Arts of Subjectivity: A New Animism for the Post-Media Era - Jacob W. Glazier 2019-12-26

Bringing thinking from the arts and digital humanities into dialogue with one another, this book investigates what it means to be alive in a world that is structured by technology, the media, and an ever expanding sense of a global community. In this unique time in our history, when we are bombarded by signs and symbols and constantly connected into gadgets, apps, and networks, it has become increasingly difficult to navigate what has been dubbed a 'post-truth' world. Critiques taken from post-colonial studies and neoanimism help challenge the paranoia that has become endemic and, indeed, symptomatic to global realities we are now witnessing. This pertains not only to the ecological degradation of the planet but also to the lingering remnants of eurocentrism and racism that have taken the forms of nationalism and fascism. As a guide, an updated version of what Michel Foucault called an arts of existence may help us sail in these treacherous and confusing waters. Diving into post-structuralist French theory, through American feminism, and emerging out of media studies, this book argues for an ethical and aesthetic form of self-fashioning that runs counter to processes subjection and mediatization. This craft of life, as Plato called it, is a space of disjunction and liberation, between subjectivity and other, where something new and different has the potential to emerge and mould to our likeness.

The Accidental Alchemist - Gigi Pandian 2020-10-27

"Filled with magic, intrigue, and humor, this series is sure to delight fans of cozy mysteries and urban fantasy."—Bookriot A chance for a new beginning in Portland, Oregon. A stowaway from Paris. Can alchemist Zoe Faust solve the mystery of an ancient book in time to save her new friend? Don't miss the first novel in the award-winning series from USA Today bestselling author Gigi Pandian! Unpacking her belongings in her new fixer-upper house, alchemist Zoe Faust can't help but notice she's picked up a stowaway. Dorian Robert-Houdin is a living, breathing gargoyle—not to mention a master of French cuisine—and he needs Zoe's expertise to unlock the secrets of a centuries-old text. Zoe, who's trying to put her old life behind her, isn't so sure she wants to reopen her alchemical past...until a crime committed on her front porch leaves her no choice. Includes recipes! Praise Winner of the Left Coast Crime Lefty Award. "Zoe and Dorian are my new favorite amateur-sleuth duo!" —New York Times bestselling author Victoria Laurie "A whimsical and charming supernatural mystery."—Mystery Scene "Mysterious, captivating, and infused with the rich history of the Northwest...fantastic." —Portland Book Review "This reviewer is eagerly anticipating more from this series, and a return of a cast more fun than an episode of Portlandia."—RT Book Reviews "Pandian...launches a supernatural cozy series that hits high marks for a modern twist on an ancient practice. —Vegetarian Journal "[A]n eccentric and charming cast of characters readers are going to want to spend more time with." —RT Book Reviews Online "A magical, whimsical cozy that will delight readers who enjoy Juliet Blackwell and Heather Weber mysteries!"—Agatha Award-winning author Avery Aames (aka Daryl Wood Gerber) "Gigi Pandian's pen never disappoints." —New York Times bestselling author Juliet Blackwell The Spy with 29 Names - Jason Webster 2014-04-03

He fought on both sides in the Spanish Civil War. He was awarded the Iron Cross by Hitler and an MBE by Britain. To MI5 he was known as Garbo. To the Abwehr, he was Alaric. He also went by Rags the Indian Poet, Mrs Gerbers, Stanley the Welsh Nationalist - and 24 other names. He tricked Hitler over D-Day. He was the greatest double agent in history. But who, exactly, was Juan Pujol? Using his intimate knowledge of Spain and his skills as a crime novelist, Jason Webster tells for the first time the full true story of the character who captured the imagination in Ben Macintyre's Double Cross. He tells of Pujol's early life in Spain, his determination to fight totalitarianism and his strange journey from German spy to MI5. Working for the British, whom he saw as the exemplars of freedom and democracy, he created a bizarre fictional network of spies - 29 of them - that misled the entire German high command, including Hitler himself. Above all, in Operation Fortitude he diverted German Panzer divisions away from Normandy, playing a crucial role in safeguarding D-Day and ending the war, and securing his reputation as the most successful double agent of the war. Meticulously researched, yet told with the verve of a thriller, *The Spy with 29 Names* uncovers the truth - far stranger than any fiction - about the spy behind one of recent history's most important and dramatic events.

Pyropolitics in the World Ablaze - Michael Marder 2020-11-09

From books and heretics burnt on the pyres of the Inquisition to self-immolations at protest rallies, from the burning of fossil fuels to inflammatory speech, from the imagery of revolutionary sparks ready to ignite the spirits of the oppressed to car bombings and "scorched earth" policy, fire proves to be an indispensable element of the political. *Pyropolitics in the World Ablaze* builds upon the scintillating, by turns horrifying and hopeful, images and realities of flames, hearths, sparks, immolations, melting pots, incinerations, and burning in political thought and practices. Relying on classical political theory, theology, philosophy, literature and cinema, as well as an analysis of current events, Michael Marder argues that geo-politics, or the politics of the Earth, has always had an unstable, at once shadowy and blinding, underside—pyro-politics, or the politics of fire. If this obscure double of geopolitics is increasingly dictating the rules of the game today, then it is crucial to learn to speak its language, to discern its manifestations and to project where our world ablaze is heading. This new edition includes recent examples of the uses and accusations of 'incendiary speech' both by Donald Trump and by European populist right and exploration of threats of global warming that have now reached a turning point in our collective relation to the dangers and promises of fire .

From Alchemy to Chemistry in Picture and Story - Arthur Greenberg 2006-12-15

Praise for *From Alchemy to Chemistry in Picture and Story* "The timeline from alchemy to chemistry contains some of the most mystifying ideas and images that humans have ever devised. Arthur Greenberg shows us this wonderful world in a unique and highly readable book." —Dr. John Emsley, author of *The Elements of Murder: A History of Poison* "Art Greenberg takes us, through text and lovingly selected images, on a 'magical mystery tour' of the chemical universe. No matter what page you open, there is a chemical story worth telling." —Dr. Roald Hoffmann, Nobel Laureate and coauthor of *Chemistry Imagined* "Chemistry has perhaps the most intricate, most fascinating, and certainly most romantic history of all the sciences. Arthur Greenberg's essays-delightful, learned, quirky, highly personal, and richly illustrated with contemporary

drawings (many of great rarity and beauty)-provide a kaleidoscope of intellectual landscapes, bringing the experiments, the ideas, and the human figures of chemistry's past intensely alive." —Dr. Oliver Sacks, author of *Awakenings From Alchemy to Chemistry in Picture and Story* takes you on an illustrated tour of chemistry's fascinating history, from its early focus on the spiritual relationship between man and nature to some of today's most cutting-edge applications. Drawing from rare publications and artwork that span over five centuries, the book contains nearly 200 essays and over 350 illustrations—including 24 in full color—that tell the engaging story of the development of this fundamental science and its connection with human history. Join Arthur Greenberg as he combines the "best of the best" from his previous works (as well as several new essays) to paint a colorful picture of chemistry's remarkable origins!

Cooked - Michael Pollan 2014-04-29

Michael Pollan, the bestselling author of *The Omnivore's Dilemma*, *Food Rules*, *How to Change Your Mind*, and *This is Your Mind on Plants* explores the previously uncharted territory of his own kitchen in *Cooked*. "Having described what's wrong with American food in his best-selling *The Omnivore's Dilemma* (2006), New York Times contributor Pollan delivers a more optimistic but equally fascinating account of how to do it right. . . . A delightful chronicle of the education of a cook who steps back frequently to extol the scientific and philosophical basis of this deeply satisfying human activity." —Kirkus (starred review) *Cooked* is now a Netflix docuseries based on the book that focuses on the four kinds of "transformations" that occur in cooking. Directed by Oscar-winning filmmaker Alex Gibney and starring Michael Pollan, *Cooked* teases out the links between science, culture and the flavors we love. In *Cooked*, Pollan discovers the enduring power of the four classical elements—fire, water, air, and earth—to transform the stuff of nature into delicious things to eat and drink. Apprenticing himself to a succession of culinary masters, Pollan learns how to grill with fire, cook with liquid, bake bread, and ferment everything from cheese to beer. Each section of *Cooked* tracks Pollan's effort to master a single classic recipe using one of the four elements. A North Carolina barbecue pit master tutors him in the primal magic of fire; a Chez Panisse-trained cook schools him in the art of braising; a celebrated baker teaches him how air transforms grain and water into a fragrant loaf of bread; and finally, several mad-genius "fermentos" (a tribe that includes brewers, cheese makers, and all kinds of picklers) reveal how fungi and bacteria can perform the most amazing alchemies of all. The reader learns alongside Pollan, but the lessons move beyond the practical to become an investigation of how cooking involves us in a web of social and ecological relationships. Cooking, above all, connects us. The effects of not cooking are similarly far reaching. Relying upon corporations to process our food means we consume large quantities of fat, sugar, and salt; disrupt an essential link to the natural world; and weaken our relationships with family and friends. In fact, *Cooked* argues, taking back control of cooking may be the single most important step anyone can take to help make the American food system healthier and more sustainable. Reclaiming cooking as an act of enjoyment and self-reliance, learning to perform the magic of these everyday transformations, opens the door to a more nourishing life.

History of Alchemy - M. M. Pattison Muir 2019-01-09

The writer of a treatise on astrology, in the 5th century, speaking of the influences of the stars on the dispositions of man, says: "If a man is born under Mercury he will give himself to astronomy; if Mars, he will follow the profession of arms; if Saturn, he will devote himself to the science of alchemy (*Scientia alchemiae*)." The word *alchemia* which appears in this treatise, was formed by prefixing the Arabic *al* (meaning the) to *chemia*, a word, as we have seen, of Greek origin.

The Story of Alchemy and the Beginnings of Chemistry - Matthew Moncrieff Pattison Muir 1902

Distilling Knowledge - Bruce T. Moran 2005

Alchemy can't be science--common sense tells us as much. But perhaps common sense is not the best measure of what science is, or was. In this book, Bruce Moran looks past contemporary assumptions and prejudices to determine what alchemists were actually doing in the context of early modern science. Examining the ways alchemy and chemistry were studied and practiced between 1400 and 1700, he shows how these approaches influenced their respective practitioners' ideas about nature and shaped their inquiries into the workings of the natural world. His work sets up a dialogue between what historians have usually presented as separate spheres; here we see how alchemists and early chemists exchanged ideas and methods and in fact shared a territory between their two disciplines. *Distilling Knowledge* suggests that scientific revolution may wear a different appearance in different cultural contexts. The metaphor of the Scientific Revolution, Moran argues, can be expanded to make sense of alchemy and other so-called pseudo-sciences--by including a new framework in which "process can count as an object, in which making leads to learning, and in which the messiness of conflict leads to discernment." Seen on its own terms, alchemy can stand within the bounds of demonstrative science.

The Science of Cooking - Joseph J. Provost 2016-04-29

Written as a textbook with an online laboratory manual for students and adopting faculties, this work is intended for non-science majors / liberal studies science courses and will cover a range of scientific principles of food, cooking and the science of taste and smell. Chapters include: The Science of Food and Nutrition of Macromolecules; Science of Taste and Smell; Milk, Cream, and Ice Cream, Metabolism and Fermentation; Cheese, Yogurt, and Sour Cream; Browning; Fruits and Vegetables; Meat, Fish, and Eggs; Dough, Cakes, and Pastry; Chilies, Herbs, and Spices; Beer and Wine; and Chocolate, Candy and Other Treats. Each chapter begins with biological, chemical, and /or physical principles underlying food topics, and a discussion of what is happening at the molecular level. This unique approach is unique should be attractive to chemistry, biology or biochemistry departments looking for a new way to bring students into their classroom. There are no pre-requisites for the course and the work is appropriate for all college levels and majors.

The History of Magic - Éliphas Lévi 1922

Are you a muggle with a desire to unravel the mysteries of the dark arts? Or are you an auror who helps detect the dark wizards of the world? This invaluable volume, like Harry Potter's Hall of Prophecies, is a brilliant resource for those who wish to learn about the rites and mysteries of magic.

Brief biographies of great chemists, from Trevisan and Paracelsus to Bohr and Lawrence, provide a survey of the discoveries and advances that shaped modern chemistry

Witchcraft - P. G. Maxwell-Stuart 2003-09

This accessible study of witches, from their western origins in Greece and Rome, to their persecution in the 16th century and 20th-century paganism, aims to challenge some commonly held misconceptions about witches and witchcraft. Many witches, for example, were male and witches went unharmed and unpersecuted for much of history. Maxwell-Stuart discusses the connection between magic and heresy, stereotypical images of witches through the centuries and methods used to identify suspects. Chapters also consider famous trials and witches and the social and religious context for the witches who 'plagued' North America and Protestant England in the 17th century. The study is now available in a small paperback format.

The Emotional Power of Music - Tom Cochrane 2013-07-18

How can an abstract sequence of sounds so intensely express emotional states? How does music elicit or arouse our emotions? What happens at the physiological and neural level when we listen to music? How do composers and performers practically manage the expressive powers of music? How have societies sought to harness the powers of music for social or therapeutic purposes? In the past ten years, research into the topic of music and emotion has flourished. In addition, the relationship between the two has become of interest to a broad range of disciplines in both the sciences and humanities. The Emotional Power of Music is a multidisciplinary volume exploring the relationship between music and emotion. Bringing together contributions from psychologists, neuroscientists, musicologists, musicians, and philosophers, the volume presents both theoretical perspectives and in-depth explorations of particular musical works, as well as first-hand reports from music performers and composers. In the first section of the book, the authors consider the expression of emotion within music, through both performance and composing. The second section explores how music can stimulate the emotions, considering the psychological and neurological mechanisms that underlie music listening. The third section explores how different societies have sought to manage and manipulate the power of music. The book is valuable for those in the fields of music psychology and music education, as well as philosophy and musicology

Transylvanian Superstitions - Emily Gerard 2021-12-02

Lady Ranelagh - Michelle DiMeo 2021

"For centuries, historians have speculated about the life of Katherine Jones, Lady Ranelagh. The details of her relationship with Robert Boyle, her younger brother, have mostly remained a mystery, even though Boyle, "the father of chemistry," spent the last twenty-three years of his life residing in her home, with the two dying only one week apart in 1691. The dominant depiction of Lady Ranelagh shows her as a maternal figure to Boyle or as a patroness of European intellectuals of the Hartlib circle. Yet neither of these portraits captures the depth of her intellect or range of her knowledge and influence. Philosophers, mathematicians, and religious authorities sought her opinion on everything from decimalizing the currency to producing Hebrew grammars. Lady Ranelagh practiced medicine alongside distinguished male physicians, treating some of the most elite patients in London, and her medical recipes and testimony concerning the philosophers' stone both gained international circulation. She was an important influence on Boyle and a self-standing historical figure in her own right. Chemistry's Sister fills out Lady Ranelagh's legacy in the context of a historically sensitive and nuanced interpretation of gender, science, and religion. It reveals how one elite seventeenth-century woman, without suffering attacks on her "modesty," managed to gain the respect of diverse contemporaries, effect

social change, and shape science for centuries to come"--

Psychedelic Mystery Traditions - Thomas Hatsis 2018-09-11

A comprehensive look at the long tradition of psychedelic magic and religion in Western Civilization • Explores the use of psychedelics and entheogens from Neolithic times through Antiquity, the Middle Ages, and the Renaissance to the Victorian era and beyond • Reveals how psychedelics were integrated into pagan and Christian magical practices and demonstrates how one might employ a psychedelic agent for divination, sex magic, alchemy, communication with gods, and more • Examines the role of entheogens in the Mysteries of Eleusis in Greece, the worship of Isis in Egypt, the Dionysian mysteries, and the magical practices of the Thessalian witches as well as Jewish, Roman, and Gnostic traditions Unbeknownst--or unacknowledged--by many, there is a long tradition of psychedelic magic and religion in Western civilization. As Thomas Hatsis reveals, the discovery of the power of psychedelics and entheogens can be traced to the very first prehistoric expressions of human creativity, with a continuing lineage of psychedelic mystery traditions from antiquity through the Renaissance to the Victorian era and beyond. Describing how, when, and why different peoples in the Western world utilized sacred psychedelic plants, Hatsis examines the full range of magical and spiritual practices that include the ingestion of substances to achieve altered states. He discusses how psychedelics facilitated divinatory dream states for our ancient Neolithic ancestors and helped them find shamanic portals to the spirit world. Exploring the mystery religions that adopted psychedelics into their occult rites, he examines the role of entheogens in the Mysteries of Eleusis in Greece, the worship of Isis in Egypt, and the psychedelic wines and spirits that accompanied the Dionysian mysteries. The author investigates the magical mystery traditions of the Thessalian witches as well as Jewish, Roman, and Gnostic traditions. He reveals how psychedelics were integrated into pagan and Christian magical practices and demonstrates how one might employ a psychedelic agent for divination, magic, alchemy, or god and goddess invocation. He explores the use of psychedelics by Middle Eastern and medieval magicians and looks at the magical use of cannabis and opium from the Crusaders to Aleister Crowley. From ancient priestesses and Christian gnostics, to alchemists, wise-women, and Victorian magicians, Hatsis shows how psychedelic practices have been an integral part of the human experience since Neolithic times.

Money and Power - William D. Cohan 2011-04-12

The bestselling author of the acclaimed House of Cards and The Last Tycoons turns his spotlight on to Goldman Sachs and the controversy behind its success. From the outside, Goldman Sachs is a perfect company. The Goldman PR machine loudly declares it to be smarter, more ethical, and more profitable than all of its competitors. Behind closed doors, however, the firm constantly straddles the line between conflict of interest and legitimate deal making, wields significant influence over all levels of government, and upholds a culture of power struggles and toxic paranoia. And its clever bet against the mortgage market in 2007—unknown to its clients—may have made the financial ruin of the Great Recession worse. Money and Power reveals the internal schemes that have guided the bank from its founding through its remarkable windfall during the 2008 financial crisis. Through extensive research and interviews with the inside players, including current CEO Lloyd Blankfein, William Cohan constructs a nuanced, timely portrait of Goldman Sachs, the company that was too big—and too ruthless—to fail.

Madness and Civilization - Michel Foucault 2013-01-30

Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.
