Beyond Left and Right - Anthony Giddens 2013-08-23

How should one understand the nature and possibilities of political radicalism today? The political radical is normally thought of as someone who stands on the left, opposing backward-looking conservatism. In the present day, however, the left has turned defensive, while the right has become radical, advocating the free play of market forces no matter what obstacles of tradition or custom stand in their way. What explains such a curious twist of perspective? In answering this question Giddens develops a new framework for radical politics, drawing freely on what he calls "philosophic conservatism", but applying this outlook in the service of values normally associated with the Left. The ecological crisis is at the core of this analysis, but is understood by Giddens in an unconventional way - as a response to a world in which modernity has run up against its limits as a social and moral order. The end of nature, as an entity existing independently of human intervention, and the end of tradition, combined with the impact of globalization, are the forces which now have to be confronted, made use of and coped with. This book provides a powerful

interpretation of the rise of fundamentalism, of democracy, the persistence of gender divisions and the question of a normative political theory of violence. It will be essential reading for anyone seeking a novel approach to the political challenges which we face at the turn of the twenty-first century.

The Oxford History of Islam - John L. Esposito 2000-04-06

Lavishly illustrated with over 300 pictures, including more than 200 in full color, The Oxford History of Islam offers the most wide-ranging and authoritative account available of the second largest--and fastest growing--religion in the world. John L. Esposito, Editor-in-Chief of the four-volume Oxford Encyclopedia of the Modern Islamic World, has gathered together sixteen leading scholars, both Muslim and non-Muslim, to examine the origins and historical development of Islam--its faith, community, institutions, sciences, and arts. Beginning in the pre-Islamic Arab world, the chapters range from the story of Muhammad and his Companions, to the development of Islamic religion and culture and the empires that grew from it, to the influence that Islam has on today's world. The book covers a wide array of subjects, casting light on topics such as the historical encounter of Islam and Christianity, the role of

Islam in the Mughal and Ottoman empires, the growth of Islam in Southeast Asia, China, and Africa, the political, economic, and religious challenges of European imperialism in the nineteenth and twentieth centuries, and Islamic communities in the modern Western world. In addition, the book offers excellent articles on Islamic religion, art and architecture, and sciences as well as bibliographies. Events in the

contemporary world have led to an explosion of interest and scholarly work on Islam. Written for the general reader but also appealing to specialists, The Oxford History of Islam offers the best of that recent scholarship, presented in a readable style and complemented by a rich variety of illustrations.
