The Russian Conquest of Central Asia - Alexander Morrison 2020-12-10

A comprehensive diplomatic and military history of the Russian conquest of Central Asia, spanning the whole of the nineteenth century. We God's People - Jocelyne Cesari 2021-12-16 Cesari argues that both religious and national communities are defined by the three Bs: belief, behaviour and belonging. By focusing on the ways in which these three Bs intersect, overlap or clash, she identifies the patterns of the politicization of religion, and vice versa, in any given context. Her approach has four advantages: firstly, it combines an exploration of institutional and ideational changes across time, which are usually separated by disciplinary boundaries. Secondly, it illustrates the heuristic value of combining qualitative and quantitative methods by statistically testing the validity of the patterns identified in the qualitative historical phase of the research. Thirdly, it avoids reducing religion to beliefs by investigating the significance of the institution-ideas connections, and fourthly, it broadens the political approach beyond state-religion relations to take into account actions and ideas conveyed in other arenas such as education, welfare, and culture.

Crisis in the Muslim Mind - AbdulHamid AbuSulayman 2004-01-01

Across the Muslim world today, if anything is self-evident across the Muslim world today it is that the Ummah is badly in need of reform. On this point it can be stated with confidence that Muslims are agreed. Poverty and injustice characterize the face of Muslim lands from the Atlantic to the Pacific. Pollution and corruption are the order of the day in the societies where the gulf between them and the developed countries of the world has never been wider. Politics in the Muslim world are all too often the politics of deprivation, and culture the culture of despair. "Crisis in the Muslim Mind" examines the intellectual and historical roots of the malaise that has encompassed the Ummah and threatens to efface its identity. First published in Arabic in 1991, this important work (in an abridged English translation) is designed to familiarize educated and concerned Muslims with the nature of the crisis confronting them, and to suggest the steps necessary to overcome it.

[A Little History of the World](#) - E. H. Gombrich
2014-10-01

E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

The Formation of Islam - Jonathan P. Berkey
2003

Jonathan Berkey's 2003 book surveys the religious history of the peoples of the Near East from roughly 600 to 1800 CE. The opening chapter examines the religious scene in the Near East in late antiquity, and the religious traditions which preceded Islam. Subsequent chapters investigate Islam's first century and the beginnings of its own traditions, the 'classical' period from the accession of the Abbasids to the rise of the Buyid amirs, and thereafter the emergence of new forms of Islam in the middle period. Throughout, close attention is paid to the experiences of Jews and Christians, as well as Muslims. The book stresses that Islam did not appear all at once, but emerged slowly, as part of a prolonged process whereby it was differentiated from other religious traditions and, indeed, that much that we take as characteristic of Islam is in fact the product of the medieval period.

On the Muslim Question - Anne Norton
2020-01-21

Why “the Muslim question” is really about the West and its own anxieties—not Islam In this fearless, original book, Anne Norton demolishes the notion that there is a “clash of civilizations” between the West and Islam. What is really in question, she argues, is the West’s commitment to its own ideals: to democracy and the Enlightenment trinity of liberty, equality, and fraternity. In the most fundamental sense, the Muslim question is about the values not of Islamic, but of Western, civilization.

[The Sum of All Heresies](#) - Frederick Quinn 2008

The Mongols and the Islamic World - Peter Jackson 2017-04-04

An epic historical consideration of the Mongol conquest of Western Asia and the spread of Islam during the years of non-Muslim rule. The Mongol conquest of the Islamic world began in the early thirteenth century when Genghis Khan and his warriors overran Central Asia and devastated much of Iran. Distinguished historian Peter Jackson offers a fresh and fascinating consideration of the years of infidel Mongol rule in Western Asia, drawing from an impressive array of primary sources as well as modern studies to demonstrate how Islam not only survived the savagery of the conquest, but spread throughout the empire. This unmatched study goes beyond the well-documented Mongol campaigns of massacre and devastation to explore different aspects of an immense imperial event that encompassed what is now Iran, Iraq, Turkey, and Afghanistan, as well as Central Asia and parts of eastern Europe. It examines in depth the cultural consequences for the incorporated Islamic lands, the Muslim experience of Mongol sovereignty, and the conquerors' eventual conversion to Islam.

The Individual and Society in Islam -

Abdelwahab Bouhdiba 1998-01-01

This volume, the first of six to be published, studies fundamental values of Islam, along with the nature of rights and the responsibilities in a general context. The authors analyse the development of social thought and morality in Islam, and ways in which they are enforced through the family and education. Particular attention is paid to the status of women, children, youth and the socially excluded. Several chapters broach specially Islamic approaches to economics, government and justice. A world religion since its inception in the seventh century A.D., Islam is today seeking vigorous answers to contemporary problems through its multi-faceted history. Issues of poverty and wealth, inequality and demands for political expression, and respect for diversity in a difficult world of conformity are dealt with in this series. The study is organized along thematic rather than chronological lines and thus it is not necessary to read the volumes in order. Volume II is in fact the first to have been published. Volume IV is forthcoming end 2002, volume V mid 2003 and volumes III and VI in 2004. This volume, the first of six to be published, studies fundamental values of Islam, along with the nature of rights and the responsibilities in a general context. A History of Muslims, Christians, and Jews in the Middle East - Heather J. Sharkey 2017-04-03

Across centuries, the Islamic Middle East hosted large populations of Christians and Jews in addition to Muslims. Today, this diversity is mostly absent. In this book, Heather J. Sharkey examines the history that Muslims, Christians, and Jews once shared against the shifting backdrop of state policies. Focusing on the Ottoman Middle East before World War I, Sharkey offers a vivid and lively analysis of everyday social contacts, dress, music, food, bathing, and more, as they brought people together or pushed them apart. Historically, Islamic traditions of statecraft and law, which the Ottoman Empire maintained and adapted, treated Christians and Jews as protected subordinates to Muslims while prescribing limits to social mixing. Sharkey shows how, amid the pivotal changes of the modern era, efforts to simultaneously preserve and dismantle these hierarchies heightened tensions along religious lines and set the stage for the twentieth-century Middle East.

Islamic Imperialism - Efraim Karsh 2007-01-01
From the first Arab-Islamic Empire of the mid-seventh century to the Ottomans, the last great Muslim empire, the story of the Middle East has been the story of the rise and fall of universal empires and, no less important, of imperialist dreams. So argues Efraim Karsh in this highly provocative book. Rejecting the conventional Western interpretation of Middle Eastern history as an offshoot of global power politics, Karsh contends that the region's experience is the culmination of long-existing indigenous trends, passions, and patterns of behavior, and that foremost among these is Islam's millenarian imperial tradition. The author explores the history of Islam's imperialism and the persistence of the Ottoman imperialist dream that outlasted World War I to haunt Islamic and Middle Eastern politics to the present day. September 11 can be seen as simply the latest expression of this dream, and such attacks have little to do with U.S. international behavior or policy in the Middle East, says Karsh. The House of Islam's war for world mastery is traditional, indeed venerable, and it is a quest that is far from over.

Islam has been one of the most powerful religious, social and political forces in history. Over the last 1400 years, from origins in Arabia, a succession of Muslim polities and later empires expanded to control territories and peoples that ultimately stretched from southern France to East Africa and South East Asia. Yet many of the contributions of Muslim thinkers, scientists and theologians, not to mention rulers, statesmen and soldiers, have been occluded. This book rescues from oblivion and neglect some of these personalities and institutions while offering the reader a new narrative of this lost Islamic history. The Umayyads, Abbasids, and Ottomans feature in the story, as do Muslim Spain, the savannah kingdoms of West Africa and the Mughal Empire, along with the later European colonization of Muslim lands and the development of modern nation-states in the Muslim world. Throughout, the impact of Islamic belief on scientific advancement, social structures, and cultural development is given due prominence, and the text is complemented by portraits of key personalities, inventions and little known historical nuggets. The history of Islam and of the world's Muslims brings together diverse peoples, geographies and states, all interwoven into one narrative that begins with Muhammad and continues to this day.

In The Shadow Of The Sword - Tom Holland 2012-04-05

In this 'thrilling. . .profoundly important book'

(Christopher Hart, Sunday Times) and Sunday Times Top Ten Bestseller, the acclaimed author of *Rubicon* gives a panoramic and timely account of the rise of Islam. In the 6th century AD, the Near East was divided between two great empires: the Persian and the Roman. A hundred years on, and one had vanished for ever, while the other was a dismembered, bleeding trunk. In their place, a new superpower had arisen: the empire of the Arabs. So profound was this upheaval that it spelled, in effect, the end of the ancient world. But the changes that marked the period were more than merely political or even cultural: there was also a transformation of human society with incalculable consequences for the future. Today, over half the world's population subscribes to one of the various religions that took on something like their final form during the last centuries of antiquity. Wherever men or women are inspired by belief in a single god to think or behave in a certain way, they bear witness to the abiding impact of this extraordinary, convulsive age - though as Tom Holland demonstrates, much of what Jews, Christians and Muslims believe about the origins of their religion is open to debate. In *The Shadow of the Sword* explores how a succession of great empires came to identify themselves with a new and revolutionary understanding of the divine. It is a story vivid with drama, horror and startling achievement, and stars many of the most remarkable rulers ever seen. 'A compelling detective story of the highest order, *In the Shadow of the Sword* is also a dazzlingly colourful journey into the world of late antiquity. Every bit as thrilling a narrative history as Holland's previous works, *In the Shadow of the Sword* is also a profoundly important book. It makes public and popular what scholarship has been discovering for several decades now; and those discoveries suggest a wholesale revision of where Islam came from and what it is' (Christopher Hart, Sunday Times)

Widely reviled as a religious fanatic who sought to violently oppress Hindus, he is even blamed by some for setting into motion conflicts that would result in the creation of a separate Muslim state in South Asia. In her lively overview of his life and influence, Audrey Truschke offers a clear-eyed perspective on the public debate over Aurangzeb and makes the case for why his often-

maligned legacy deserves to be reassessed. Aurangzeb was arguably the most powerful and wealthiest ruler of his day. His nearly 50-year reign (1658–1707) had a profound influence on the political landscape of early modern India, and his legacy—real and imagined—continues to loom large in India and Pakistan today. Truschke evaluates Aurangzeb not by modern standards but according to the traditions and values of his own time, painting a picture of Aurangzeb as a complex figure whose relationship to Islam was dynamic, strategic, and sometimes contradictory. This book invites students of South Asian history and religion into the world of the Mughal Empire, framing the contemporary debate on Aurangzeb's impact and legacy in accessible and engaging terms.

Indian Muslims - Vashi Sharma 2017-05-31

A typical Indian Muslim is raised based on two theories from childhood. Either he is raised as an Arab//Central Asian/Afghan who conquered India and ruled it for a thousand years. Or as the progeny of those 'enlightened' souls who embraced Islam leaving behind the 'darkness' of idolatry- Hinduism. However, deep within, they know the real story of the most bloodiest chapter of human history - the Islamic conquest of Indian subcontinent which killed, raped and converted their ancestors to Islam. This book presents the story of undeniable mass killing, rapes and conversions of Hindus of Indian subcontinent whose children are now known as Indian (and Pakistani/Bangladeshi) Muslims. This book is a message of unity. Mother India is torn between its two children - Hindus and Muslims who were one once. It is the call to brave, accept your roots. Find your lost mother. Find your lost brothers.

Invaders and Infidels (Book 1) - Sandeep Balakrishna 2020-11-28

The Islamic conquest of India is probably the bloodiest story in history. It is a discouraging tale, for its evident moral is that civilisation is a precious good, whose delicate complex of order and freedom, culture and peace can at any moment be overthrown by barbarians invading from without or multiplying within. ~Will Durant, American historian *Invaders and Infidels: From Sindh to Delhi: The 500-Year Journey of Islamic Invasions* is a work of gripping history, which tells the story of the

origins and trajectory of Islamic invasions into India. It begins with the first Muslim conquest and ends with Babur's invasion of Hindustan, spanning the period of the Delhi Sultanate which was in power for almost 320 years. This epochal story encompasses a vast sweep of events, which changed the history of India forever, and introduced it to an alien faith and a religious despotism such as the country had never experienced before. It comprises major and minor sagas of great heroism, untold savagery, stout resistance, brutal intrigues and epic tragedies. Embedded in this narrative are two major themes, largely overlooked in the inherited Indian historical and cultural memory. For more than three hundred years, alien Muslim invasions into India were largely fleeting, transitory and unstable. However, the lasting legacy of these Muslim invasions is the permanent destruction and disappearance of Classical India. Invaders and Infidels will fascinate anyone interested in the story of pre-Medieval India, a gateway era in the history of this ancient culture and civilisation.

A Brief History of Islam in Europe - Maurits Berger 2014

This book presents an overall presentation and discussion of developments ever since Islam appeared on the European stage thirteen centuries ago. The events and stories presented increase the understanding of present debates on, and notions of, Islam and Muslims in Europe. This book shows that in the course of thirteen centuries the Muslim as well as Islam have undergone many metamorphoses. The Muslim has entered the European stage as a conqueror, antichrist, scholar, benign ruler, corsair, tradesman and fellow citizen. The image of Islam has meandered accordingly, as a religion that was feared as an enemy or embraced as a partner against heretical Christians, despised as an abomination or admired as a civilization, and studied for missionary, academic, colonial or security purpose.

Muslims of Medieval Latin Christendom, c.1050-1614 - Brian A. Catlos 2014-03-20

Through crusades and expulsions, Muslim communities survived for over 500 years, thriving in medieval Europe. This comprehensive study explores how the presence of Islamic minorities transformed Europe in everything from architecture to cooking, literature to science, and served as a stimulus for Christian society to define itself. Combining a series of regional studies, Catlos compares the varied experiences of Muslims across Iberia, southern Italy, the Crusader Kingdoms and Hungary to examine those ideologies that informed their experiences, their place in society and their sense of themselves as Muslims. This is a pioneering new narrative of the history of medieval and early modern Europe from the perspective of Islamic minorities; one which is not, as we might first assume, driven by ideology, isolation and decline, but instead one in which successful communities persisted because they remained actively integrated within the larger Christian and Jewish societies in which they lived.

Negationism in India - Koenraad Elst 1992

Lost Enlightenment - S. Frederick Starr 2015-06-02

The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring

legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. *Lost Enlightenment* recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. *Lost Enlightenment* chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.
