Choosing 360: A Guide to Evaluating Multi-rater Feedback Instruments for Management

Development - Ellen Van Velsor 1997-06-01

Feedback is a rare commodity in organizational life, but it is key to managerial effectiveness.

One increasingly popular vehicle for getting feedback from one's boss, peers, and subordinates is the multiple-perspective, or 360-degree, feedback instrument. Use of such an instrument can enhance self-confidence by highlighting individual strengths and can facilitate greater self-awareness by pointing out

areas in need of further development. Because of the availability of so many feedback instruments, finding the best instruments for an organization's needs is difficult. This book presents a step-by-step process that shows how to evaluate multiple-feedback instruments intended for management development. The steps take you through such issues as instrument development, validity and reliability, feedback display, scoring strategies, and cost.

Measurement Demystified - David Vance
2020-11-17

Your Groundbreaking Framework for

Measurement and Reporting Most people find measurement, analytics, and reporting daunting—and L&D professionals are no different. As these practices have become critically important for organizations' efforts to improve performance, talent development professionals have often been slow to embrace them for many reasons, including the seeming complexity and challenge of the practices. Few organizations have a well-thought-out measurement and reporting strategy, and there are often scant resources, limited time, and imperfect data to work with when organizations do attempt to create one. *Measurement Demystified: Creating Your L&D Measurement, Analytics, and Reporting Strategy* is a much-needed and welcomed resource that breaks new ground with a framework to simplify the discussion of measurement, analytics, and reporting as it relates to L&D and talent development practitioners. This book helps practitioners select and use the right measures

for the right reasons; select, create, and use the right types of reports; and create a comprehensive measurement and reporting strategy. Recognizing the angst and reluctance people often show in these areas, authors and experts David Vance and Peggy Parskey break down the practices and processes by providing a common language and an easy-to-use structure. They describe five types of reports, four broad reasons to measure, and three categories of measures. Their method works for large and small organizations, even if yours is an L&D staff of one or two. The guidance remains the same: Start small and grow. *Measurement Demystified* is a great first book for talent development professionals with no prior knowledge of or experience with measurement and a valuable resource for measurement experts. Those adept at lower levels of training evaluation will grow their knowledge base and capabilities, while measurement experts will discover shortcuts and nuggets of information to enhance their

practices. A more comprehensive treatment of these important topics will not be found elsewhere.

leadership effectiveness by building our strengths to a whole new level of practical implementation, providing us with a brilliantly clear road map. I have found this body of work to be absolutely invaluable . . . I cannot imagine a person in a leadership role today who would not find value from reading this book cover to cover." -- Loren M. Starr, Senior Managing Director and Chief Financial Officer, Invesco Ltd. How to Be Exceptional is a milestone in the emerging business case for evidence-based management. Building on two decades of earlier research, the authors brilliantly lay out a simple, concrete, scientifically validated model for achieving consistently superior business results through leadership. . . . 360-Degree Feedback - David C. Nystrom
2001-03-01

360-degree feedback is a powerful multi-dimensional leadership development tool that draws upon the knowledge of people within a

person's own circle of influence: supervisors, peers, and direct reports. It is most widely used for development, yet many organizations also use it for administrative purposes. This thesis examines the efficacy of 360-degree feedback through an in-depth research review that establishes when 360-degree feedback is effective and what conditions enhance or detract from its effectiveness. The thesis explains how 360-degree feedback was developed and examines its rapid growth in popularity. The argument for multi-dimensional performance feedback is then discussed in terms of four factors that have changed the role of leadership as we have moved from the Industrial Age/Cold War to globalization and the Information Age. As leadership's roles change, so must the goals of leadership development. A review of successful organizations reveals that many are using 360-degree feedback for modern leadership development, reinforced by similar systems for administrative performance appraisal. Research

on 360-degree feedback reveals effectiveness conditions, design and implementation considerations, and four categories of potential benefits. Large Group Interventions with Appreciative Inquiry for collaborative design/implementation and positive change management also are discussed. The thesis ends with strong recommendations for the use of 360-degree feedback for both Navy leadership development and administrative appraisal.
