The Civil Rights Movement in Mississippi -

Ted Ownby 2013-10-17

Based on new research and combining multiple scholarly approaches, these twelve essays tell new stories about the civil rights movement in

the state most resistant to change. Wesley Hogan, Françoise N. Hamlin, and Michael Vinson Williams raise questions about how civil rights organizing took place. Three pairs of essays address African Americans' and whites' stories on education, religion, and the issues of violence. Jelani Favors and Robert Luckett analyze civil rights issues on the campuses of Jackson State University and the University of Mississippi. Carter Dalton Lyon and Joseph T. Reiff study people who confronted the question of how their religion related to their possible involvement in civil rights activism. By studying the Ku Klux Klan and the Deacons for Defense in Mississippi, David Cunningham and Akinyele Umoja ask who chose to use violence or to raise its possibility. The final three chapters describe some of the consequences and continuing questions raised by the civil rights movement. Byron D'Andra Orey analyzes the degree to which voting rights translated into political power for African American legislators. Chris

Myers Asch studies a Freedom School that started in recent years in the Mississippi Delta. Emilye Crosby details the conflicting memories of Claiborne County residents and the parts of the civil rights movement they recall or ignore. As a group, the essays introduce numerous new characters and conundrums into civil rights scholarship, advance efforts to study African Americans and whites as interactive agents in the complex stories, and encourage historians to pull civil rights scholarship closer toward the present.

Having Fun with Maps and Globes - Abraham Resnick 2000-05-26

The primary purpose of his handbook is to provide educators with a variety of proven activities to make learning map and globe skills both enjoyable and meaningful for your students. The activities, which include cross-curriculum, can be used with multiple grade levels, small groups, or individually. Having Fun with Maps and globes is organized into six parts. Part One introduces you to the basic goals of a Map and Globe Skills Program and concludes with some general "Tips for Teachers." Part Two provides activities for teaching the basic concepts of maps and globes. Because the ability to read and make maps involves many individual skills, the activities in this section are organized

into several categories or subsets of skills. For each subset, several fully developed activities are presented, along with a "grab-bag" of additional activities that can be used in a stand-alone map and globe unit or to reinforce general map skills. Because map and globe skills support other curriculum areas besides social studies, Part Three provides activities organized by subject area. This allows you to locate the subject you are teaching and access several related map and globe skill activities. Such cross-curriculum tasks will reinforce art, math, reading, science, language, and thinking skills. For easy access, all student activity sheets (called Supplements in this manual) are located in Part Four of the handbook. Part Five lists currently available resources for teachers and students. Beyond the standard lists of print materials, the author has provided sources for multimedia kits and computer software that will enrich anyone's program. An appendix, which includes map masters, a glossary of terms, and

comparison charts, concludes the handbook. Although these materials are mentioned in various activities throughout the book, here they are more accessible as a reference and as a source from which to draw in developing your own lessons, or an entire school program. Because of the wide range of resources Having Fun with Maps and Globes provides, this handbook is a wonderful companion to the supplementary materials you presently use in your school curriculum.

The Thing About Georgie - Lisa Graff

2009-10-06

Fans of Kate DiCamillo and Linda Urban will love *The Thing About Georgie*, a warm and humorous story starring an unforgettable young boy with dwarfism, from acclaimed author Lisa Graff. As far as Georgie is concerned, everyone has a "thing." The thing about poodles is that Georgie Bishop hates to walk them. The thing about Jeanie the Meanie is that she would rather write on her shoe than help Georgie with their Abraham Lincoln project. The thing about Andy's nonna is that she kisses Georgie's cheeks and doesn't speak one word of English. The thing about Georgie's mom is that she's having a baby—a baby who will probably be taller than Georgie very, very soon. The thing about Georgie . . . well, what is the thing about Georgie?

Strategic Education Research Partnership -

National Research Council 2003-07-25

Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put the problems of educational practice at its center, and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the nation's resources and political will, the power of

scientific research, and the expertise of our educators, to create a more effective research and development program for improving student learning.

[Anti-Blackness at School](#) - Joi Spencer

While schools often are framed as places of

neutrality and fairness, many American schools have harmed Black children or been silent in the face of their struggles, under-education, and mistreatment. While there are undoubtedly adults in these spaces who support Black children, many others ignore Black families, minimize students' concerns, and believe that colorblindness will solve the problem of inequity in education. Embedded in everyday realities, the authors outline the many ways anti-Blackness shows up in schools. Drawing on more than 44 years of equity work, they provide concrete, doable, and meaningful ways in which teachers and administrators can create Black-affirming spaces. Written for pre- and in-service teachers and others working with Black children and youth, *Anti-Blackness at School* explores both the scope of anti-Blackness and how teachers can reject racism. Book Features: Provides interracial perspectives from authors Joi Spencer, a Black woman from California, and Kerri Ullucci, a White woman from Rhode Island.

Uses case studies, activities, lessons, and techniques to talk about anti-Blackness, inventory its presence, and take steps to address the harm caused by it. Calls out how school policies, programs, belief systems, and customs are particularly hostile to Black youth. Explains

why diversity work is not synonymous with antiracist work, offering a model focused on justice and equity. Directs practitioners to easily accessible resources that will allow them to challenge racism and uplift Black youth in their care.
