of speech such as humour and storytelling?
