Rough-Water Man - Richard E. Westwood
1992-08

The passage of the 1902 Reclamation Act created a mandate for the federal government to build dams on the Colorado River and its powerful tributaries. By 1920 the US Geological Survey had surveyed the river's main courses, but still needed accurate charts of the last stretches of deep canyons and white-water rapids, accessible only by boat. Rough-Water Man is the first detailed account of these mapping expeditions by the USGS—the San Juan Canyon in 1921, the upper Green River in 1922, and the Grand Canyon in 1923. Illustrated throughout with period photographs, it is also the personal story of twenty-four-year-old Henry Elwyn Blake Jr., the only boatman to crew on each of the three trips, evolving from novice waterman to expert rapids runner. Drawing on Blake's diaries, as well as the writings of other USGS surveyors, Rough-Water Man conveys the danger and hardships of navigating these waters with heavy wooden boats and oars. Even today, in rubber pontoons, traversing these canyons is an awesome and exhilarating experience. When Blake and his companions surveyed it, the Colorado ran free and wild from Wyoming to the

Sea of Cortez. Westwood gives us mile-by-mile and day-by-day accounts of running these rapids before their canyons were flooded and waters tamed, before the rivers had ever been charted.

Rollover Accident Reconstruction - Christopher D Armstrong 2018-11-02

The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

Tourism Business Frontiers - Dimitrios Buhalis

2006-08-11

As the global tourism industry continues to expand and to become more complex, it is vital that those in the industry are equipped with a thorough knowledge of all topics involved. *New Tourism Consumers Products and Industry: Present and Future Issues* provides this comprehensive coverage and more. Vehicle Accident Analysis and Reconstruction Methods - Raymond M Brach 2011-04-12

Designed for the experienced practitioner, this new book aims to help reconstruction specialists with problems they may encounter in everyday analysis. The authors demonstrate how to take the physics behind accidents out of the idealized world and into practical situations. Real-world examples are used to illustrate the methods, clarify important concepts, and provide practical applications to those working in the field. Thoroughly revised, this new edition builds on the original exploration of accident analysis, reconstruction, and vehicle design. Enhanced with new material and improved chapters on key topics, an expanded glossary of automotive terms, and a bibliography at the end of the book providing further reading suggestions make this an essential resource reference for engineers involved in litigation, forensic investigation,

automotive safety, and crash reconstruction. Police officers, attorneys, and insurance professionals will also find the book to be a definitive resource in reconstructing accident scenes. New Topics: • Event data recorders (EDRs) • Frictional drag coefficients for sliding tires • Railroad grade-crossing collisions • New practical applications of mathematical methods Enhanced Features: • Expanded glossary of automotive terms • Bibliography with further reading suggestions • Improved chapters on tire forces, rollover accidents, crush energy, pedestrian collisions, vehicle dynamic simulation

\$20 Per Gallon - Christopher Steiner 2009-07-15
Imagine an everyday world in which the price of gasoline (and oil) continues to go up, and up,

and up. Think about the immediate impact that would have on our lives. Of course, everybody already knows how about gasoline has affected our driving habits. People can't wait to junk their gas-guzzling SUVs for a new Prius. But there are more, not-so-obvious changes on the horizon that Chris Steiner tracks brilliantly in this provocative work. Consider the following societal changes: people who own homes in far-off suburbs will soon realize that there's no longer any market for their houses (reason: nobody wants to live too far away because it's too expensive to commute to work).

Telecommuting will begin to expand rapidly.

Trains will become the mode of national transportation (as it used to be) as the price of flying becomes prohibitive. Families will begin to migrate southward as the price of heating northern homes in the winter is too pricey.

Cheap everyday items that are comprised of plastic will go away because of the rising price to produce them (plastic is derived from oil). And this is just the beginning of a huge and overwhelming domino effect that our way of life will undergo in the years to come. Steiner, an engineer by training before turning to journalism, sees how this simple but constant rise in oil and gas prices will totally re-structure our lifestyle. But what may be surprising to readers is that all of these changes may not be negative - but actually will usher in some new and very promising aspects of our society.

Steiner will probe how the liberation of technology and innovation, triggered by climbing gas prices, will change our lives. The book may start as an alarmist's exercise.... but don't be misled. The future will be exhilarating.

Duty to Investigate - J.W. Stone 2013-06-20

As a successful trial lawyer, Mike Beck uses his personality and his skill with the letter of the law to win in a courtroom. As a Marine Reservist

ordered to Iraq on an unexpected deployment, he finds himself in a different world where the law of war often conflicts with common sense and his own feel for what's right and what's wrong. When an embedded female correspondent reveals what appears to be an illegal killing of Iraqi civilians by a U.S. Marine during the battle for Fallujah, Beck finds himself faced with a case that challenges both his legal skills and his conviction that something is very wrong with what seems to be a clear violation of the law of land warfare. Devoted to finding the truth about an ugly incident and keeping an innocent Marine from being convicted in a court-martial, Mike Beck defies orders, purloins evidence, and leads a combat team that must fight their way through a fanatical enemy force to investigate the scene of the alleged crime. Along the way as he battles his conscience, command influence, and a media giant clamoring for his head, Mike Beck finds a lot of truth about the case, about the brutal enemy in Iraq, about the nature of a very nasty war, about the Marines risking their lives in a confusing combat situation—and about himself as a Marine, a lawyer, and a man. “A timely page-turner about war, honor, love, and Iraq justice told by a true Marine—Hooah!” Eugene Sullivan, Chief Judge (ret), U.S. Court of Appeals (Armed Forces) Author of *The Majority Rules* and *The Report to the Judiciary Stone*, a former Marine himself, blurs the lines between the good guys and the bad guys and shows us that in war, not everything and everyone is as they seem at first glance. His battle scenes are written from the perspective of a true soldier and are gripping and at times heart-breaking. Stone's story is intriguing, action-packed—and hints at more to come.

BUYING GUIDE ALL NEW FOR 2005 - 2004

Fifty years of the UIS. 1965-2015 - José Ayrton Labegalini 2015-06-01

The International Union of Speleology (Union Internationale de Spéléologie, UIS) is a non-profit, non-governmental organization founded in 1965 in Slovenia (part of former Yugoslavia) on the initiative of the 4th International Congress of Speleology. Since 1953, these congresses are held every four years to promote interaction between academic and technical speleologists of different nationalities and with the purpose of developing and coordinating international speleology in all of its scientific, technical, cultural and economic aspects. The Union consists of member nations with voting rights, and each is represented by a delegate who represents all cavers and speleologists in its country. Until this book, the history of the International Union of Speleology was spread out in the minutes of the meetings and general assemblies, various UIS publications, and the proceedings of its International Congresses. Moreover, much of it was never written and was

available only from the memories of past presidents, secretaries and other members of the UIS. In this book, the author presents the purpose of the Union and summarizes all its events through the first 50 years of its existence.

----- Mednarodna speleološka zveza (Union Internationale de Spéléologie, UIS) je neprofitna, nevladna organizacija, ustanovljena leta 1965 v Sloveniji (v nekdanji Jugoslaviji), na pobudo 4. Mednarodnega speleološkega kongresa. Kongresi so organizirajo na vsake štiri leta že od leta 1949, z namenom spodbujanja sodelovanja med akademskimi in tehničnimi jamarji različnih narodnosti ter z namenom razvijanja in usklajevanju mednarodnega jamarstva iz znanstvenih, tehničnih, kulturnih in ekonomskih vidikov. Zvezo sestavljajo člani z volilno pravico, vsako državo pa zastopajo delegati, ki predstavljajo vse jamarje in speleologe v državi. Do te knjige je bila zgodovina Mednarodne speleološke zveze zapisana samo v zapisnikih sestankov, generalnih skupščin in različnih publikacijah ter zbornikih njenih mednarodnih kongresov. Veliko pa sploh ne, bilo je samo v spominih preteklih predsednikov, tajnikov in drugih upravnih članov UIS-a. V tej knjigi avtor povzema vse dogodke in namen zveze skozi 50 let njenega obstoja.

Business Statistics for Competitive Advantage with Excel 2007 - Cynthia Fraser 2008-12-11

Exceptional managers know that they can create competitive advantages by basing decisions on performance response under alternative scenarios. To create these advantages, managers need to understand how to use statistics to provide information on performance response under alternative scenarios. Statistics are created to make better decisions. Statistics are essential and relevant. Statistics must be easily and quickly produced using widely available software, Excel. Then results must be translated into general business language and illustrated with compelling graphics to make them understandable and usable by decision makers. This book helps students master this process of using statistics to create competitive advantages as decision makers. Statistics are essential, relevant, easy to produce, easy to understand, valuable, and fun, when used to create

competitive advantage. The Examples, Assignments, And Cases Used To Illustrate Statistics For Decision Making Come From Business Problems McIntire Corporate Sponsors and Partners, such as Rolls-Royce, Procter & Gamble, and Dell, and the industries that they do business in, provide many realistic examples. The book also features a number of examples of global business problems, including those from important emerging markets in China and India. It is exciting to see how statistics are used to improve decision making in real and important business decisions. This makes it easy to see how statistics can be used to create competitive advantages in similar applications in internships and careers. Learning Is Hands On With Excel and Shortcuts

Cries for Carteret - Chad Hollamon 2022-11-28
Being investigated by the federal government for drug and money crimes didn't deter Chad from continuing his criminal enterprise. In fact, it

emboldened him as he dared the DEA and FBI to catch him. Being arrested by those same federal agents didn't force Chad to slow his life down. And being sentenced to forty years in prison didn't humble him. Not one bit. From a jail cell, he continued selling narcotics and even smuggling drugs into one of the most secure federal penitentiaries. For years, Chad's life spiraled out of control as he witnessed drug overdoses, nonsensical violence, suicides, and murders. His life seemed destined for a negative outcome, until one conversation with a mass murderer completely changed his outlook on life. That singular conversation set off a chain of events that would ultimately lead Chad to a lifetime of atonement and redemption.
