Mere Apologetics - Alister E. McGrath
2012-01-01

Throughout history there have been great and articulate defenders of the faith, from Augustine and Aquinas to Jonathan Edwards, G. K. Chesterton, Francis Schaeffer, and C. S. Lewis. But with new challenges comes the need for a fresh apologetic that specifically addresses the arguments levied against faith in our time of scientific atheism and skepticism. In the spirit of C. S. Lewis's *Mere Christianity*, Alister McGrath's *Mere Apologetics* seeks to equip readers to engage gracefully and intelligently with the challenges facing the faith today while drawing appropriately on the wisdom of the past. Rather than supplying the fine detail of every apologetic issue in order to win arguments, *Mere Apologetics* teaches a method that appeals not only to the mind but also to the heart and the imagination. This highly accessible, easy-to-read book is perfect for pastors, teachers, students, and lay people who want to speak clearly and lovingly to the issues that confront people of faith today.

The Landscape of Faith - Alister McGrath
2018-02-15

At Oxford University in the 1970s, Alister McGrath faced a crisis when he realized that his scientific atheism made less sense of reality than the 'big picture' offered by Christianity. A reluctant convert, he was astonished by the delight he found in exploring a previously unknown world of ideas. Crucial to his understanding have been the Christian Creeds, which he regards as maps to the landscape of faith. His hope in this volume is that we too may grasp comprehensively the treasure to which they point: the living God, who is the ground of our existence; Jesus Christ who journeys with us; the Holy Spirit who offers us reassurance and affirmation on the way. Drawing on the theology of popular writers like C. S. Lewis, G. K. Chesterton and Dorothy L. Sayers, and full of stories and illustrations, this vivid portrayal of the imaginative power and vision of Christianity will prove invaluable to clergy, church leaders, theological students - and all who long to expand their understanding and love of God.

Christian Theology - Alister E. McGrath 2003-08
This book gives an accessible account of classical Greek history, from the aftermath of the Persian Wars in 478 bc to the death of Alexander the Great in 323 bc. The author describes the years which witnessed the flourishing of democracy in Athens; the

establishment of the Athenian empire; the Peloponnesian war, which involved the whole Greek world; the development of Macedonian power under Philip II; and the conquests of Alexander the Great. His account combines narrative with analysis, and deals with major social, economic and cultural developments as well as political and military events. Rhodes details the evidence on which his narrative is based, which includes inscriptions, coins and material remains, and outlines the considerations which have to be borne in mind in using this evidence."

What's the Least I Can Believe and Still Be a Christian? New Edition with Study Guide -

Martin Thielen 2013-02-13

Pastor and author Martin Thielen has compiled a list of ten things people need to believe, and ten things they don't, in order to be a Christian. This lively and engaging book will be a help to seekers as well as a comfort to believers who may find themselves questioning some of the assumptions they grew up with. With an accessible, storytelling style that's grounded in solid biblical scholarship, Thielen shows how Christians don't need to believe that sinners will be "left behind" to burn in hell or that it's heresy to believe in evolution. And while we must always take the Bible seriously, we don't always have to take it literally. At the same time, Christians do need to believe in Jesus--his life, his teachings, his death and resurrection, and his vision for the world. A great benefit of those beliefs is that they provide promising answers to life's most profound questions, including: Where is God? What matters most? What brings fulfillment? What about suffering? Is there hope? Thielen articulates centrist, mainline Christianity in a way that's fresh and easy to understand, and offers authentic Christian insights that speak to our deepest needs. This new edition includes a leader's guide, previously only available online, and a new introduction from the author that reflects on the book's reception. The leader's guide features unique and easily implemented aids for carrying out a seven-week, congregation-wide initiative that will help local

churches reach out to their communities. More information is available at thielen.wjkbooks.com.

The Genesis of Doctrine - Alister E. McGrath
1997

Alister E. McGrath begins his book by critically engaging the views of George Lindbeck on doctrine before moving on to present a fresh understanding of the nature and function of Christian doctrine within the church. Particular attention is paid to the way in which doctrine acts as a demarcator between communities of faith, providing important insights into contemporary ecumenical debates. McGrath also explores the crucial issue of the authority of the past in Christian theology, focusing especially on how doctrine serves to maintain continuity within the Christian tradition. The Genesis of Doctrine represents an exploration of a "middle way" in relation to the significance of Christian doctrine, rejecting both those approaches that insist on the uncritical repetition of the doctrinal heritage of the past and those that disallow the authority of past doctrinal formulations. The book concludes by considering whether doctrine has a future within the church, answering this question in the affirmative on the basis of a number of important theological and cultural considerations.

The Territories of Human Reason - Alister E. McGrath
2019-01-03

Our understanding of human rationality has changed significantly since the beginning of the century, with growing emphasis being placed on multiple rationalities, each adapted to the specific tasks of communities of practice. We may think of the world as an ontological unity-but we use a plurality of methods to investigate and represent this world. This development has called into question both the appeal to a universal rationality, characteristic of the Enlightenment, and also the simple 'modern-postmodern' binary. The Territories of Human Reason is the first major study to explore the emergence of multiple situated rationalities. It focuses on the relation of the natural sciences and Christian theology, but its approach can easily be extended to other disciplines. It provides a robust intellectual framework for discussion of transdisciplinarity, which has become a major theme in many parts of the academic world. Alister E. McGrath offers a

major reappraisal of what it means to be 'rational' which will have significant impact on older discussions of this theme. He sets out to explore the consequences of the seemingly inexorable move away from the notion of a single universal rationality towards a plurality of cultural and domain-specific methodologies and rationalities. What does this mean for the natural sciences? For the philosophy of science? For Christian theology? And for the interdisciplinary field of science and religion? How can a single individual hold together scientific and religious ideas, when these arise from quite different rational approaches? This groundbreaking volume sets out to engage these questions and will provoke intense discussion and debate.

Shaping a Global Theological Mind - Asst Prof Darren C Marks 2013-05-28

This work focuses on the shift of Christian theological thinking from the North Atlantic to the Global South, even within the North Atlantic Church and Academy. It gives a Global perspective on theological work, method and context. Theologians from North America, Great Britain and Europe, Africa, Asia, Central and South America comment on how their specific context and methodology manifests, organizes and is prioritized in their thought so as to make Christian theology relevant to their community. By placing the Global South alongside the newly emerging presence of non-traditional Western forms such as Pentecostal, Aboriginal, and Hispanic theologies and theologians a clearer picture of how Christian theology is both enculturated and still familial is offered.
