Cengage Advantage Books: Psychology -
James S. Nairne 2012-12-28
Straightforward and written in a friendly style,
James S. Nairne's PSYCHOLOGY, Sixth Edition,

uses a proven problem-solving approach to help you discover how to apply psychology to your everyday life. Dr. Nairne introduces topics by focusing on the "why" behind psychological

processes before introducing what they are and how they work. You'll learn that our brains are filled with psychological "tools" that control everything from emotion to memory, and that each helps us adapt and solve important everyday problems. Nairne describes these tools, shows you how they're used, and focuses on specific situations in which they are applied. Emphasizing critical thinking and active learning, *PSYCHOLOGY, Sixth Edition*, provides current, comprehensive, and practical coverage that you can immediately put to good use.

Pioneers in Neuroendocrinology - Joseph Meites 2012-12-06

In the middle and late 1960s, when it was clear that neuroendocrinology was established as a discipline in its own right, it occurred to us that autobiographical accounts of the pioneer work in this field by the major participants would provide a highly interesting and informative account of his story in the making. With the death of G. W. Harris in late 1971, and the loss thereby

of an outstanding pioneer and personality in neuroendocrinology, it appeared to us to be even more urgent to undertake such a venture and collect as many stories as possible. The three of us agreed that initially we would limit our invitations to the senior investigators whose research careers lay mostly behind them, with the hope that if this venture proved successful, we could ask younger and still very active researchers in neuroendocrinology to contribute to a subsequent volume. Most of those invited to write for this book agreed to do so, but regrettably there remain some notable absentees. The authors were requested to write a personal, and even idiosyncratic, account of the steps taken, and the motivation and drive that led them to develop their interest in the relationship between the brain and the endocrine system.

Tell Me to Go - Charlotte Byrd 2019-09-03
His offer: 365 days and nights = \$1 million
My addendum: I'm not doing that
His promise:

Before the year is up, you'll beg for it My days of lying and stealing are over, but then Nicholas Crawford makes me an offer I can't refuse. Spend a year pretending to be his significant other in exchange for \$1 million dollars. I tried to put that part of my life, and those hard-won skills, behind me. But I need the money. He needs a partner. I told him that I'd never sleep with him. He promised me that I would end up begging for it. Now, I want him more than ever. Especially when I run my fingers over his chiseled body and he teases me with his tongue. Especially when he puts his hands on the small of my back and kisses me. I want him so much I am going to scream. I want him so much...I might even beg.

What readers are saying about Charlotte Byrd: "Extremely captivating, sexy, steamy, intriguing, and intense!" "Addictive and impossible to put down." "I can't get enough of the turmoil, lust, love, drama and secrets!"

"Fast-paced romantic suspense filled twists and turns, danger, betrayal and so much more." "Decadent, delicious, & dangerously addictive!"

Integrating Information Technology Into the Teacher Education Curriculum - Nancy Wentworth 2004

While there are books that address the integration of technology into teaching curricula, very few address the process for teacher education faculty and the systemic reform of a teacher education program. Integrating

Information Technology into the Teacher Education Curriculum: Process and Products of Change provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum. It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating. It describes the creation of Design Teams at Brigham Young University's McKay School of Education (funded by a PT3 grant) and how these teams worked to successfully reconfigure the school's teacher preparation curricula.

New Frontiers in Science and Technology Studies - Steve Fuller 2007-10

Steve Fuller has a reputation for setting the terms of debate within science and technology studies. In his latest book, *New Frontiers in Science and Technology Studies* he charts the debates likely to be of relevance in the coming years. Should science and technology be treated

as separate entities? What impact has globalization had on science and technology? Can science be clearly distinguished from other forms of knowledge? Does the politicization of science really matter? Is there a role for the social regulation of scientific inquiry? Should we be worried about research fraud? These questions are explored by examining an array of historical, philosophical and contemporary sources. Attention is paid, for example, to the Bruno Latour's *The Politics of Nature* as a model for science policy, as well as the global controversy surrounding Bjorn Lomborg's *The Sceptical Environmentalist*, which led to the dismantling and re-establishment of the Danish national research ethics board. *New Frontiers in Science and Technology Studies* will appeal strongly to scholars and advanced undergraduate and graduate students in courses concerned with the social dimensions of science and technology, and anyone who cares about the future of science.
