Migration and Urbanization: Local Solutions for Global Economic Challenges - Ushakov, Denis 2019-08-16

International migration and urbanization as economic processes can provide great opportunities to solve local and regional economic and social problems and lead to the leveling of global economic unfairness and multi-complexity. However, uncontrolled migration and urbanization can easily destroy market stability and create many new social and economic problems both in developed (due to migration) and developing (due to urbanization) countries. Migration and Urbanization: Local Solutions for Global Economic Challenges is a collection of innovative research that sets basic rules and patterns for state regulation of urbanization and international migration and for increasing the economic

efficiency of developed and developing countries. Additionally, the book evaluates the economic impact of urbanization and international migration at the global, national, and regional levels. While highlighting topics including economic security, modern mechanisms, and migration policy, this book is ideally designed for government officials, economists, educators, policymakers, industry leaders, business managers, academicians, researchers, and students.

Like Mankiw's *Macroeconomics*, the Canadian edition teaches fundamentals by relating theoretical concepts to big issues and policy debates, but illustrates those ideas and discussions with examples and cases from Canada, as well as research by Canadian economists.
