Sexuality and Subordination - Susan Mendus 2002-09-11

Sexuality and Subordination uses the insights of a range of disciplines to examine the construction of gender in nineteenth-century Britain and France. With contributions from history, literature, sociology and philosophy, its interdisciplinary approach demonstrates the extent to which a common focus can illuminate problems inaccessible to any single discipline. 'Victorianism' is generally understood to mean sexual double standards, hypocrisy and prudery among the middle classes. But, as this collection shows, the representation of sexuality in the nineteenth century was more diverse and complex than is sometimes realized. Both art and literature point to the deployment of sexual metaphors and imagery, and the language of educated public opinion was shaped by the dichotomy between mind and matter, between rationality and sexuality. The contributors to this volume explore how women, in questioning their subordination, had to challenge a construction of femininity which imposed sexual ignorance.

American English File - Clive Oxenden 2010-01-07

"Texts must be interesting enough for students to want to read them in their own language. Otherwise, how can we expect students to want to read them in English?" This is the authors' golden rule when they choose

texts and topics for every level of American English File. It ensures you get material that learners will enjoy reading and will want to talk about. Texts such as "Could you live without money?" really help to generate opinion and discussion. They create a desire to communicate. Having created the desire, American English File then helps you to develop learners' communication skills. One way it does this is with a strong focus on pronunciation. Research shows that poor pronunciation is a major contributor to breakdowns in communication (Jennifer Jenkins: The Phonology of English as an International Language). American English File integrates pronunciation into every lesson - the "little and often" approach. But that's not all. The unique English File Sounds Chart puts a picture to each sound in the phonetic alphabet, so learners find it easier to remember the sounds and, ultimately, improve their pronunciation.

Graph-Based Semi-Supervised Learning - Amarnag Subramanya 2014-07-01

While labeled data is expensive to prepare, ever increasing amounts of unlabeled data is becoming widely available. In order to adapt to this phenomenon, several semi-supervised learning (SSL) algorithms, which learn from labeled as well as unlabeled data, have been developed. In a separate line of work, researchers have started to realize that graphs provide a natural way to represent data in a variety of domains. Graph-based SSL algorithms, which bring together these two lines of work, have been shown to outperform the state-of-the-art in many applications in speech processing, computer vision, natural language processing, and

other areas of Artificial Intelligence. Recognizing this promising and emerging area of research, this synthesis lecture focuses on graph-based SSL algorithms (e.g., label propagation methods). Our hope is that after reading this book, the reader will walk away with the following: (1) an in-depth knowledge of the current state-of-the-art in graph-based SSL algorithms, and the ability to implement them; (2) the ability to decide on the suitability of graph-based SSL methods for a problem; and (3) familiarity with different applications where graph-based SSL methods have been successfully applied. The History of Methodism in Georgia and Florida - George Gilman Smith 1877

Moment Formation In Solids - W. J. L. Buyers 2013-12-01

The problem of moment formation in metallic systems lies at the interface of localized and itinerant magnetism. The phenomena observed correspond to destruction rather than to formation of spin-correlations. They give rise to the progression from localized ground states through Kondo and mixed-valence behaviour to itinerant magnetic or non-magnetic systems. Somewhere in the progression superconductivity can occur in the presence of f-moments. To bring together the disparate ideas and methods, previously the subject of intense debate only at a number of topical conferences, a two-week Advanced Study Institute was held August 21 - September 02, 1983, at Lester B. Pearson College of the Pacific, Vancouver Island. In the stimulating environment provided by the pines and fiord at the site of this remote United World College on the Canadian West Coast, scientists and students from around the globe gathered to hear lectures by experts. The Study Institute involved seventy-six people and followed in the tradition of previous "Banff" summer schools organized by the Canadian Association of Physicists. It was made possible by grants from the North Atlantic Treaty Organization, the Natural Sciences & Engineering Research Council of

Canada and Atomic Energy of Canada. The grants permitted many young scientists from Nato and non-Nato countries to learn the fundamentals as well as the latest results in the field.

Stalin Waiting for ... the Truth! - Grover Furr 2019-01-25

In October 2017 Stephen Kotkin, professor of history at Princeton University, published "Stalin. Waiting for Hitler, 1929 - 1941." In it, Kotkin accuses Soviet leader Joseph Stalin of dozens of terrible crimes and atrocities. The appearance of Kotkin's scholarship is daunting: 909

pages of text, more than 5200 footnotes, and 47 pages of bibliography in tiny, triple-column type. But Grover Furr has carefully and methodically studied every one of the hundreds of allegations of atrocity, crime, and misdeeds of any kind that Kotkin attributes to Stalin and his closest advisers. Furr has checked every reference, every article and book, that Kotkin cites as evidence. The result: Furr has found that every single "crime" Kotkin alleges is false - a fabrication. Not a single accusation holds up. On the evidence, Stalin committed NO crime, no atrocities - for if he had, Kotkin would surely have uncovered at least one. Furr's exhaustive research shows that Soviet history of the 1930s, has been falsified. Furr's book is a model of meticulous examination of evidence and careful, objective analysis and deduction. "Stalin. Waiting For ... The Truth" exposes the lies and falsehoods behind Soviet history of the 1930s with the same meticulous attention to detail as his previous works: "Khrushchev Lied" (2011), "The Murder of Sergei Kirov" (2013), "Blood Lies" (2014), "Trotsky's 'Amalgams'" (2015), "Yezhov vs. Stalin" (2016), "Leon Trotsky's Collaboration with Germany and Japan" (2017), and "The Mystery of the Katyn Massacre; The Evidence, The Solution" (2018).
