The Interaction of Competition Law and Sector Regulation - Pier L. Parcu
2022-11-04

This insightful book discusses the interaction of sector-specific regulation and competition policy. In particular, it identifies emerging trends and reflects on the nature of network regulation in the energy and telecom industries.

Handbook of Networks in Power Systems II - Alexey Sorokin
2012-03-02

Energy has been an inevitable component of human lives for decades. Recent rapid developments in the area require analyzing energy systems not as independent components but rather as connected interdependent networks. The Handbook of Networks in Power Systems includes the state-of-the-art developments that occurred in the power systems networks, in particular gas, electricity, liquid fuels, freight networks, as well as their interactions. The book is separated into two volumes with three sections, where one scientific paper or more are included to cover most important areas of networks in power systems. The first volume covers topics arising in electricity network, in particular electricity markets, smart grid, network expansion, as well as risk management. The second volume presents problems arising in gas networks; such as scheduling and planning of natural gas systems, pricing, as well as

optimal location of gas supply units. In addition, the second volume covers the topics of interactions between energy networks. Each subject is identified following the activity on the domain and the recognition of each subject as an area of research. The scientific papers are authored by world specialists on the domain and present either state-of-the-arts reviews or scientific developments.

Five Key Principles of Corporate Performance Management - Bob Paladino 2011-01-04

In Five Key Principles of Corporate Performance Management, Bob Paladino shares his decades of experience to provide proven, real-world implementation insights from globally recognized and award-winning organizations. You'll discover what today's Fortune 100 companies are doing right, and how to implement their enterprise techniques and strategies within your own organization to maximize success.

Heterogeneous Processes of Geochemical Migration - V. S. Golubev
2012-12-06

The problem of the geochemical migration of elements has received wide attention in the works of V. I. Vernadskii and A. E. Fersman [1, 2]. Vernadskii considered geochemistry to be the science of the history of chemical elements on the earth, their distribution and move ments in space and time, and their genetic relations [I]. Geochemical migration

was defined by Fersman as "the movement of chemical elements in the earth's crust leading to their dissemination or concentration. " The views of Vernadskii and Fersman on the migration of elements have received added support and development in connection with successes in physics, chemistry, biology, and other sciences. According to Fersman, the earth is looked upon as a cosmic body, characterized by common origin and Similarity of composition with the sun, the planets, meteorites, and other bodies of the solar system. The scale and trend of geochemical migration of elements in the earth are determined by the initial state of terrestrial matter, its thermal history, and the scale of time. The rules of elemental migration are determined by internal and external factors. Fersman distinguishes five groups of internal factors, i. e.

Operator Theoretic Aspects of Ergodic Theory - Tanja Eisner
2015-11-18

Stunning recent results by Host-Kra, Green-Tao, and others, highlight the timeliness of this systematic introduction to classical ergodic theory using the tools of operator theory. Assuming no prior exposure to ergodic theory, this book provides a modern foundation for introductory courses on ergodic theory, especially for students or researchers with an interest in functional analysis. While basic analytic notions and results are reviewed in several appendices, more advanced operator theoretic topics are developed in detail, even beyond their immediate connection with ergodic theory. As a consequence, the book is also suitable for advanced or special-topic courses on functional analysis with applications to ergodic theory. Topics include: • an intuitive introduction to ergodic theory • an introduction to the basic notions, constructions, and standard examples of topological dynamical systems • Koopman operators, Banach lattices, lattice and algebra homomorphisms, and the Gelfand-Naimark theorem • measure-preserving dynamical systems • von Neumann's Mean Ergodic Theorem and Birkhoff's Pointwise Ergodic Theorem • strongly and weakly mixing systems • an examination of notions of isomorphism for measure-preserving systems • Markov operators, and the related concept of a factor of a measure preserving system • compact groups and semigroups, and a powerful tool in their study, the Jacobs-de

Leeuw-Glicksberg decomposition • an introduction to the spectral theory of dynamical systems, the theorems of Furstenberg and Weiss on multiple recurrence, and applications of dynamical systems to combinatorics (theorems of van der Waerden, Gallai, and Hindman, Furstenberg's Correspondence Principle, theorems of Roth and Furstenberg-Sárközy) Beyond its use in the classroom, Operator Theoretic Aspects of Ergodic Theory can serve as a valuable foundation for doing research at the intersection of ergodic theory and operator theory

Understanding Writing - Thomas Newkirk 1986

Presents full-colour, easy-to-use books and a CD-ROM for CLAiT 2006, which focus on enthusing students and leading them to success. The modular approach allows students to choose a book per unit or one book covering the first three units.

Rapport d'information sur la mise en oeuvre du plan Juncker - Razzy Hammadi 2016-05-03

La crise économique et financière a profondément ébranlé l'Europe et creusé le déficit d'investissement dont souffrait déjà le continent par rapport à ses principaux partenaires commerciaux. Le constat, préoccupant, d'un sous-investissement durable en Europe, a suscité une vive réaction de la part de la Commission européenne qui a lancé, fin 2014, un ambitieux plan d'investissement. Supposé restaurer la confiance des investisseurs et permettre, grâce à un effet de levier de 1 :15, le financement de projets d'envergure et d'avenir, nécessaires en Europe, le Plan Juncker repose sur un triptyque associant la création de nouveaux outils et instruments à la réforme, plus globale, de l'environnement économique européen. Après près d'un an de mise en oeuvre du Plan, un premier bilan encourageant, quoiqu'inégal, peut être dressé et la plupart des doutes initiaux nuancés, sinon levés. Le succès du Plan dépendra toutefois de la capacité des différents acteurs à en exploiter toutes les potentialités et à mieux communiquer sur les réussites comme sur les insuffisances du dispositif. L'importance du déficit d'investissement annuel estimé en Europe nécessite de réfléchir, dès à présent, sur l'après Plan Juncker. La question de la pérennisation du Plan semble devoir être posée, avec pragmatisme et ambition car l'Europe ne pourra, à terme, faire l'économie de réformes structurelles pour renforcer sa résilience aux crises.

Communities of Saint Martin - Sharon Farmer 2019-03-15

Sharon Farmer here investigates the ways in which three medieval communities—the town of Tours, the basilica of Saint-Martin there, and the abbey of Marmoutier nearby—all defined themselves through the cult of Saint Martin. She demonstrates how in the early Middle Ages the bishops of Tours used the cult of Martin, their fourth-century predecessor, to shape an idealized image of Tours as Martin's town. As the heirs to Martin's see, the bishops projected themselves as the rightful leaders of the community. However, in the late eleventh century, she shows, the canons of Saint-Martin (where the saint's relics resided) and the monks of Marmoutier (which Martin had founded) took control of the

cult and produced new legends and rituals to strengthen their corporate interests. Since the basilica and the abbey differed in their spiritualities, structures, and external ties, the canons and monks elaborated and manipulated Martin's cult in quite different ways. Farmer shows how one saint's cult lent itself to these varying uses, and analyzes the strikingly dissimilar Martins that emerged. Her skillful inquiry into the relationship between group identity and cultural expression illuminates the degree to which culture is contested territory. Farmer's rich blend of social history and hagiography will appeal to a wide range of medievalists, cultural anthropologists, religious historians, and urban historians.

Security and Usability - Lorrie Faith Cranor 2005-08-25

Human factors and usability issues have traditionally played a limited role in security research and secure systems development. Security experts have largely ignored usability issues--both because they often failed to recognize the importance of human factors and because they lacked the expertise to address them. But there is a growing recognition that today's security problems can be solved only by addressing issues of usability and human factors. Increasingly, well-publicized security breaches are attributed to human errors that might have been prevented through more usable software. Indeed, the world's future cyber-security depends upon the deployment of security technology that can be broadly used by untrained computer users. Still, many people believe there is an inherent tradeoff between computer security and usability. It's true that a computer without passwords is usable, but not very secure. A computer

that makes you authenticate every five minutes with a password and a fresh drop of blood might be very secure, but nobody would use it. Clearly, people need computers, and if they can't use one that's secure, they'll use one that isn't. Unfortunately, unsecured systems aren't usable for long, either. They get hacked, compromised, and otherwise rendered useless. There is increasing agreement that we need to design secure systems that people can actually use, but less agreement about how to reach this goal. *Security & Usability* is the first book-length work describing the current state of the art in this emerging field. Edited by security experts Dr. Lorrie Faith Cranor and Dr. Simson Garfinkel, and authored by cutting-edge security and human-computerinteraction (HCI) researchers world-wide, this volume is expected to become both a classic reference and an inspiration for future research. *Security & Usability* groups 34 essays into six parts: Realigning Usability and Security--with careful attention to user-centered design principles, security and usability can be synergistic. Authentication Mechanisms-- techniques for identifying and authenticating computer users. Secure Systems--how system software can deliver or destroy a secure user experience. Privacy and Anonymity Systems--methods for allowing people to control the release of personal information. Commercializing Usability: The Vendor Perspective--specific experiences of security and software vendors (e.g., IBM, Microsoft, Lotus, Firefox, and Zone Labs) in addressing usability. The Classics--groundbreaking papers that sparked the field of security and usability. This book is expected to start an avalanche of discussion, new ideas, and further advances in this important field.

Do companies integrate sustainability into management systems? - Sebastiano Cupertino 2021-09-30

Questa monografia intende fornire una prima possibile impostazione interpretativa del processo di cambiamento contabile che, almeno a far data dal 2011, sta interessando le amministrazioni pubbliche italiane e, in special modo, le Regioni e gli enti locali, ovvero la tipologia di amministrazioni che sono oggetto specifico di questa ricerca.

Practical Atlas of Ruminant and Camelid Reproductive Ultrasonography - Luc DesCôteaux 2009-09-24

Practical Atlas of Ruminant and Camelid Reproductive Ultrasonography is a practical, fully referenced, image-based guide to the essential concepts of reproductive ultrasound in domesticated ruminants and camelids. Providing information to enable practitioners to incorporate ultrasound service into their practices, the book also includes more specialized information for advanced techniques such as fetal sexing, embryo transfer, color Doppler, and others. Practical Atlas of Ruminant and Camelid Reproductive Ultrasonography is a must-have reference for ruminant and camelid practitioners, instructors, and students.

Electricity and Magnetism - Edward M. Purcell 2013-01-21

For 50 years, Edward M. Purcell's classic textbook has introduced students to the world of electricity and magnetism. The third edition has been brought up to date and is now in SI units. It features hundreds of new examples, problems, and figures, and contains discussions of real-life applications. The textbook covers all the standard introductory topics, such as electrostatics, magnetism, circuits, electromagnetic waves, and electric and magnetic fields in matter. Taking a nontraditional approach, magnetism is derived as a relativistic effect. Mathematical concepts are introduced in parallel with the physics topics at hand, making the motivations clear. Macroscopic phenomena are derived rigorously from the underlying microscopic physics. With worked examples, hundreds of illustrations, and nearly 600 end-of-chapter problems and exercises, this textbook is ideal for electricity and magnetism courses. Solutions to the exercises are available for instructors at www.cambridge.org/Purcell-Morin.

The aim of the EU Directive 2014/95/EU, requiring the mandatory disclosure of non-financial information (NFI) by large undertakings and groups, is to rebuild trust with stakeholders. This book aims to summarize the relevant literature about company information with particular reference to the voluntary vis a vis mandatory NFI.

Sustainable Social, Economic and Environmental Revitalization in Multan City - Adalberto Del Bo 2014-02-17

This book describes six months of initial intensive activities within a motivating multidisciplinary project to achieve sustainable social, economic, and environmental revitalization in the historic core of Multan City, Pakistan. The project is managed by Fondazione Politecnico di Milano within the framework of the "Pakistan-Italian Debt for Development Swap Agreement" and has five components: a livelihood improvement program, a living conditions improvement program, revitalization of physical assets, establishment of a Pakistan-Italian resource centre in Multan, and an Italian collaboration program for training and capacity building. All aspects are covered in this book, which provides a comprehensive account of progress in this excellent example of cross-cultural cooperation between a Western and an Eastern country in regenerating an historic populated site.
