The Silent Language - Edward Twitchell Hall
1959

In the everyday but unspoken give-and-take of human relationships, the silent language plays a vitally important role. Here, a leading American anthropologist has analyzed the many ways in which people talk to one another without the use of words. The pecking order in a chicken yard, the fierce competition in a school playground, every unwitting gesture and action—this is the vocabulary of the silent language. According to Dr. Hall, the concepts of space and time are tools with which all human beings may transmit messages. Space, for example, is the outgrowth of an animal's instinctive defense of his lair and is reflected in human society by the office worker's jealous defense of his desk, or the guarded, walled patio of a Latin-American home. Similarly, the concept of time, varying from Western precision to Eastern vagueness, is revealed by the businessman who pointedly keeps a client waiting, or the South Pacific islander who murders his neighbor for an injustice suffered twenty years ago.

2010-11-17

searches for a mysteriously vanished girlfriend, he is plunged into a wind tunnel of sexual violence and metaphysical dread. In this propulsive novel, featuring a shabby but oracular Sheep Man, one of the most idiosyncratically brilliant writers at work today fuses together science fiction, the hardboiled thriller, and white-hot satire.

Parallel Worlds - Michio Kaku 2006-02-14

In this thrilling journey into the mysteries of our cosmos, bestselling author Michio Kaku takes us on a dizzying ride to explore black holes and time machines, multidimensional space and, most tantalizing of all, the possibility that parallel universes may lay alongside our own. Kaku skillfully guides us through the latest innovations in string theory and its latest iteration, M-theory, which posits that our universe may be just one in an endless multiverse, a singular bubble floating in a sea of infinite bubble universes. If M-theory is proven correct, we may perhaps finally find answer to the question, "What happened before the big bang?" This is an exciting and unforgettable introduction into the new cutting-edge theories of physics and cosmology from one of the pre-eminent voices in the field.

Dressage in the Fourth Dimension - Sherry Ackerman 2010-09-07

Dressage is often seen as the most formal and controlled of the equine sports, following an ancient, standardized training progression. For philosopher and dressage instructor Dr. Sherry Ackerman, dressage is much more. It — along with riding in general — can be a transformational art and an avenue for reflection, exploration, and self-knowledge through which a rider can experience liberation from the individual, egoistic self. This second, revised edition of *Dressage in the Fourth Dimension* is a pioneer work in awakening "dressage consciousness." Drawing on such diverse sources as sacred geometry, ancient Western and Eastern philosophies, and esoteric spirituality, Ackerman seeks to heal humanity's alienation from nature through riding. She points us toward the liberation from societal conditioning and normative thinking, and, ultimately, from our own egos. Her concept of the fourth dimension requires us to leave the analytic, objective mind behind and enter into the mystery of inspiration. A short, unique, thought-provoking work that has enjoyed a word-of-mouth reputation among horse people for years, *Dressage in the Fourth Dimension* will challenge riders' assumptions about their horses and themselves.

When the Elephants Dance - Tess Uriza Holthe 2002-03-26

"Papa explains the war like this: 'When the elephants dance, the chickens must be careful.' The great beasts, as they circle one another, shaking the trees and trumpeting loudly, are the Amerikanos and the Japanese as they fight. And our Philippine Islands? We are the small chickens." Once in a great while comes a storyteller who can illuminate worlds large and small, in ways both magical and true to life. *When the Elephants Dance* is set in the waning days of World War II, as the Japanese and the Americans engage in a fierce battle for possession of the Philippine Islands. Through the eyes of three narrators, thirteen-year-old Alejandro Karangalan, his spirited older sister Isabelle, and Domingo, a passionate guerilla commander, we see how ordinary people find hope for survival where none seems to exist. While the Karangalan family and their neighbors huddle together for survival in the cellar of a house, they tell magical stories to one another based on Filipino myth that transport the listeners from the chaos of the war around them and give them new resolve to continue fighting. Outside the safety of their refuge the war rages on—fiery bombs torch the countryside, Japanese soldiers round up and interrogate innocent people, and from the hills guerilla fighters wage

a desperate campaign against the enemy. Inside the cellar, these men, women, and children put their hopes and dreams on hold as they wait out the war. This stunning debut novel celebrates with richness and depth the spirit of the Filipino people and their fascinating story and marks the introduction of an author who will join the ranks of writers such as Arundhati Roy, Manil Suri, and Amy Tan.

Understanding Cultural Differences -

Edward T. Hall 2000-07-27

Human resource management, at home and abroad, means assisting the corporation's most valuable asset—its people—to function effectively. Edward T. and Mildred Reed Hall contribute to this effort by explaining the cultural context in which corporations in Germany, France, and the United States operate and how this contributes to misunderstandings between business personnel from each country. Then they offer new insights and practical advice on how to manage day-to-day transactions in the international business arena. *Understanding Cultural Differences* echoes and elaborates on Edward T. Hall's classic studies in intercultural relations, *The Silent Language* and *The Hidden Dimension*. It is a valuable guide for business executives from the three countries and a model of cross-cultural analysis.

House of Leaves - Mark Z. Danielewski 2000-03-07

"A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times
Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story

would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.

The Hidden Dimension - Edmund T. Hall 1969

The Temporal Dimension in Counselling and Psychotherapy - Sue Wright 2020-02-21
The Temporal Dimension in Counselling and Psychotherapy looks at time as an intangible phenomenon that is culturally created, historically framed, but only individually understood. Examining our relationship to time as well as what it means in terms of our mortality, it integrates historical, cultural and psychotherapeutic perspectives to shine a light on our experience of time from our current identity to past trauma, both in the consulting room and beyond. Divided into three parts, the book explores those time-related issues that emerge in psychotherapy, it initially focuses on our existence as individuals in time, with chapters discussing how we develop a sense of

self as a being-in-time, how our relationship to time is coloured by the world we live in today, and our attachment relationships and past traumas. In part two, the focus narrows to the consulting room itself; the practical aspects of the time-frame and how these can be managed. The third part of the book concerns the impact of trauma and other crises on our existence in time, as well as our experience of it. Exploring time-related issues as people navigate different stages in the life-cycle, as well as for people affected by illness, trauma and bereavement, this insightful and thought-provoking book will provide insights for counsellors and therapists about what time means both to themselves and their clients.

Dancing with the Divine - Carla De Sola 2021-10
Carla De Sola has danced in a sacred context for more than fifty years. Over time she has noticed a common bond among dancers, based in part of their developed bodily, or kinesthetic sense, a heightened ability to read and understand the rhythms and dynamics of movement experiences. This was not solely an artistic appreciation of dance but of life experiences seemingly ordinary but consciousness changing. She was led to ask other dancers if they had a story to tell of special times of awareness of Divine presence, that is, their own personal kairos moments --grace-filled happenings beyond ordinary chronos, or clock time, becoming imprinted on their soul. Thus, this collection came into being. The dancers' stories range broadly and in diverse settings. The essays are categorized into sections: Dancing for the Common Good; Dance Moves the Soul; The Joy of Dance; Journey to Awareness;and Called to Dance. Diana Wear wrote theological reflections in order to frame each section. David W. McCauley, Jr. drew upon his artistry, skills, and imagination so that each category was enriched through a visual dimension. The designs, paintings, and photos throughout the book carry a deep purpose--to give readers' eyes a place to rest and space for the mind to contemplate--contributing their own meditative moments.

Horror at the Drive-In - Gary D. Rhodes 2015-09-03
Drive-in movie theaters and the horror films shown at them during the 1950s, 60s, and early 70s may be somewhat outdated, but they

continue to enthrall movie buffs today. More than just fodder for the satirical cannons of Joe Bob Briggs and Mystery Science Theatre 3000, they appeal to knowledgeable fans and film scholars who understand their influence on American popular culture. This book is a collection of eighteen essays by various scholars on the classic drive-in horror film experience. Those in Section One emphasize the roles of the drive-in theater in the United States—and its cultural cousin, Australia. Section Two examines how horror operated at the drive-in, the rhetoric used in coming attraction trailers, horror film premieres at drive-ins, double features, and the preproduction, production, and marketing of *Last House on the Left*. Section Three addresses the effects of the Vietnam War and counter-culture on *The Texas Chainsaw Massacre*, and the Cold War on *Cat Women of the Moon*. Section Four explores gender issues and sexuality, two of the most common and most important subjects of horror film analysis. Section Five covers drive-in culture via *Hush...Hush*, *Sweet Charlotte*, *2000 Maniacs*, and the films of Mario Bava. Section Six investigates a variety of issues, such as the drive-in horror film's embrace of DNA, the use of cinematic form to create a non-Hollywood look in *Wizard of Gore*, and the many different prints and running times of *I Drink Your Blood*.

Mind Is Your Business - Sadhguru 2015-03-22
For most people, the mind seems to be an unruly cacophony, attempting to grasp and shape everything which falls in its purview. In *Mind Is Your Business*, Sadhguru explains that only if we make it "our business" to transform this uncoordinated mess into a well-coordinated symphony, will we be able to use the mind, rather than be used by it. Sadhguru is a yogi and profound mystic of our times. An absolute clarity of perception places him in a unique space in not only matters spiritual but in business, environmental and international affairs, and opens a new door on all that he touches.

The Dance of Life - Edward T. Hall 1984-02-09
"Hall, whose *Beyond Culture* and *The Silent Language* won a wider readership, has written a ground-breaking investigation of the ways we use and abuse time, rich in insights applicable to our lives. Business readers will enjoy the cross-cultural comparison of American know-how with

practices of compartmentalized German, centralized French, and ceremonious Japanese firms." —Publishers Weekly
In his pioneering work *The Hidden Dimension*, Edward T. Hall spoke of different cultures' concepts of space. Now *The Dance of Life* reveals the ways in which individuals in culture are tied together by invisible threads of rhythm and yet isolated from each other by hidden walls of time. Hall shows how time is an organizer of activities, a synthesizer and integrator, and a special language that reveals how we really feel about each other. Time plays a central role in the diversity of cultures such as the American and the Japanese, which Hall shows to be mirror images of each other. He also deals with how time influences relations among Western Europeans, Latin Americans, Anglo-Americans, and Native Americans.

Human Dimension and Interior Space - Julius Panero 2014-01-21

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body

sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Time - Eva Hoffman 2010-07-09

Time has always been the great Given, a fact of existence which cannot be denied or wished away; but the character of lived time is changing dramatically. Medical advances extend our longevity, while digital devices compress time into ever briefer units. We can now exist in several time-zones simultaneously, but we suffer from endemic shortages of time. We are working longer hours and blurring the distinctions between labour and leisure. For many, in an inversion of the old adage, time has become more valuable than money. In this look at life's most ineffable element, spanning fields from biology and culture to psychoanalysis and neuroscience, Eva Hoffman asks: are we coming to the end of time as we know it?

Anthropology and the Dance - Drid Williams 2004

Drid Williams explores dance and dance-related subjects ranging from Aboriginal and African dances to the Royal Ballet, and makes a compelling case for moving beyond the Western view of the dance as mere entertainment.

Beyond Culture - Edward T. Hall 1976-12-07

From a renowned American anthropologist comes a proud celebration of human capacities. For too long, people have taken their own ways of life for granted, ignoring the vast, international cultural community that surrounds them. Humankind must now embark on the difficult journey beyond culture, to the discovery of a lost self a sense of perspective. By holding up a mirror, Hall permits us to see the awesome grip of unconscious culture. With concrete examples ranging from James Joyce's *Finnegans Wake* to the mating habits of the bowerbird of New Guinea, Hall shows us ourselves. *Beyond Culture* is a book about self-discovery; it is a voyage we all must embark on if mankind is to survive. [and] should reward careful readers with new ways of

When Breath Becomes Air - Paul Kalanithi

2016-01-12

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. *When Breath Becomes Air* chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and

everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" *When Breath Becomes Air* is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

Natasha's Dance - Orlando Figes 2014-02-11

History on a grand scale--an enchanting masterpiece that explores the making of one of the world's most vibrant civilizations *A People's Tragedy*, wrote Eric Hobsbawm, did "more to help us understand the Russian Revolution than any other book I know." Now, in *Natasha's Dance*, internationally renowned historian Orlando Figes does the same for Russian culture, summoning the myriad elements that formed a nation and held it together. Beginning in the eighteenth century with the building of St. Petersburg--a "window on the West"--and culminating with the challenges posed to Russian identity by the Soviet regime, Figes examines how writers, artists, and musicians grappled with the idea of Russia itself--its character, spiritual essence, and destiny. He skillfully interweaves the great works--by Dostoevsky, Stravinsky, and Chagall--with folk embroidery, peasant songs, religious icons, and all the customs of daily life, from food and drink to bathing habits to beliefs about the spirit world. Figes's characters range high and low: the revered Tolstoy, who left his deathbed to search for the Kingdom of God, as well as the serf girl Praskovya, who became Russian opera's first superstar and shocked society by becoming her owner's wife. Like the European-schooled countess Natasha performing an impromptu folk dance in Tolstoy's *War and Peace*, the spirit of "Russianness" is revealed by Figes as rich and uplifting, complex and contradictory--a powerful force that unified a vast country and proved more lasting than any Russian ruler or state.

Dare to Lead - Brené Brown 2018-10-09

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is

a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Flatland - Edwin A. Abbott 2006-07-13

'Upward, yet not Northward.' How would a creature limited to two dimensions be able to grasp the possibility of a third? Edwin A. Abbott's droll and delightful 'romance of many dimensions' explores this conundrum in the experiences of his protagonist, A Square, whose linear world is invaded by an emissary Sphere

bringing the gospel of the third dimension on the eve of the new millennium. Part geometry lesson, part social satire, this classic work of science fiction brilliantly succeeds in enlarging all readers' imaginations beyond the limits of our 'respective dimensional prejudices'. In a world where class is determined by how many sides you possess, and women are straight lines, the prospects for enlightenment are boundless, and Abbott's hypotheses about a fourth and higher dimensions seem startlingly relevant today. This new edition of Flatland illuminates the social and intellectual context that produced the work as well as the timeless questions that it raises about the limits of our perception and knowledge. [The Death and Life of Great American Cities](#) - Jane Jacobs 2016-07-20

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the bitingly satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners.

Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.
