Bible and Ecology - Richard Bauckham 2010

In this well-argued and timely book, Bauckham considers the relationship of humans to the rest of creation. He argues that there is much more to the Bible's understanding of this relationship than the mandate of human dominion given in Genesis 1, which has too often been used as a justification for domination and exploitation of the earth's resources. He also critiques the notion of stewardship as being on the one hand presumptuous, and on the other too general a term to explain our key responsibilities in caring for the earth. In countering this, he considers other biblical perspectives, including the book of Job, the Psalms and the Gospels, and re-evaluates the biblical tradition of 'dominion', in favour of a 'community of creation'. With its clear analysis and thought-provoking conclusions, *The Bible and Ecology* is an essential read for anyone interested in a biblically grounded approach to ecology.

Religion, Ritual and Ritualistic Objects - Albertina (Tineke) Nugteren 2019-04-23

This is a volume about the life and power of ritual objects in their religious ritual settings. In this Special Issue, we see a wide range of contributions on material culture and ritual practices across religions. By focusing on the dynamic interrelations between objects, ritual, and belief, it explores how religion happens through symbolic materiality. The ritual objects presented in this volume include: masks worn in the Dogon dance; antique ecclesiastical silver objects carried around in festive processions and shown in shrines in the southern Andes; funerary photographs and films functioning as

mnemonic objects for grieving children; a dented rock surface perceived to be the god's footprint in the archaic place of pilgrimage, Gaya (India); a recovered manual of rituals (from Xiapu county) for Mani, the founder of Manichaeism, juxtaposed to a Manichaeian painting from southern China; sacred stories and related sacred stones in the Alor-Pantar archipelago, Indonesia; lotus symbolism, indicating immortalizing plants in the mythic traditions of Egypt, the Levant, and Mesopotamia; lavishly illustrated variations of portrayals of Ravana, a Sinhalese god-king-demon; figurines made of cow dung sculptured by rural women in Rajasthan (India); and mythical artifacts called 'Apples of Eden' in a well-known interactive game series.

psychology of quality of life. The book is divided into six parts. Part 2 (effects of objective reality) describes how sociocultural factors, income factors, other demographic factors, and biological and health conditions affect wellbeing and positive mental health. Part 3 focuses on subjective reality and discusses how individuals process information from their objective environment, and how they manipulate this information that affects wellbeing and positive mental health. Part 4 focuses on the psychology of quality of life specific to life domains, while Part 5 reviews the research on special populations: children, women, the elderly, but also the disabled, drug addicts, prostitutes, emergency personnel, immigrants, teachers, and caregivers. The final part of the book focuses on theories and models

of wellbeing and positive mental health that integrate and unify disparate concepts and programs of research. The book addresses the importance of the psychology of quality of life in the context of public policy and calls for a broadening of the approach in happiness research to incorporate other aspects of quality of life at the group, community, and societal levels. Petrus Romanus - Thomas R. Horn 2012

For more than 800 years scholars have pointed to the dark augury having to do with "the last Pope." The prophecy, taken from St. Malachy's "Prophecy of the Popes," is among a list of verses predicting each of the Roman Catholic popes from Pope Celestine II to the final pope, "Peter the Roman," whose reign would end in the destruction of Rome. First published in 1595, the prophecies were attributed to St. Malachy by a Benedictine historian named Arnold de Wyon, who recorded them in his book, *Lignum Vitæ*. Tradition holds that Malachy had been called to Rome by Pope Innocent II, and while there, he experienced the vision of the future popes, including the last one, which he wrote down in a series of cryptic phrases. According to the prophecy, the next pope (following Benedict XVI)

is to be the final pontiff, Petrus Romanus or Peter the Roman. The idea by some Catholics that the next pope on St. Malachy's list heralds the beginning of "great apostasy" followed by "great tribulation" sets the stage for the imminent unfolding of apocalyptic events, something many non-Catholics would agree with. This would give rise to a false prophet, who according to the book of Revelation leads the world's religious communities into embracing a political leader known as Antichrist. In recent history, several Catholic priests-some deceased now-have been surprisingly outspoken on what they have seen as this inevitable danger rising from within the ranks of Catholicism as a result of secret satanic "Illuminati-Masonic" influences. These priests claim secret knowledge of an multinational power elite and occult hierarchy operating behind supranatural and global political machinations. Among this secret society are sinister false Catholic infiltrators who understand that, as the Roman Catholic Church

represents one-sixth of the world's population and over half of all Christians, it is indispensable for controlling future global elements in matters of church and state and the fulfillment of a diabolical plan they call "Alta Vendetta," which is set to assume control of the papacy and to help the False Prophet deceive the world's faithful (including Catholics) into worshipping Antichrist. As stated by Dr. Michael Lake on the front cover, Catholic and evangelical scholars have dreaded this moment for centuries.

Unfortunately, as readers will learn, time for avoiding Peter the Roman just ran out.

The Apostolic Fathers - Clément I ((pape ;) 2003

The writings of the Apostolic Fathers give a rich and diverse picture of Christian life and thought in the period immediately after New Testament times. Some of them were accorded almost Scriptural authority in the early Church. This new Loeb edition of these essential texts reflects current idiom and the latest scholarship. Here are the Letters of Ignatius, bishop of Antioch,

among the most famous documents of early Christianity; these letters, addressing core theological questions, were written to a half dozen different congregations while Ignatius was en route to Rome as a prisoner, condemned to die in the wild-beast arena. Also in this collection is a letter to the Philippian church by Polycarp, bishop of Smyrna and friend of Ignatius, as well as an account of Polycarp's martyrdom. There are several kinds of texts in the Apostolic Fathers collection, representing different religious outlooks. The manual called the Didache sets forth precepts for religious instruction, worship, and ministry. The Epistle of Barnabas searches the Old Testament, the Jewish Bible, for testimony in support of Christianity and against Judaism. Probably the most widely read in the early Christian centuries was The Shepherd of Hermas, a book of revelations that develops a doctrine of repentance.

Refiguring the Archive - Carolyn Hamilton
2012-12-06

Refiguring the Archive at once expresses cutting-edge debates on 'the archive' in South Africa and internationally, and pushes the boundaries of those debates. It brings together prominent thinkers from a range of disciplines,

mainly South Africans but a number from other countries. Traditionally archives have been seen as preserving memory and as holding the past. The contributors to this book question this orthodoxy, unfolding the ways in which archives construct, sanctify, and bury pasts. In his contribution, Jacques Derrida (an instantly recognisable name in intellectual discourse worldwide) shows how remembering can never be separated from forgetting, and argues that the archive is about the future rather than the past. Collectively the contributors demonstrate the degree to which thinking about archives is embracing new realities and new possibilities. The book expresses a confidence in claiming for archival discourse previously unentered terrains. It serves as an early manual for a time that has already begun.

Origines Ecclesiasticæ - Joseph Bingham 1710

The Anthropology of Christianity - Fenella Cannell 2006-10-17

This collection provides vivid ethnographic explorations of particular, local Christianities as they are experienced by different groups around the world. At the same time, the contributors, all anthropologists, rethink the vexed relationship between anthropology and Christianity. As Fenella Cannell contends in her powerful introduction, Christianity is the critical “repressed” of anthropology. To a great extent, anthropology first defined itself as a rational, empirically based enterprise quite different from theology. The theology it repudiated was, for the most part, Christian. Cannell asserts that anthropological theory carries within it ideas profoundly shaped by this rejection. Because of this, anthropology has been less successful in considering Christianity as an ethnographic object than it has in considering other religions. This collection is designed to advance a more subtle and less self-limiting anthropological study of Christianity. The contributors examine the contours of Christianity among diverse

groups: Catholics in India, the Philippines, and Bolivia, and Seventh-Day Adventists in Madagascar; the Swedish branch of Word of Life, a charismatic church based in the United States; and Protestants in Amazonia, Melanesia, and Indonesia. Highlighting the wide variation in what it means to be Christian, the contributors reveal vastly different understandings and valuations of conversion, orthodoxy, Scripture, the inspired word, ritual, gifts, and the concept of heaven. In the process they bring to light how local Christian practices and beliefs are affected by encounters with colonialism and modernity, by the opposition between Catholicism and Protestantism, and by the proximity of other religions and belief systems. Together the contributors show that it not sufficient for anthropologists to assume that they know in advance what the Christian experience is; each local variation must be encountered on its own terms. Contributors. Cecilia Busby, Fenella Cannell, Simon Coleman, Peter Gow, Olivia

Harris, Webb Keane, Eva Keller, David Mosse, Danilyn Rutherford, Christina Toren, Harvey Whitehouse

Pre-Incident Indicators of Terrorist Incidents - Brent L. Smith 2011-01

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident.

The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

When Scotland Was Jewish - Elizabeth Caldwell Hirschman 2015-05-07

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the

traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

JESUS, JAMES, JOSEPH, and the past and future Temple - David Heilbron Price
2019-08-12

In Roman times, the historic records say the world's most beautiful city was Jerusalem. Amid the city, the Temple shone out in gold and white stone. About a million man-years were involved in its ingenious structure. It astounded the world. To the north lay the fortress city of

Antonia, connected by a causeway. Another causeway crossed the ravine of the Kidron to the Mount of Olives. Worldwide the exiled tribes of Israel supplied vast quantities of gold and treasures. Millions came to worship. James the brother of Jesus had a throne inside the Temple. He prayed in the Holy Place. He followed in the steps of his father Joseph. Jesus had a far higher office than either. It is described both in the New Testament and early writers of the first centuries. The facts of the resurrection were so clear that Roman emperor Tiberius immediately proclaimed Jesus a God. Others like Caligula tried to destroy the Temple and Jerusalem. Rome also tried to destroy the real facts about Jesus, James and Joseph in the Temple.

Medieval Damascus - Hirschler Konrad Hirschler 2016-02-19

The written text was a pervasive feature of

cultural practices in the medieval Middle East. At the heart of book circulation stood libraries that experienced a rapid expansion from the twelfth century onwards. While the existence of these libraries is well known our knowledge of their content and structure has been very limited as hardly any medieval Arabic catalogues have been preserved. This book discusses the largest and earliest medieval library of the Middle East for which we have documentation - the Ashrafiya library in the very centre of Damascus - and edits its catalogue. This catalogue shows that even book collections attached to Sunni religious institutions could hold rather unexpected titles,

such as stories from the 1001 Nights, manuals for traders, medical handbooks, Shiite prayers, love poetry and texts extolling wine consumption. At the same time this library catalogue decisively expands our knowledge of how the books were spatially organised on the bookshelves of such a large medieval library. With over 2,000 entries this catalogue is essential reading for anybody interested in the cultural and intellectual history of Arabic societies. Setting the Ashrafiya catalogue into a comparative perspective with contemporaneous libraries on the British Isles this book opens new perspectives for the study of medieval libraries.
