Values in Sustainable Development - Jack Appleton 2013-08-22

To enhance sustainable development research and practice the values of the researchers, project managers and participants must first be made explicit. Values in Sustainable Development introduces and compares worldviews and values from multiple countries and perspectives, providing a survey of empirical methods available to study environmental values as affected by sustainable development. The first part is methodological, looking at what values are, why they are important, and how to include values in sustainable development. The second part looks at how values differ across social contexts, religions and viewpoints demonstrating how various individuals may value nature from a variety of cultural, social, and religious points of view. The third and final part presents case studies ordered by scale from the individual and community levels through to the national, regional and international levels. These examples show how values can motivate, be incorporated into and be an integral part of the success of a project. Paramedic Heretic: Immutable Laws and Ethical Illusions - K.

Patrick McDonald 2014-12-08

At one point during our lunch the famous Sonny Bono asked, "So in other words, we've reached a point where a rescuer can't say 'screw the rules' and just do the right thing?" Not in other words, Sonny. Those are the perfect words. Immutable Law #2 Saving lives is not our priority.

Following our policies is our priority. Protecting ourselves comes next. Avoiding lawsuits comes third. You come somewhere after that. *** I was not even out of school before I witnessed my first doctor commit murder. It would not be my last - Lord, no - but I can recall that night as vividly as though it happened last week. Few medics forget their first physician homicide. *** The ugly truth is some of the most macho medics on the planet turn into complete lollipops in the presence of an arrogant, incompetent physician. No matter how you parse it, that is professional cowardice. *** K. Patrick McDonald is a graduate of UCSD La Jolla School of Medicine original Advanced Field Medicine program. He was appointed the first EMS Supervisor for the City of San Diego under Mayor (and then Governor) Pete Wilson's administration. He created one of the nation's first STAR (Special Trauma & Rescue) Teams and co-authored the San Diego City Disaster Preparedness Plan. He was a co-author of the National Waterpark Lifeguard Training Manual. He has acted as consultant to the U.S. Secret Service in Presidential Protection matters. He writes, "After 30 years of occasionally saving lives, I learned that by writing and speaking, I can do more good for more citizens, while tolerating far fewer medical-political snollygosters." Convertibles - Dennis Adler 2011-06-27

Convertibles (in the First Gear series) is a celebration of the classic drop-top, from the earliest of coach cars where convertible style was the norm, to the high-end sports cars of today. Today's convertible is a metaphor for freedom on the open road. To drop the top and feel the wind and sun and to be able to cover up again in rain and cold represents the ultimate automotive luxury. From Ford's Model T to sporty Jaguar roadsters, from classic Chevys to modern Miatas, the convertible is a body style that never goes out of style. Convertibles profiles more than 60 cars in wonderful photographic detail. Each car profile includes its history, performance specs, trivia, and a color photo gallery. For the dedicated auto enthusiast or the casual or budding fan, this book is an entertaining survey of the greatest convertibles ever made.

The Pursuit of Pleasure - Lionel Tiger 2017-07-12

Pleasure is biologically desirable and good for physical and mental health. In *The Pursuit of Pleasure*, Lionel Tiger explores this aspect of human nature by focusing on the origins and forms of pleasure. Medical science has perfected a host of often astonishingly impressive methods for preventing, alleviating, or recovering from pain. Its opposite, pleasure, has not had such a well-funded and fully justified constituency. In fact, those committed to the understanding and pursuit of pleasure, are rarely accorded respect and a sense of significance. People have objected to the notion of pleasure for a variety of reasons. The most complex derive from religious convictions that the most morally admirable human life is marked by abstemiousness, suffering, even martyrdom. There is also a corresponding fear that people may pursue pleasure too avidly and with too strong a sense of entitlement, and the world's work will not get done. But just as there have been suspicions of the dangers of pleasure, there have also been its supporters who assert its vital and joyful centrality to human experience. *The Pursuit of Pleasure* favors an agnostic approach borrowed from natural science. In lively, witty, and eminently readable prose, Tiger identifies major forms of pleasure and explores their variations, now and in the past. Pleasure, says Tiger, is not a luxury but an evolutionary entitlement that deserves to be taken seriously. As we acknowledge our need for enjoyment, we understand the need to establish balance in our lives-our need for the pursuit of pleasure.

Illustrated Dictionary of Automobile Body Styles, 2d ed. - Lennart W. Haajanen 2017-05-24

Cars today fit a fairly small number of body types--sedan, coupe, station wagon, SUV, hatchback and a few others. The meanings of these familiar terms have changed over the decades as automotive design has evolved. Along the way, a greater number of earlier body types have fallen out of use and become historical curiosities. Who today can identify a charabanc, a dos-a-dos or even a phaeton? This expanded second edition defines all distinct body types since the early days of the automobile, many of which were derived from horse-drawn vehicles. Entries, many including clear line drawings, describe popular types and variations from different countries and time periods as well as terms for body components. Subtypes and subtle distinctions are explained and common misuses of terms and designations are clarified.

Deadly Truths - Rebecca Royce 2019-03-31

I'm Everly Marrs. Eighteen months ago the Letters took me to force my father's hand and turned my world upside down. A few months after that, a man named Ben took me from them and I went through hell before I saw them again and they turned my heart inside out. In fast moments I'll never get over, I killed my father and walked away from everything--the Alliance, the Letters, my heart. Before D, W, T, K and J, I had plans. I was going to help people. After, I barely recognize myself, but I went through the motions, and I finished school. I had a job that paid under the table. I avoided electronic monitoring and I knew how to take care of myself. I was going off the grid. I was going to be safe and disappear. Then one of my Letters walked into a bar...it sounds like a joke yet its anything but funny. Once again, I'm plunged back into their world, only they aren't taking me this time. No one is. No, this time I know what it means to be Everly Marrs and what happens next is going to happen my way.

Bruno Sacco - Nik Greene 2020-09

When Bruno Sacco walked through the doors on his first day at Mercedes-Benz on 13 January 1958, it is highly unlikely that his Daimler-Benz colleagues could ever imagine that this nervous young man would not only revolutionize design but would change the way design and innovation connected with brand tradition forever. Bruno Sacco is one of the most influential automotive designers of the late twentieth century; many models launched during his era now characterize the Mercedes-Benz brand. When Nik Greene asked Bruno Sacco to assist with this book, he replied humbly "No-one designs a car alone, and more to the point, I never, for one minute, wanted to. From the moment I became Head of Design, I put down my pens and became a manager of minds." With over 330 photographs and illustrations, this book includes an overview of the early days of functional vehicle design and the influence of safety on design evolution. The protagonists of Daimler-Benz design from Hermann Ahrens to Paul Bracq are covered. Design philosophy and innovation under Bruno Sacco is discussed along with the Sacco-designed cars and, finally, the Bruno Sacco legacy.

One Good Turn - Witold Rybczynski 2013-07-23

The Best Tool of the Millennium The seeds of Rybczynski's elegant and illuminating new book were sown by The New York Times, whose editors asked him to write an essay identifying "the best tool of the millennium." The award-winning author of *Home*, *A Clearing in the Distance*, and *Now I Sit Me Down*, Rybczynski once built a house using only hand tools. His intimate knowledge of the toolbox -- both its contents and its history -- serves him beautifully on his quest. *One Good Turn* is a story starring Archimedes, who invented the water screw and introduced the helix, and Leonardo, who sketched a machine for carving wood screws. It is a story of mechanical discovery and genius that takes readers from ancient Greece to car design in the age of American industry. Rybczynski writes an ode to the screw, without which there would be no telescope, no microscope -- in short, no enlightenment science. One of our finest cultural and architectural historians, Rybczynski renders a graceful, original, and engaging portrait of the tool that changed the course of civilization.

The Mercedes-Benz G-Class - Jörg Sand 2021-11-28

Mercedes-Benz G-Class specialist Jörg Sand has written the ultimate book on this all-wheel-drive legend, from its design and development to its extraordinary and diverse career up to the present day. Very few automobiles remain as faithful in their character and appearance as the hardcore, all-wheel-drive Mercedes-Benz G-Class luxury SUV. Even when it comes to the most recent series, the W 463 A, with its technically profound changes, the designers at Mercedes have barely changed the classic look. And for good reason. From its first year, 1979, the G-Class has always been one of the very few off-road legends. Tourists, firefighters, foresters, race drivers, and boat owners all appreciate the unique qualities of this indestructible force, the "G Wagon," from Graz, Austria.
