*Arbitration Costs* - Susan D. Franck 2019-03-26

Investment treaty arbitration (sometimes called investor-state dispute settlement or ISDS) has become a flashpoint in the backlash against globalization, with costs becoming an area of core scrutiny. Yet "conventional wisdom" about costs is not necessarily wise. To separate fact from fiction, this book tests claims about investment arbitration and fiscal costs against data so that policy reforms can be informed by scientific evidence. The exercise is critical, as investment treaties grant international arbitrators the power to order states-both rich and poor-to pay potentially millions of dollars to foreign investors when states violate the international law commitments made in the treaties. Meanwhile, the cost to access and defend the arbitration can also climb to

millions of dollars. This book uses insights drawn from cognitive psychology and hard data to explore the reality of investment treaty arbitration, identify core demographics and basic information on outcomes, and drill down on the costs of parties' counsel and arbitral tribunals. It offers a nuanced analysis of how and when cost-shifting occurs, parses tribunals' rationalization (or lack thereof) of cost assessments, and models the variables most likely to predict costs, using data to point the way towards evidence-based normative reform. With an intelligent interdisciplinary approach that speaks to ongoing reform at entities like the World Bank's ICSID and UNCITRAL, this book provides the most up-to-date study of investment treaty dispute settlement, offering new insights that will shape the direction of investment treaty and arbitration reform more broadly.

**International Investment Arbitration** - Campbell McLachlan 2017-09-07

"[This book reviews] the substantive principles of international law applied by investment arbitration tribunals, and a clear and comprehensive description of the present state of the law...The second edition is fully updated to take account of the arbitration awards rendered in the period since 2007...Key areas of coverage include: the instruments under which investment disputes arise; the legal basis of treaty arbitration; dispute resolution and parallel proceedings; who is a foreign investor, including nationality issues and foreign control; what is an investment; investors' substantive rights, including fair and equitable treatment; expropriation; compensation and remedies. Arbitration of overseas investment disputes is one of the fastest growing areas of international dispute resolution. The exponential growth of international investment in recent years has led to the signature of over two thousand Bilateral Investment Treaties (BITs) between foreign

states, in addition to a wealth of multilateral treaties and other forms of concession agreements. The legal principles that have developed in this area are subject to intense debate, and are still in a state of flux. While tribunals routinely state that they are applying principles of public international law to determine disputes, many of the principles applied have only been developed recently in the context of investment treaty arbitrations, and tribunals are often guided more by the approaches taken by other tribunals, than by pre-existing doctrines of public international law."--

### The Foundations of

### International Investment Law -

Zachary Douglas 2014-05-01

International investment law is one of the fastest growing areas of international law. It has led to the signing of thousands of agreements, mostly in the form of investment contracts and bilateral investment treaties. Also, in the last two decades, there has been an exponential

growth in the number of disputes being resolved by investment arbitration tribunals. Yet the legal principles at the basis of international investment law and arbitration remain in a state of flux. Perhaps the best illustration of this phenomenon is the wide disagreement among investment tribunals on some of the core concepts underpinning the regime, such as investment, property, regulatory powers, scope of jurisdiction, applicable law, or the interactions with other areas of international law. The purpose of this book is to revisit these conceptual foundations in order to shed light on the practice of international investment law. It is an attempt to bridge the growing gap between the theory and the practice of this thriving area of international law. The first part of the book focuses on the 'infrastructure' of the investment regime or, more specifically, on the structural arrangements that have been developed to manage foreign investment

transactions and the potential disputes arising from them. The second part of the book identifies the common conceptual bases of an array of seemingly unconnected practical problems in order to clarify the main stakes and offer balanced solutions. The third part addresses the main sources of 'regime stress' as well as the main legal mechanisms available to manage such challenges to the operation of the regime. Overall, the book offers a thorough investigation of the conflicting theoretical positions underlying international investment law, testing their worth by reference to concrete issues that have arisen in the jurisprudence. It demonstrates that many of the most important practical questions arising in practice can be addressed by a carefully dosed resort to theory.

**Law** - Surya P. Subedi

'...This book [...] goes beyond stating what the law is and focuses on controversies occurring within this area of the law... an excellent introduction to this complex area of international law for newcomers to the subject' Kate Miles, Australian International Law Journal The updated edition of this acclaimed book offers a critical overview of the law of foreign investment, incorporating a thorough analysis of the principles and standards of treatment available to foreign investors in international law. It is authoritative and multi-layered, offering an analysis of the key issues and an insightful assessment of recent trends in the case law, from both developed and developing country perspectives. A major feature of the book is that it

deals with the tension between the law of foreign investment and other competing principles of international law. In doing so, it proposes ways of achieving a balance between these principles and the need to protect the legitimate rights and expectations of foreign investors on the one hand, and the need not to restrict unduly the right of host governments to implement their public policy on the other, including the protection of the environment and human rights, and the promotion of social and economic justice within the host country. Many of the pioneering ideas that were advanced in the first edition of this book in 2008 have been taken up by governments and international organisations in their attempts to reform the investor-State dispute settlement mechanism and strike a balance between different competing principles in developing international investment law. Accordingly, this fourth edition captures the essence of the ongoing multiple reform processes -either

planned or envisaged - currently underway.

### **Investment Law within**

### **International Law** - Freya

Baetens 2013-08-01

Developments within various sub-fields of international law influence international investment law, but changes in investment law also have an impact on the evolution of other fields within international law. Through contributions from leading scholars and practitioners, this book analyses specific links between investment law and other sub-fields of international law such as the law on armed conflict, human rights, sustainable development, trade, development and EU law. In particular, this book scrutinises how concepts, principles and rules developed in the context of such sub-fields could inform the content of investment law. Solutions aimed at resolving problems in other settings may provide instructive examples for addressing current problems in the field of investment law, and vice versa. The underlying question is whether key sub-fields of

public international law, notably international investment law, are open to cross-fertilisation, or, whether they are evolving further into self-contained regimes.

### **The Law of Investment**

**Treaties** - Jeswald W. Salacuse  
2015-06-04

The rapid growth in investment treaties has led to a burgeoning number of international arbitration decisions that have applied and interpreted treaty provisions in disputes between investors and states concerning their respective rights. This flurry of treaties and arbitral decisions

has seen the creation of a new branch of international law- the law of investment claims. In this revised edition, Jeswald Salacuse examines the law of international investment treaties, specifically in relation to its origins, structure, content, and effect, as well as their impact on international investors and investments, and the governments that are parties to them. Investment treaty law is a rapidly evolving field and since publication of the first edition, the law of international investment treaties has both experienced considerable growth and generated extensive controversy. 2011 saw the highest number of new treaty-based arbitration filed under international investment agreements to date, and in July 2014, the Yukos Universal Limited (Isle of Man) v The Russian Federation culminated with awards of over US\$50 billion; a historic record for any arbitration. Controversy in this field has primarily revolved around the investor-state dispute settlement process,

which as thus far involved at least 98 states as respondents. Salacuse captures these developments in this updated edition, examining not only the significant growth in treaties, but the trends that have followed, and their effect on the content and evolution of the law of investment treaties. Specific topics include conditions for the entry of foreign investment and general standards of treatment of foreign investments; monetary transfers; operational conditions; protection against expropriation; dispossession and compensation for losses; dispute settlement, including negotiation, arbitration, and conciliation; and judicial proceedings.

*Arbitral Awards as Investments*  
- Maximilian Clasmeier  
2017-01-01

The rise of international investment arbitration has resulted in the emergence of a number of intriguing legal and political challenges. One of those is the question of whether or not arbitral awards may constitute investments pursuant to existing investment treaties. In approaching the problem, it is the interconnection between theory and practice that delivers solutions. This book presents the first detailed analysis of the existing tribunals' approaches to date. In examining the principles of treaty interpretation, their

application in arbitral practice, shortcomings and their ramifications and possible routes to improvement, the book addresses the following questions: - What is the foundation of interpretation in public international law and when is it adequately carried out? - Can arbitral awards constitute investments, offering relief from frustrated enforcement attempts? - Is there a trend of convergence of commercial and investment arbitration? - Do respective interpretative outcomes stem from adequate interpretation? - What are the ramifications, if interpretation is not fully adequate? - What are the feasible routes to greater interpretive discipline? The book is mindful of the underlying public international law principles, such as state sovereignty and the increasing legal and political dynamics of international investment law. This is the first in-depth treatise on arbitral awards' qualification as investments within international investment law. Its detailed analysis of the

interpretive approaches, their foundation and consequences will, from a theoretical and practical point of view, prove of great value to international tribunals, counsel and sovereign entities. Maximilian Clasmeier has gained international arbitration experience in the dispute resolution practices of international law firms in Frankfurt, Düsseldorf and Singapore and worked for the World Bank Group in Washington, D.C.

**Moral Damages Under International Investment Law** - DOGAN. GULTUTAN  
2021-12-02

International Arbitration Law Library# 62 The much-debated fragmentation of international law, most clearly manifest in the stand-alone nature of the investor-state dispute settlement regime, has produced the unfortunate side effect of an intense focus on material damages at the expense of moral damages. This timely groundbreaking book seeks to remedy the unfairness and injustice that

flows from this difference in treatment by offering a thorough review of the underlying rules and principles of international law relating to moral damages claims, with a view to considering the appropriateness and possibility of convergence of the various sub-disciplines or branches of international law (e.g., international investment law and international human rights law) to preserve and protect the coherence, uniformity and stability of the international legal order. The analysis covers such central issues as the following: who should be entitled to seek moral damages; the legal test to determining moral damages claims, in respect of both substantive and evidential issues; applicability and scope of the theory of corrective justice in moral damages claims; the victim status of natural persons, corporations, and investors' employees in investor-state disputes; quantification of moral damages; what the precise nature of the compensation

ought to be; and role of the theory of law and economics in the context of moral damages claims. Decisions of international human rights courts are examined to assess, by way of comparison, the appropriateness of the stance taken by international investment tribunals. This is the first in-depth treatment of the important question of whether and under which circumstances international investment tribunals should have jurisdiction to award moral damages, as well as the remedies available and the quantification exercise guiding compensation. The analysis will prove invaluable to practitioners and academics eager to enhance their knowledge and understanding of the rules and principles applicable to moral damages claims under international investment law.

*Community Interests Across International Law* - Eyal Benvenisti 2018-05-17

This book explores the extent to which contemporary international law expects states to take into account the interests of others - namely third states or their citizens -

when they form and implement their policies, negotiate agreements, and generally conduct their relations with other states. It systematically considers the various manifestations of what has been described as 'community interests' in many areas regulated by international law and observes how the law has evolved from a legal system based on more or less specific consent and aimed at promoting particular interests of states, to one that is more generally oriented towards collectively protecting common interests and values. Through essays by experts in the field, this book explores topics such as the sources of international law and the institutional aspects of developing the law and covers a range of areas within the law.

*International Investment Law and Comparative Public Law* - Stephan W. Schill 2010-10-14 International investment law is one of fastest-growing areas of international law, but it is plagued by the vagueness of many investors' rights and

unpredictable investment tribunal decisions. This book analyses international investment law through the lens of comparative public law to clarify investment treaty obligations and arbitral procedure.

**International Investment Law** - Guiguo Wang 2014-12-05

Increasing and intensified cross-border economic exchange such as trade and investment is an important feature of globalization. In the past, a distinction could be made between capital importing and exporting countries, or host and home countries for foreign direct investment (FDI). Due to globalization, FDI is presently made by and in both developed and developing countries. Differences in political, economic and legal systems and culture are no longer obstacles for FDI, and to varying degrees the economic development of almost all countries is closely linked with the inflow of FDI. This book conducts critical assessments of aspects of current

international law on FDI, focusing on cases decided by the tribunals of the International Centre for Settlement of Investment Disputes (ICSID) and other tribunals as well as decisions of annulment ad hoc committees of the ICSID. In examining such cases, Guiguo Wang takes into account the Chinese culture and China's practice in the related areas. The book explores topics including: the development and trend of international investment law; unilateral, bilateral and multilateral mechanisms for encouraging and protecting FDIs; determination of qualified investors and investments and consent as conditions for protection; relative and absolute standards of treatment; determination of expropriation in practice; assessment of compensation for expropriation; difficulties in enforcing investment arbitral awards; and alternatives for improving the existing system. The book will be of great use and interest to scholars, practitioners and students of

international investment law and international economic law, Asian law, and Chinese studies.

**Principles of International Economic Law** - Matthias Herdegen 2016-10-06

Principles of International Economic Law provides a comprehensive overview of the central topics in international economic law, with an emphasis on the interplay between the different economic and political interests on both the international and domestic levels. Following recent tendencies, the book sets the classic topics of international economic law, like WTO law, investment protection, commercial law and monetary law in context with aspects of human rights, environmental protection and the legitimate claims of developing countries. The book draws a concise picture of the architecture of international economic law with all its complexities, without getting lost in fragmented details. Providing a perfect introductory text to the field of international economic

law, the book thoroughly analyses legal developments within their wider political, economic, or social context. Topics covered range from codes of conduct for multinational enterprises, to the human rights implications of the exploitation of natural resources. The book demonstrates the economic foundations and economic implications of legal frameworks. It puts into profile the often complex relationship between, on the one hand, international standards on liberalization and economic rationality and, on the other, state sovereignty and national preferences. It describes the new forms of economic cooperation which have developed in recent decades, such as the growing number of transnational companies in the private sector, and forms of cooperation between states such as the G8 or G20. This fully updated second edition covers new aspects and developments including the growing importance of corporate social responsibility,

mega-regional-agreements like CETA, TTIP, and TPP, trade and investment related aspects of human rights law.

Building International Investment Law - Meg Kinnear  
2015-12-22

This volume celebrates the first fifty years of the International Centre for Settlement of Investment Disputes (ICSID) by

presenting the landmark cases that have been decided under its auspices. These cases have addressed every aspect of investment disputes: jurisdictional thresholds; the substantive obligations found in investment treaties, contracts, and legislation; questions of general international law; and a number of novel procedural issues. Each chapter, written by an expert on the chapter's particular focus, looks at an international investment law topic through the lens of one or more of these leading cases, analyzing what the case held, how it has been applied, and its overall significance to the development of international investment law. These topics include: - applicable law; - res judicata in investor-State arbitration; - notion of investment; - investor nationality; - consent to arbitration; - substantive standards of treatment; - consequences of corruption in investor-State arbitration; - State defenses - counter-claims; - assessment of

damages and cost considerations; - ICSID Arbitration Rule 41(5) objections; - mass claims, consolidation and parallel proceedings; - provisional measures; - arbitrator challenges; - transparency and amicus curiae; and - annulment. Because the law of international investment continues to grow in importance in an ever globalizing world, this book is more than a fitting way to mark the past fifty years and to welcome the next fifty years of development. It will prove both educational for practitioners new to the field and informative for seasoned investment lawyers. Moreover, the book itself is a landmark that will be of great value to professionals, scholars and students interested in international investment law.

**International Investment Law** - Arnaud de Nanteuil  
2021-08-10

This comprehensive book provides a complete overview of the international legal system of foreign investment protection. Proposing a simple, practical approach, it examines the problems one might face when studying or practising international investment law, including those arising from contemporary changes and controversies. In this incisive book, Arnaud de Nanteuil synthesises material from treaties, general international law, contracts and case law to demonstrate a coherent system of investment protection, rather than simply describing the law as it currently stands. Through this systematic approach, the book considers

all aspects of the discipline, examining its history, the content of the law, investment arbitration, and its relationship with other areas of international law such as human rights, the environment and EU law. It also discusses answers to questions that remain open in current case law. Providing a thorough and accessible analysis, this book

will be invaluable to both students and academics working in the field of international investment law, as well as practitioners who will appreciate its pragmatic style. Government officials and those working for international organisations in this area will also find its discussion of the possible future evolution of the law insightful.
