How many words do we use when we speak? According to some publications, while a two-year-old baby uses around two hundred words, a beginner in any language needs around two thousand to communicate. And an expert user can employ up to forty thousand! But knowing words and their meanings is hardly enough. If you want to learn Spanish to actually use it, be it for traveling, working or studying, you need to really master your vocabulary: you need to know synonyms, you need to know which prepositions are used next to which verbs and how words change their meaning in different contexts. In this book, we offer a comprehensive list of the 3.000 most frequent words of the Spanish language, according to the Real Academia Española, Spain's official royal institution dedicated to the Spanish language. We did not just include the words and their meanings, but also eventual indications for you to understand the use of the word since translations are otherwise incomplete. For example, we indicate

if it's a masculine or feminine word, if it's a plural word and if it belongs to a verbal tense that does not translate literally into English. Additionally, we indicate if the word has more than one meaning so you can avoid confusion. And, of course, for each word we include a practical example, a sentence that in a few words tells a story and helps you understand how the word is used in the real Spanish-speaking world. By the time you're finished with this book, your vocabulary will be comparably better, richer, and wider. Ready to give it a go? Start right away! You'll feel the difference... and everyone else will notice too! Scroll up and click the "add to cart" button now to get started!

Research into lexical issues has been one of the most rapidly growing areas of second language acquisition studies in recent years, and understandably so: the importance of vocabulary can hardly be denied. Words are the key to every instance of communication, both spoken and written. This volume concentrates on vocabulary in written language, mostly in academic settings. The writers of the chapters come from different countries and universities, and, naturally, represent their own academic backgrounds, though they all share a common interest in investigating the characteristics of L2 lexis as it manifests itself in the written production of students at various stages of their language learning careers. The target language (L2) in the studies reported in the volume is English, except

in one study on the lexical competence of multilingual learners of French. The subjects' native languages include Czech, Danish, Finnish, Hungarian, and Swedish, thus representing several different language families. Each chapter constitutes an independent unit, but together the studies reported in them give the reader a varied and extensive picture of lexical issues in L2 writing. The authors approach their topics from different perspectives and use diverse research methods, adding to the multifaceted nature of the volume. The book will be of interest to researchers, educators and students of second language acquisition and applied linguistics.
