Army Support to Security Cooperation (FM 3-22) - Headquarters Department Of The Army 2019-08-14

Field Manual (FM) 3-22 provides doctrine for Army support to Department of Defense security cooperation. It explains how Army forces conduct security cooperation, from theater army through brigade level, including support from Headquarters, Department of the Army, functional Army Service component commands, major commands, and direct reporting units. Army modularity allows commanders to add selective capabilities to assist the brigade as it conducts security cooperation activities. The brigade and any additional augmentation required from higher echelons provide the framework for advisors to function and accomplish the mission- building partner capacity and capability-to achieve the desired end state. This discussion builds on the doctrine in Army Doctrine Publication (ADP) 3-0 and Army Doctrine Reference Publication (ADRP) 3-0, Unified Land Operations.

*Nuclear Strategy in the Twenty-first Century* - Stephen J. Cimbala 2000

Although the Cold War has ended and the Soviet Union is gone, nuclear weapons remain as dangerous artifacts of times past. High-technology non-nuclear weapons, possibly including anti-missile defenses based on new principles, will dominate the battle space in the 21st century. But nuclear weapons will be deemed "useful" by those who oppose the status quo and peace and who cannot afford to race the United States and other "third wave" economies based on information and electronics. Nuclear deterrence and information will have an uneasy and dangerous coexistence. Nuclear weapons may be used by regional rogues to deter power projection and intervention by the United States and its allies. Information will be used to help confuse or defeat United States adversaries armed with weapons of mass destruction.

**Women and War in the 21st Century: A Country-by-Country Guide** - Margaret D. Sankey 2018-08-17

Twenty-three countries currently allow women to serve in front-line combat positions and others with a high likelihood of direct enemy contact. This book examines how these decisions did or did not evolve in 47 countries. • Delineates the ways in which women are incorporated into national militaries in the both the United States and countries around the world • Offers in each entry the distinct national context in which countries have decided to employ women in warfare • Reveals how different nations choose

to include or exclude women from the military, providing key insight into each nation's values and priorities • Examines how governments treat women serving in combat: battlefield experience can "earn" a woman citizenship or be cause for shunning her, depending on the state *The U.S. Army/Marine Corps Counterinsurgency Field Manual* - John A. United States Army 2008-09-15

When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. **Cross-Domain Deterrence** - Erik Gartzke  
2019-02-01

The complexity of the twenty-first century threat landscape contrasts markedly with the bilateral nuclear bargaining context envisioned by classical deterrence theory. Nuclear and conventional arsenals continue to develop alongside anti-satellite programs, autonomous robotics or drones, cyber operations,

biotechnology, and other innovations barely imagined in the early nuclear age. The concept of cross-domain deterrence (CDD) emerged near the end of the George W. Bush administration as policymakers and commanders confronted emerging threats to vital military systems in space and cyberspace. The Pentagon now recognizes five operational environments or so-called domains (land, sea, air, space, and cyberspace), and CDD poses serious problems in practice. In *Cross-Domain Deterrence*, Erik Gartzke and Jon R. Lindsay assess the theoretical relevance of CDD for the field of International Relations. As a general concept, CDD posits that how actors choose to deter affects the quality of the deterrence they achieve. Contributors to this volume include senior and junior scholars and national security practitioners. Their chapters probe the analytical utility of CDD by examining how differences across, and combinations of, different military and non-military instruments can affect choices and outcomes in coercive policy in historical and contemporary cases.

**The U.S. Army Operating Concept** - U.S. Army Training and Doctrine Command 2014-10-09  
This book describes how future Army forces, as part of joint, interorganizational, and multinational efforts, operate to accomplish campaign objectives and protect U.S. national interests. It describes the Army's contribution to globally integrated operations, and addresses the need for Army forces to provide foundational capabilities for the Joint Force and to project power onto land and from land across the air, maritime, space, and cyberspace domains. *The Shield and the Cloak* - Gary Hart 2006-02-16

Outlines the fundamental changes with which America must grapple when confronting a terrorist threat that has no state and no geographic homebase. This book argues for a security of the commons, emphasizing that the security requires a shield for the homeland as well as a cloak of non-military security, including security of income, and community.

Short of General War - Harry Richard Yarger 2010

At the end of the first decade of the 21st century, the United States is involved in two ongoing wars, faces a significant international terrorist threat, and is witnessing an escalation of international resistance to its leadership of the global world order. Looking out to 2025, many see the potential for a prolonged period of instability as a result of competing economic models, demographics, the rise of new international actors and the resurgence old ones, climate change, and the scarcity of resources. The range of stability challenges will stretch the capabilities of any military force structure and require innovative thinking on the part of policymakers and military professionals alike on the appropriate development and use of the military element of power. In this anthology, 16 students of the U.S. Army War College Class of 2008 offer their perspectives on the use of military power across the spectrum of conflict in the 21st century, short of or following general war, and provide insights into the necessary force structure, policy, strategy, and doctrinal approaches for future success. Beyond a focus on operations short of general war, these writings share in common a worthwhile idea or set of ideas that can materially contribute to how the U.S. military can best conduct full spectrum operations. Collectively, these essays reveal the innovative thinking and diversity and depth of thought of the U.S. and foreign military and civilian agency personnel that comprise each student body at the U.S. Army War College as they prepare themselves to become senior leaders and fulfill their roles in their militaries or

agencies. This resource offers 16 students of the U.S. Army War College Class of 2008 perspectives and forecasts for the use of military power through year 2025. Scholars and policymakers, alike, may find these essays beneficial for long-term strategy planning. **Road Map for National Security** - United States Commission on National Security/21st Century 2001

"After our examination of the new strategic environment of the next quarter century (Phase I) and of a strategy to address it (Phase II), this Commission concludes that significant changes must be made in the structures and processes of the U.S. national security apparatus. Our institutional base is in decline and must be rebuilt. Otherwise, the United States risks losing its global influence and critical leadership role. We offer recommendations for organizational change in five key areas: ensuring the security of the American homeland; recapitalizing America's strengths in science and education; redesigning key institutions of the Executive Branch; overhauling the U.S. government's military and civilian personnel systems; and reorganizing Congress's role in national security affairs"-- Page xiii.

*Spying Blind* - Amy B. Zegart 2007

In this pathbreaking book, Amy Zegart provides the first scholarly examination of the intelligence failures that preceded September 11. Until now, those failures have been attributed largely to individual mistakes. But Zegart shows how and why the intelligence system itself left us vulnerable. Zegart argues that after the Cold War ended, the CIA and FBI failed to adapt to the rise of terrorism. She makes the case by conducting painstaking analysis of more than three hundred intelligence reform recommendations and tracing the history of CIA and FBI counterterrorism efforts from 1991 to 2001, drawing extensively from declassified government documents and interviews with more than seventy high-ranking government officials. She finds that political leaders were well aware of the emerging terrorist danger and the urgent need for intelligence reform, but failed to achieve the changes they sought. The same forces that have stymied intelligence reform for decades are to blame: resistance inside U.S. intelligence agencies, the rational interests of politicians and career bureaucrats, and core aspects of our democracy such as the fragmented structure of the federal government. Ultimately failures of adaptation led to failures of performance. Zegart reveals how longstanding organizational weaknesses left unaddressed during the 1990s prevented the CIA and FBI from capitalizing on twenty-three opportunities to disrupt the September 11 plot. *Spying Blind* is a sobering account of why two of America's most important intelligence agencies failed to adjust to new threats after the Cold War, and why they are unlikely to adapt in the future.

*The Armed Forces Officer* - Richard Moody Swain 2017

In 1950, when he commissioned the first edition of *The Armed Forces Officer*, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new

edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution. *A Review of FBI Security Programs* - United States. ### **A Tenth-Century Byzantine Military Manual: The Sylloge Tacticorum** - 2017-07-14

*The Sylloge Tacticorum* is a mid-Byzantine example of the literary genre of military manuals or *Taktika* which stretches back to antiquity. It was one of a number produced during the tenth century CE, a period when the Byzantine empire enjoyed a large measure of success in its wars against its traditional enemy, the Arabs. Compiled to record and preserve military strategies, know-how, and tactics, the manual discusses a wide variety of matters: battle formations, raids, sieges, ambushes, surprise attacks, the treatment of prisoners of war and defectors, distribution of booty, punishment of military offences, how to mount effective

espionage, and how to send and receive envoys. There is even advice on the personal qualities required by generals, on how to neutralize enemy horses, and on how to protect the troops against poisoned food. The work culminates in an account of the stratagems employed by great Greek and Roman military commanders of the past. While, like so much of Byzantine literature, the *Sylloge* often simply reproduces material found in earlier texts, it also preserves a great deal of information about the military tactics being developed by the Byzantine army during the tenth century. It is the first Byzantine source to record the reappearance of a specialized heavy cavalry (the *kataphraktoi*) and of a specialized infantry (the *menavlatoi*) used to repel the attacks of the opposing heavy cavalry. There is also a great deal of information on new infantry and cavalry formations and on the new tactics that required them. This is the first complete translation of the *Sylloge* into English. It is accompanied by a glossary of the specialised Greek military vocabulary used in the work and by footnotes which explain obscure references and identify the author's classical and Byzantine sources. An introduction places the work in its historical and literary context and considers some of the questions that have remained unanswered over the centuries, such as its authorship and the date of its composition.

**Not an Idea We Have to Shun** - Institute for National Strategic Studies 2014-12-14

China's expanding international economic interests are likely to generate increasing demands for its navy, the People's Liberation Army Navy (PLAN), to operate out of area to protect Chinese citizens, investments, and sea lines of communication. The frequency, intensity, type, and location of such operations will determine the associated logistics support requirements, with distance from China, size and duration, and combat intensity being especially important drivers. How will the PLAN employ overseas bases and facilities to support these expanding operational requirements? The assessment in this book is based on Chinese writings, comments by Chinese military officers and analysts, observations of PLAN operational patterns, analysis of the overseas military logistics models other countries have employed, and interviews with military logisticians. China's rapidly expanding international interests are likely to produce a parallel expansion of PLAN operations, which would make the current PLAN tactic, exclusive reliance on commercial port access, untenable due to cost and capacity factors. This would certainly be true if China contemplated engaging in higher intensity combat operations. This book considers six logistics models that might support expanded PLAN overseas operations: the Pit Stop Model,

Lean Colonial Model, Dual Use Logistics Facility, String of Pearls Model, Warehouse Model, and Model USA. Each model is analyzed in terms of its ability to support likely future naval missions to advance China's expanding overseas economic, political, and security interests and in light of longstanding Chinese foreign policy principles. This analysis concludes that the Dual Use Logistics Facility and String of Pearls models most closely align with China's foreign policy principles and expanding global interests. To assess which alternative China is likely to pursue, the book reviews current PLAN operational patterns in its Gulf of Aden counterpiracy operations to assess whether the PLAN is currently pursuing one model over the other and to provide clues about Chinese motives and potential future trajectories. To ensure that this study does not suffer from faulty assumptions, it also explicitly examines the strategic logic that Western analysts associate with the String of Pearls Model in light of the naval forces and logistics infrastructure that would be necessary to support PLAN major combat operations in the Indian Ocean. Both the contrasting inductive and deductive analytic approaches support the conclusion that China appears to be planning for a relatively modest set of missions to support its overseas interests, not building a covert logistics infrastructure to fight the United States or India in the Indian Ocean.
