Ethics: Economics, & Politics - I. M. D. Little 2002-10-03

This book studies the interfaces of ethics, economics, and politics. Public policy issues involve all three of these subjects. Although it may be seen as suggesting the nucleus of a joint university course, the book is accessible to and should interest all those concerned with political decisions. Any such decision needs a criterion for judging whether one action or outcome is better than another. Even a dictator must to some extent be concerned about the economic welfare of the citizens; and a democratic government more so. But how is a person's economic welfare to be judged? Furthermore, any political decision affects the economic welfare of different people differently. How then is the welfare of a community to be judged? This is an ethical question. Underlying any coherent public policy there must be a relevant moral code.

**Foreign Aid in the Middle East** - Beáta Paragi 2019-02-28

What do we mean by 'gifts' in International Relations? Can foreign aid be conceptualized as a gift? Most foreign aid transactions are unilateral and financially unreciprocated, yet donors expect to benefit from them. Previous research dealing with foreign aid has analyzed the main donor motives and interests in providing financial support. This book offers an in-depth analysis of the invisible political or social 'exchange' taking place between recipient countries and donors when a grant agreement is signed. Focusing on Egypt, Jordan, Palestine and Israel -

the main beneficiaries of Western foreign aid - the book uses gift theories and theories of social exchange to show how international social bonds are shaped by foreign aid and in what ways recipient countries are obliged to return the 'gift' they receive. Foreign aid is a means of buying 'stability' or 'democracy' in the region but Beata Paragi is interested here to understand the actual feasibility of Western assistance. Looking at the context of the Arab Spring, the book examines how aid impacts on a recipient country's domestic political events such as war, the quest for self-determination, the struggle against occupation and the fight for dignity. An original contribution to Middle East Studies and International Relations, the research presents an alternative interpretation of foreign aid and show how external funds interact with local developments and realities.

**Paths to the Middle East** - Thomas Naff 2012-02-01

The field of Middle East studies is undergoing a generational change in academia, government, and the corporate community. The men and women who trained the present generation of scholars and who shaped government and corporate policies toward the Middle East after World War II have begun to retire, and unfortunately some have recently died. To preserve their insights into the past and their visions of the future,

Thomas Naff asked a number of major Islamic and Middle East scholars to provide their perspectives and views in a short, personal summation of their careers. This book is a compilation of their responses. It provides a unique evaluation of the last 30 or 40 years by ten of the most distinguished pioneers representing key branches of the field. Pierre Cachia, Albert Hourani, J.C. Hurewitz, Halil Inalcik, Charles Issawi, Ernest McCarus, George Makdisi, Don Peretz, Dankwart A. Rustow, and Farhat J. Ziadeh have provided their perspectives on the past and present, their visions of future paths to be explored, and their wisdom drawn from decades of experience and scholarship. Whatever didacticism is offered in this book is not formal. Lessons, insights, wisdom, and inspiration are almost invisibly woven into the fabric of fascinating biographical narrative told with wit, style, self-effacement, and candor.

### **Economic Development in the Middle East** - Rodney Wilson

2021-09-24

This new edition examines how development in the Middle East is being influenced by global economic change. This comparative textbook focuses on the region's strengths, and highlights development success, especially in the Gulf, Turkey and Israel. The major structural changes in the economies of the Middle East are analysed and current employment challenges are discussed. The impact of demographic changes is considered, notably the dramatic decline in birth rates which will have implications for future employment. The contribution of banks and capital markets to the region's development is appraised, including that of Islamic financial institutions which play a prominent role in the Gulf Cooperation Council (GCC) countries but are on the margins of the financial systems elsewhere. Historically, development in the GCC was linked to oil and gas production and prices, a key issue being whether these are being decoupled as economies diversify and become more self-sustaining. The evidence on this from the GCC is encouraging, with transparent and accountable financial management and major improvements in economic governance despite the lack of democracy. Examining the drivers of economic development in the Middle East in a

regional and global context, this fully updated textbook is a key resource for students and academics interested in economic development and the political economy of the Middle East.

A Political Economy of the Middle East is the most comprehensive analysis of the political economy of development in the contemporary Middle East over the past several decades, examining the interaction of economic development processes, state systems, state policies, and social actors in the Middle East. The fourth edition, with new authors Melani Cammett and Ishac Diwan, has been thoroughly revised, with two new introductory chapters that provide an updated framework with which to understand and study the many changes in demography, education, labor markets, urbanization, water and agriculture, and international labor migration in the recent years. The new edition also includes: a new chapter that charts the political economy of the Gulf states and in particular the phenomenal growth of oil economies; a new chapter on the growth of the private sector and its effects in the region; a new chapter on the rise of "crony capitalism;" and increased coverage of the changes in civil society and social movements in the region including an exploration of the causes, dynamics, consequences, and aftermath of the Arab uprisings.

Islam, Charity, and Activism - Janine A. Clark 2004-01-01

Throughout the Middle East, Islamist charities and social welfare organizations play a major role in addressing the socioeconomic needs of Muslim societies, independently of the state. Through case studies of Islamic medical clinics in Egypt, the Islamic Center Charity Society in Jordan, and the Islah Women's Charitable Society in Yemen, Janine A. Clark examines the structure and dynamics of moderate Islamic

institutions and their social and political impact. Questioning the widespread assumption that such organizations primarily serve the poorer classes, Clark argues that these organizations in fact are run by and for the middle class. Rather than the vertical recruitment or mobilization of the poor that they are often presumed to promote, Islamic social institutions play an important role in strengthening social networks that bind middle-class professionals, volunteers, and clients. Ties of solidarity that develop along these horizontal lines foster the development of new social networks and the diffusion of new ideas.

**The Economics of the Middle East** - James E. Rauch 2019-07-29

Countries in the Middle East have very different economies, even if they are often grouped together. In *The Economics of the Middle East*, James Rauch focuses on the drivers of their distinctiveness, including the effects of their natural endowments, geographic locations, and interactions with the global economy. This book evaluates the socioeconomic trajectories of three groups of Middle Eastern States: Sub-Saharan African, fuel-endowed, and "Mediterranean." It compares these groups both to each other and to developing countries in other regions with similar characteristics. Rauch draws on basic approaches to economic development to enhance understanding of important issues, such as how policies on gender, education, health, and the environment affect development. His comparative perspective sheds light on how and why the Arab countries, Iran, and Turkey have done better or worse than similar countries in other regions. His analysis throughout is supported by data that are well organized and clearly presented. Rauch develops new insights on topics as diverse as unemployment, urbanization, corruption, and the importance of intraregional flows of investment and migrants. The result is a fascinating and balanced overview of the socioeconomic performance of the Arab countries, Iran, and Turkey that presents a new lens on the economics of the Middle East.

*Comparative Economics in a Transforming World Economy, third edition*  
- J. Barkley Rosser, Jr. 2018-01-26

An approach to comparative economic systems that avoids simple dichotomies to examine a wide variety of institutional and systemic arrangements, with updated country case studies. Comparative

economics, with its traditional dichotomies of socialism versus capitalism, private versus state, and planning versus market, is changing. This innovative textbook offers a new approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field. This new edition examines a wide variety of institutional and systemic arrangements, many of which reflect deep roots in countries' cultures and histories. The book has been updated and revised throughout, with new material in both the historical overview and the country case studies. It offers a broad survey of economic systems, then looks separately at market capitalism, Marxism and socialism, and "new traditional economies" (with an emphasis on the role of religions, Islam in particular, in economic systems). It presents case studies of advanced capitalist nations, including the United States, Japan, Sweden, and Germany; alternative paths in the transition from socialist to market economies taken by such countries as Russia, the former Soviet republics, Poland, China, and the two Koreas; and developing countries, including India, Iran, South Africa, Mexico, and Brazil. The new chapters on Brazil and South Africa complete the book's coverage of all five BRICS nations; the chapter on South Africa extends the book's comparative treatment to another continent. The chapter on Brazil with its account of the role of the Amazon rain forest as a great carbon sink expands the coverage of global environmental and sustainability issues. Each chapter ends with discussion questions.

*Paul Samuelson* - Robert A. Cord 2020-01-07

A significant part of economics as we know it today is the outcome of battles that took place in the post-war years between Keynesians and monetarists. In the US, the focus of these battles was often between the neo-Keynesians at the Massachusetts Institute of Technology (MIT) and the Chicago monetarists. The undisputed leader of the MIT Keynesians was Paul A. Samuelson, one of the most influential economists of the 20th century and arguably of all time. Samuelson's output covered a vast number of subjects within economics, the quality of these often pioneering contributions unmatched in the modern era. The volume

focuses both on how Samuelson's work has been developed by others and on how that work fits into subsequent developments in the various fields of speciality within which Samuelson operated.
