Project Management for Executives - Harold Kerzner 1982

Value-Driven Project Management - Harold Kerzner 2011-08-17

In the traditional view of project management, if a project manager completed a project and had adhered to the triple constraints of time, cost, and performance, the project was considered a success. Today, in the eyes of the customer and the parent or sponsoring company, if a completed project did not deliver its anticipated value, it would be seen as a failure. Today's changing economic climate, marked by an increasingly competitive global environment, is driving project managers to become more business oriented. Projects must now be viewed from a strategic perspective within the context of a business or enterprise that needs to provide value to both the customer and the organization itself. As a result, project managers are now required to possess the skills to complete a project within certain specifications, and also know how to create and deliver value. Responding to the needs of today's project managers, Value-Driven Project Management begins by changing the paradigm of project management. Rather than judge the success of a project from the perspectives of time, budget, and quality, the authors demonstrate why success is only achieved when planned business values are met, including: Internal value Financial value Future value Customer-related value The authors also offer best practices that allow you and your organization to create additional value in efficiency, customer satisfaction, and enhanced products and services. Finally, the book helps you incorporate value into clearly defined business objectives and "sell" the value-driven process to executives. Throughout the book, helpful illustrations clarify complex concepts and processes. Assigning valuable resources to projects that don't provide some tangible form of value to the organization and to the client is poor management and poor decision-making. On the other hand, selecting and implementing projects that will deliver value and an acceptable return on investment is effective management and decision-making, but is very challenging, especially when a project may not provide its target value for years to come. With Value-Driven Project Management in hand, you'll discover the tools you need to ensure that projects deliver true value upon their completion. Strategic Planning for Project Management Using a Project Management Maturity Model - Harold Kerzner 2002-03-14

"It has often been said that 'to improve, one must be prepared to measure the improvement' and 'one must inspect what one expects.' The Kerzner Project Management Maturity Model has provided this tangible measure of maturity. The rest is up to a company to set the expectations and to inspect the results."--Bill Marshall, Nortel Global Project Process Standards (from the Foreword) Strategic planning for project

management—a proven model for assessment and continuous improvement. Harold Kerzner's landmark *Project Management* has long been the reference of choice for outstanding coverage of the basic principles and concepts of project management. Now, with the *Project Management Maturity Model (PMMM)* detailed in this new book, Kerzner has developed a unique, industry-validated tool for helping companies assess their progress in integrating project management throughout their organization. *Strategic Planning for Project Management Using a Project Management Maturity Model* begins by examining the principles of strategic planning and how they relate to project management. The second part of the book introduces the *PMMM*, detailing the five different levels of development for achieving maturity, along with benchmarking instruments for measuring an organization's progress along the maturity curve. These assessment tools can easily be customized to suit individual companies—a particularly valuable feature of the model. Offering vital guidance for making project management a strategic tool for competitive advantage, this book helps managers, engineers, project team members, business consultants, and others build a powerful foundation for company improvement and excellence.
