Data Structures and Abstractions with Java - Frank M. Carrano 2014-08-13

Data Structures and Abstractions with Java is suitable for one- or two-semester courses in data structures (CS-2) in the departments of Computer Science, Computer Engineering, Business, and Management Information Systems. This book is also useful for programmers and software engineers interested in learning more about data structures and abstractions. This is the most student-friendly data structures text available that introduces ADTs in individual, brief chapters -- each with pedagogical tools to help students master each concept. Using the latest features of Java, this unique object-oriented presentation makes a clear distinction between specification and implementation to simplify learning, while providing maximum classroom flexibility. Teaching and Learning Experience This book will provide a better teaching and learning experience--for you and your students. It will help: Aid

comprehension and facilitate teaching with an approachable format and content organization: Material is organized into small segments that focus a reader's attention and provide greater instructional flexibility. Support learning with student-friendly pedagogy: In-text and online features help students master the material.

Going Gentle - Fiona Owen 2007

A thoughtful and thought-provoking collection of personal and accessible poems by a poet from Anglesey.

Random Processes for Engineers - Bruce Hajek 2015-03-12

This engaging introduction to random processes provides students with the critical tools needed to design and evaluate engineering systems that must operate reliably in uncertain environments. A brief review of probability theory and real analysis of deterministic functions sets the stage for understanding random processes, whilst the underlying measure theoretic notions are explained in an intuitive, straightforward style. Students will learn to manage the complexity of randomness through the use of simple classes of random processes, statistical means and correlations, asymptotic analysis, sampling, and effective algorithms. Key topics covered include: • Calculus of random processes in linear systems • Kalman and Wiener filtering • Hidden Markov models for statistical inference • The estimation maximization (EM) algorithm • An introduction to martingales and concentration inequalities.

Understanding of the key concepts is reinforced through over 100 worked examples and 300 thoroughly tested homework problems (half of

which are solved in detail at the end of the book).

Redback One - Robert Macklin 2014-03-25

Explosive SAS action in East Timor, Iraq and Afghanistan. The command came: 'Stop those vehicles!' It was like a red rag to a bull. Instantly streams of 7.62 mm tracer and 50 mm calibre machine gun rounds arced across the night sky and smashed into the bus and truck. Elite SAS Patrol Commander Stuart 'Nev' Bonner takes us inside the extraordinary and dangerous world of secret combat operations in this explosive, behind-the-scenes look at life inside the SAS. A world where capture means torture or death, and every move is trained for with precision detail to bring elite soldiers to the very peak of fighting ability. In a career spanning twenty years, fourteen of them in the SAS, Bonner shares with us the inside story of being out in front ? and often behind enemy lines. From patrolling the mountains of East Timor to covert operations in Bougainville and the Solomon Islands, from sweeping into the Iraqi desert ahead of invading US forces to cripple Saddam Hussein's communications to patrolling in war-torn Baghdad and being in the middle of the disastrous Operation Anaconda in Afghanistan ? this is a no holds barred account of what it like to live, eat and breathe SAS.

The Amish Quiltmaker's Unruly In-Law - Jennifer Beckstrand 2021-06-29

Moving to a new Amish settlement in small-town Colorado was a brave new start for independent-minded quiltmaker Esther Kiem. But helping her reckless relative will really put her special matchmaking skills to the test . . . Mischievous and rebellious, young Ben Kiem is making the wrong kind of name for himself throughout the town of Byler. And even though his sister-in-law, Esther, somehow coaxes him into keeping company with sensible Linda Eicher, Ben can't see anything they have in common. Or that he could ever be good enough for someone like her. But Linda's down-to-earth nature and unexpected understanding have Ben trying his best to be better, no matter how challenging . . . Linda couldn't be more surprised when Ben turns out to be caring and helpful, despite his rowdy pranks and bad-news friends. And falling in love with him suddenly seems just right. But when a heartbreaking misunderstanding comes between them, both she and Ben must risk enough to trust, stitch the pieces back together—and dare a forever precious happiness. Praise for Jennifer Beckstrand and Abraham "This is an endearing romance that fans of Wanda Brunstetter will love." —Publishers Weekly
