

2030 Seoul Master Plan Seoul Metropolitan Government

Recognizing the pretentiousness ways to get this ebook **2030 Seoul Master Plan Seoul Metropolitan Government** is additionally useful. You have remained in right site to begin getting this info. get the 2030 Seoul Master Plan Seoul Metropolitan Government member that we have the funds for here and check out the link.

You could purchase guide 2030 Seoul Master Plan Seoul Metropolitan Government or acquire it as soon as feasible. You could quickly download this 2030 Seoul Master Plan Seoul Metropolitan Government after getting deal. So, behind you require the book swiftly, you can straight get it. Its as a result no question simple and consequently fats, isnt it? You have to favor to in this freshen

Local Energy Autonomy - Fanny Lopez 2019-07-30

In recent years, interest for local energy production, supply and consumption has increased in academic and public debates. In particular, contemporary energy transition discourses and strategies often emphasize the search for increased local energy autonomy, a phrase which can refer to a diverse range of configurations, both in terms of the spaces and scales of the local territory considered and in terms of what is meant by energy autonomy. This book explores policies, projects and processes aimed at increased local energy autonomy, with a particular focus on their spatial, infrastructural and political dimensions. In doing so, the authors – Sabine Barles, Bruno Barroca, Guilhem Blanchard, Benoit Boutaud, Arwen Colell, Gilles Debizet, Ariane Debourdeau, Laure Dobigny, Florian Dupont, Zélia Hampikian, Sylvie Jaglin, Allan Jones, Raphael Ménard, Alain Nadaï, Angela Pohlmann, Cyril Roger-Lacan, Eric Vidalenc – improve our understanding of the always partial and controversial processes of energy relocation that articulate forms of local metabolic self-sufficiency, socio-technical decentralization and political empowerment. Comprising fifteen chapters, the book is divided into four parts: Governance and Actors; Urban Projects and Energy Systems; Energy Communities; and The Challenges of Energy Autonomy.

Sustainable Cities Reimagined - Stanislav E. Shmelev 2019-11-14

To assess urban sustainability performance, this book explores several clusters of cities, including megacities, cities of the Global South, European and North American cities, cities of the Middle East and North Africa, cities of Central and South East Asia, a city state of Singapore and a large group of global cities. It applies a multi-criteria approach using a panel of environmental, economic, social and smart indicators to assess progress and policies in global cities including London, New York, Hong Kong, San Francisco, Los Angeles, São Paulo, Rio de Janeiro, Buenos Aires, Paris, Berlin, Stockholm, Moscow, Beijing, Seoul, Singapore, Shanghai, Sydney, Tokyo and many others. Additional attention is given to the issues of climate change, poverty and smart dimensions, with renewable energy and the drivers of urban CO2 emissions playing the central role. This book is abundant with case studies considering strategies, policies and performance of the leading cities, including San Francisco, Stockholm and Seoul in greater depth, exploring how their successes can be used by other cities. The book identifies key linkages between different smart and sustainability dimensions as well as investment opportunities in cities with sustainability potential. This book will be of great interest to policy makers, city and regional authorities as well as scholars and students of urban planning and sustainable development aiming to facilitate a sustainability transition in our cities around the world.

Cities and Climate Change - OECD 2010-11-29

This book shows how city and metropolitan regional governments working in tandem with national governments can change the way we think about responding to climate change.

[Planning for Greying Cities](#) - Tzu-Yuan Stessa Chao 2017-12-06

Planning for Greying Cities: Age-Friendly City Planning and Design Research and Practice highlights how modern town planning and design act as a positive force for population ageing, taking on these challenges from a user-oriented perspective. Although often related to 'healthy city' concepts, the contexts of age-friendly cities and communities (AFCC) were not emphasized until the early 2000s. Planning for Greying Cities is the first book to bring together fundamental and cutting-edge research exploring dimensions of age-friendly cities in different spatial scales. Chapters examine the ageing circumstances and challenges in

cities, communities, and rural areas in terms of land use planning, urban design, transport planning, housing, disaster resilience, and governance and empowerment, with international case studies and empirical research results of age-friendly environment studies. It is essential reading for academics and practitioners in urban planning, gerontology, transport planning, and environmental design.

Resilient Cities - Konrad Otto-Zimmermann 2011-05-16

Even with significant reductions of greenhouse gas emissions, a certain degree of climate change will inevitably occur. Adapting to climate change, then, will become a necessary step in reducing the vulnerability of many regions across the globe. This is especially true for urban areas where climate change has been shown to have particularly destabilizing effects. Through the identification and analysis of the most relevant impacts facing urban areas, this book makes clear the need to incorporate climate change concerns into the mainstream of local planning, governance and policy making practices. Adaptation as a workable concept within urban areas cannot be treated in isolation from the many pre-existing challenges facing cities. By offering numerous examples of ongoing adaptation programs and strategies across a wide range of contexts, the authors show the growing potential of cities in the fight against climate change. This book has its origins in a collection of papers originally presented at the Resilient Cities 2010 Congress in Bonn, Germany (May 2010), the first global forum on cities and adaptation to climate change, convened by ICLEI – Local Governments for Sustainability. In this volume, the first in a new series dedicated to this annual event, a range of contributors bring their perspectives to bear on the most pressing issues and controversies surrounding adaptation to climate change within cities. These writings will prove invaluable to anyone interested in understanding and confronting climate change at the local level.

Vertical Cities - Maloutas, Thomas 2022-10-20

Exploring the social implications of dense and compact cities, this enlightening book looks at micro-scale segregation through several lenses. These include the ways that the housing market constantly reconfigures social mix, how the structure of the housing stock shapes it, and the ways that policies are deployed to manage these effects.

Green Growth and Low Carbon Development in East Asia - Fumikazu Yoshida 2015-05-08

The concept of green growth, coupled with one of green economy and low carbon development, is a global concern especially in the face of the multiple crises that the world has faced in recent years - climate, oil, food, and financial crises. In East Asia, this concept is regarded as the key in transforming cheap-labour dependent, export-oriented industries towards a more sustainable development. Green Growth and Low Carbon Development in East Asia examines the beginnings of low carbon, green growth in practice in East Asia and how effectively it has directed East Asian nations, especially Korea, China and Japan, to put environment and climate challenges as the core target zone for investment and growth. Special focus is paid to energy and international trade - areas in which these nations compete with pioneered nations of Europe and the United States to develop renewable energy industries and enhance their international competitiveness. On the basis of the lessons learned in East Asia, together with a comparison of Russia, this book discusses the applicability and limitations of this developmental approach taken by the developing nations and resource-rich emerging economies, including the conditions and contexts in which nations are able to transition into sustainable development through the use of low carbon, green growth strategies.

[Urban Transport Governance and Inclusive Development in Korea](#) - OECD 2017-03-28

This report analyses the relationship between urban transport and inclusive development in Korea.

Low-Carbon Smart Cities - Kwi-Gon Kim 2017-07-10

This book aims to integrate climate mitigation and adaptation tools into conventional urban planning. It emphasizes the value and importance of ICT as connected technology. The author believes that ICT and IOT can facilitate controlling climate change attributes when deployed with appropriate ingredients and composition in cities in an integrated comprehensive manner. It was written with the author's firm belief that cities play an important role in mitigating climate change by reducing energy consumption, promoting the use of renewable energy sources, or by trading emission permits and selling Certified Emission Rights (CERs). This book looks at green growth based on the circular economy using green smart technology as a sustainable tool for green economic development. Also for climate change adaptation, cities have to take actions to reduce the adverse impacts of climate change on people, property and ecosystems in the urban planning process. It has been written with the author's works for Urban Environment Accords (UEA) and International Urban Training Center (IUTC) in collaboration with UNEP, World Bank, UNFCCC and UN-HABITAT. It can be used as a training source book for city climate planners and urban practitioners of local governments. It will be utilized as a more practical guidebook for climate change policy makers as well as a futuristic research agenda for next generations.

China's Sustainability Transitions - Ali Cheshmehzangi 2021-05-26

This book considers the impact of global climate change, advocating to promote sustainable development from the perspective of low carbon and climate resilience, by reducing carbon emissions in different aspects of urban and regional development. As the world's largest emitter of carbon dioxide, China is continuously exploring a sustainable path to achieve the momentous goal of 2060 carbon neutrality. In addition, this book reviews and summarizes China's green development and predicts the transformation of China's carbon emission and energy structure before and after the peak of carbon emission in 2030. It examines the role of governance in decarbonization efforts, focusing on decision making processes, policies and regulations, as well as the significance of regions, cities, and communities. This book highlights typical methods of implementing and achieving low carbon development in light of China's practical situation, which helps to resolve some of the problems that may arise in achieving the carbon neutral goal. Therefore, this book is suitable for the reference of scholars in low-carbon environment science, sustainable urban development, and other related fields. It also provides inspiration for China's medium and long-term sustainable development plans in the future.

Artificial Intelligence and International Law - Chae-min Yi 2022

"This book examines the timely issue of artificial intelligence (AI) and law. At this moment, AI is rapidly developing and being utilized in many different sectors. Meanwhile, the rise of AI raises complex questions and poses new challenges. New products and services involving AI will require new regulations and standards to minimize potential negative side-effects and maximize the benefits of this new technology, both within domestic law and international law. Thus, this book focuses on the impact of AI on international law and seeks ways to develop international law frameworks to adequately address the challenges of the AI era. In this context, new forms of inter-state conflicts and emergence of new subjects and objects of international law are discussed along with relevant up-to-date developments in major jurisdictions. Issues arising from the advent of AI relating to state sovereignty, state responsibility, dispute settlements, and north-south divide are also considered"--Publisher's description.

Capital Cities and Urban Sustainability - Robert W. Orttung 2019-03-25

Capital Cities and Urban Sustainability examines how capital cities use their unique hub resources to develop and disseminate innovative policy solutions to promote sustainability. Cities are taking a leading role in defining a sustainable future at a time when national, state, and regional governments in several countries do not provide sufficient leadership. Capital cities stand out among cities as likely leading drivers in the effort to empower sustainable innovation as they provide a hub for connecting a variety of key constituencies. While acknowledging the successes capital cities have achieved, the international, multi-disciplinary contributors to this work discuss how there is room to do more and improve. The promotion of specific sustainability policies in crucial areas such as clean water provision, high tech innovation, public procurement contracting, and improving flood control in capital cities is examined through various global

case studies. The examples range from relatively rich capital cities, such as Copenhagen, where the well-financed hub would be expected to succeed in generating sustainable policies, to poorer cities such as Phnom Penh, where such an optimistic outcome can seem less likely.

Narrating the City - Ayşegül Akçay Kavakolu 2020-11-15

Analysing a variety of international films and, ultimately, placing them in dialogue with video art, photographic narratives and emerging digital image-based technologies, the contributions explore the expanding range of 'mediated' narratives of contemporary architecture and urban culture from both a media and a sociological standpoint. Each chapter presents an interesting critical approach to the diversity of topics with clear explanation of the contextual framework and methodology, and a consistent depth of analysis. In the three sections of the book, authors underline the continual role of film and media in creating moving image narratives of the city, identifying how it creates cinematic - and ever more frequently digital - topographies of contemporary urban culture and architecture, re-presenting familiar cities, modes of seeing, cultures and social questions in unfamiliar ways. This filmic emphasis is placed into dialogue with a more diverse range of related visual media, which illustrates the overlaps between them and reveals how moving image technologies create unique visual topographies of contemporary urban culture and architecture. In making this shift from the filmic to the new age of digital image making and alternative modes of image consumption, the book not only reveals new techniques of representation, mediation and the augmentation of sensorial reality for city dwellers; its emphasis on 'narrative' offers insights into critical societal issues. These include cultural identity, diversity, memory and spatial politics, as they are both informed by and represented in various media. The focus for the book is on how films can produce mediation of urban life and culture by connecting the notions of identity, diversity and memory. Both the subject and the approach are gaining in popularity in recent years. This book's main feature is its dual perspective, involving both practical and theoretical stances - and it is this approach that makes it a particularly relevant and original contribution. Primary readership will be academics, scholars, undergraduate and postgraduate students and practitioners interested in architecture and media in general, film, moving images, urban studies in particular. Also of relevance to sociologists and those interested in cultural theory. The inclusion of chapters on urban photography and art installations may also be of interest to students and designers in these areas.

Governing the City - OECD 2015-02-18

This report presents a typology of metropolitan governance arrangements observed across OECD countries and offers guidance for cities seeking for more effective co-ordination, with a closer look at two sectors that are strategic importance for urban growth: transport and spatial planning.

Sustainable Development Goals in the Republic of Korea - Tae Yong Jung 2018-05-15

This book explores the attempts of South Korea in its to achieve the UN's Sustainable Development Goals (SDGs) by 2030. It addresses 6 of the 17 goals - clean water, affordable and clean energy, decent work and economic growth, sustainable cities and communities, climate action, and partnership - and defines specific national strategies. For each strategy, the contributors define the research indicators they selected, then analyze and examine the extent to which South Korea has met the SDG concerned. They draw these conclusions from national and international reports, government documents and policy papers on SDGs. South Korea's experience in sustainable development and green programs will contribute to the planning of long-term development strategies for developing countries.

Partnerships for Livable Cities - Cor van Montfort 2020-06-29

In this volume scholars from around the world discuss the innovative forms of collaboration between public and private actors that contribute to making our cities more liveable. It offers helpful insights into the practices of partnerships and the ways in which partnerships can contribute to a more liveable urban environment. The liveability of our cities is a topic of increasing relevance and urgency. The world's cities are becoming congested and polluted, putting pressure on affordable housing and causing safety to become a major problem. Urban governments are unable to address these major challenges on their own, and thus they seek cooperation with other governments, companies, civil society organizations, and citizens. By focusing on examples such as greenery in the city, affordable housing, safety, neighbourhood revitalization, and 'learning by doing' in urban living labs, this book asks two key questions. How do partnerships between

public and private actors contribute to the liveability of cities? Under what conditions are partnerships successful, and when do they fail to yield the desired results?

Governing Climate Change - Jolene Lin 2018-06-21

First systematic study of global cities as lawmakers in the world of transnational climate change governance.

Regenerating Urban Land - Rana Amirtahmasebi 2016-06-02

Regenerating Urban Land draws on the experience of eight case studies from around the world. The case studies outline various policy and financial instruments to attract private sector investment in urban regeneration of underutilized and unutilized areas and the requisite infrastructure improvements. In particular, each case study details the project cycle, from the scoping phase and determination of the initial amount of public sector investment, to implementation and subsequent leveraged private-sector funds. This manual analyzes rates of return on the investments and long-term financial sustainability. Regenerating Urban Land guides local governments to systematically identify the sequence of steps and tasks needed to develop a regeneration policy framework, with the participation of the private sector. The manual also formulates specific policies and instruments for expanding private sector participation; structuring effective administrative and legal frameworks; utilizing land readjustment/assembly methods; determining duration of contracts, adequate phasing, and timeline; and balancing the distribution of risk and sustainability measures.

The Governance of Land Use in Korea Urban Regeneration - OECD 2019-11-04

This report examines land-use trends, policies and practices in Korea, in particular in the city of Busan, through the lens of urban regeneration and citizen participation. Land-use planning is critical for the efficient and inclusive management of cities, pursuing sustainable and balanced development and improving quality of life and regional competitiveness.

Community-Based Urban Development - Im Sik Cho 2016-12-04

The book compares different approaches to urban development in Singapore and Seoul over the past decades, by focusing on community participation in the transformation of neighbourhoods and its impact on the built environment and communal life. Singapore and Seoul are known for their rapid economic growth and urbanisation under a strong control of developmental state in the past. However, these cities are at a critical crossroads of societal transformation, where participatory and community-based urban development is gaining importance. This new approach can be seen as a result of a changing relationship between the state and civil society, where an emerging partnership between both aims to overcome the limitations of earlier urban development. The book draws attention to the possibilities and challenges that these cities face while moving towards a more inclusive and socially sustainable post-developmental urbanisation. By applying a comparative perspective to understand the evolving urban paradigms in Singapore and Seoul, this unique and timely book offers insights for scholars, professionals and students interested in contemporary Asian urbanisation and its future trajectories.

Metropolitan Circles Development And The Future Of Urbanization - Lijun Yang 2020-03-19

This book discusses lessons and challenges of metropolitan circles development and urbanization in Asia, Europe, North America, Latin America and Africa. The book examines the effects of local governance systems, central-local relations, and administrative borders on metropolitan area development. It surveys economic, social and environmental issues, with an emphasis on how interconnectivity, circular economy, and climate issues should be integrated into megaregion development planning. The chapters are selected papers from the international conference on metropolitan circles development and urbanization jointly held by the Institute of Public Policy (IPP) at the South China University of Technology and UNESCO in 2018. Contributors from the US, the UK, Japan, France, Singapore, Indonesia, Mexico, Tanzania present their questions, observations, and analyses in a narrative and descriptive style which appeal to a wide range of audience.

Seeking A Better Urban Future - Koon Hean Cheong 2018-12-05

Dr Cheong Koon Hean, CEO of the Housing and Development Board (2010-Present) was the Institute of Policy Studies' 5th S R Nathan Fellow for the Study of Singapore. This book contains edited versions of the three IPS-Nathan Lectures she gave between March and April 2018, and highlights of her dialogue with the

audience. Climate change, an ageing population, anti-globalisation sentiments the world over, technological disruption, and social media all pose unique problems and opportunities to cities. Dr Cheong examines how cities deal with their urban challenges to create a better life for their citizens. In particular, what are the considerations needed to plan and develop Singapore in the face of rapid change and uncertainty, given our constraints as a small city-state with an open economy? The IPS-Nathan Lectures series was launched in 2014 as part of the S R Nathan Fellowship for the Study of Singapore. The S R Nathan Fellow delivers a series of lectures during their term to advance public understanding and discussion of issues of critical national interest.

Trends in Urbanisation and Urban Policies in OECD Countries What Lessons for China? - OECD 2010-08-27

This report presents an overview of trends in urban policies in OECD countries with the objective to identify successes and failure that could inform national Chinese policy-makers in their preparation of an Urbanisation Strategy.

Understanding Smart Cities: A Tool for Smart Government or an Industrial Trick? - Leonidas G. Anthopoulos 2017-04-13

This book investigates the role of smart cities in the broader context of urban innovation and e-government, identifies what a smart city is in practice and highlights their importance to the welfare of society. The book offers specific, measurable, and action-oriented public sector planning and management principles and ideas for smart governance in the era of global urbanization and innovation to help with the challenges in maintaining the democratic system of checks and balances as well as the division of powers in a highly interconnected world. The book will be of interest researchers, practitioners, students, and public sector IT professionals that work within innovation management, public administration, urban technologies and urban innovation, and public local administration studies.

Tourism Events in Asia - Azizul Hassan 2018-12-19

The roles and impacts of planned events within tourism are of increasing importance for destination competitiveness. Tourism Events in Asia is a unique contribution to the understanding of the impacts of events in the development planning, promotion and marketing of destinations in the rapidly growing tourism market of Asia. Balancing theory and practical examples, the book analyses the tools and techniques of branding, marketing and media involvement as well as visitor motivations for successful tourism events in Asia. It reviews a range of different event types from dark tourism festivals, film tourism festivals, cultural heritage tourism festivals, food tourism festivals, business events, sports events; and meeting, incentives, conferences and exhibitions (MICE) and much more. Written by an international team of authors, this book is essential reading for anyone interested in the Asian tourism events market and will be a valuable resource for students and researchers of events, tourism, marketing and branding.

Sustainable, Smart and Solidary Seoul - Tony Robinson 2022-09-30

This book showcases how innovative state policy in Korea transformed Seoul from one of the world's most impoverished, polluted, and congested cities into a global leader in green urban planning, smart city innovations, and social economy initiatives that have dramatically improved the local quality of life. Today, Seoul's urban planning innovations are increasingly touted as replicable best practices for export to cities across the globe. This book describes how innovative state policy has made Seoul a world leader in sustainable, smart, and solidary urban initiatives. Beginning in the 1960s, Seoul led the fastest urbanization and modernization project in world history, becoming a colossal 26-million-person metropolitan region and one of the largest footprints of humanity on earth, transforming the nation from one of the world's poorest to having the 10th largest GDP in 2020. Today, Seoul has become one of the most productive and innovative urban agglomerations on earth. Seoul's residents enjoy the world's highest penetration of high-speed internet, a model mass transit system, and advanced smart-city technologies. The vast city has become increasingly green and sustainable, while also recycling about 90% of all waste. Seoul has become a leader in social economy innovations like cooperative villages, mutual benefit societies, and social investment funds that advance equitable development goals amid a booming capitalist economy. To broaden our imagination of what good urbanism can achieve, this book reviews Seoul's recent innovations in smart, sustainable, and solidary urbanism, including: green urban planning, sustainable development through recycling and reuse, well-managed mass transit, smart city design, and solidarity economy initiatives.

Urbane Transformationen - Martina Hekler

Wie gestalten sich die verkehrspolitischen und -planerischen Prioritätensetzungen für einen Verkehr der Zukunft in den asiatischen Städten Seoul und Singapur unter dem Einfluss von urbaner Governance und Partizipation? Die Studie analysiert die relevanten institutionellen Strukturen, die Entscheidungsprozesse sowie die jeweils gewählten politischen Strategien. Technologieoffenheit, langfristige Planung und konsequente Realisierung sind zentrale Treiber der Entwicklungsstrategien in Seoul und Singapur.

Koreana - Summer 2015 (English) - The Korea Foundation 2015-09-03

KOREANA is a full-color quarterly on Korean culture and arts, including traditional heritage as well as modern and contemporary activities. Each issue includes in-depth coverage of a selected theme, followed by an array of articles on artists and artisans, historic and cultural landmarks, natural attractions, reviews of stage performances and exhibitions, literary pieces, and today's lifestyles.

CeDEM Asia 2016 - Skoric, Marko M. 2017

The Conference for E-Democracy and Open Government Asia 2016 presents papers that cover the latest developments in digital governance and politics. The integration of digital information and communication technologies in citizens' everyday lives sustainably changes the interaction with governments. Politics already embraces digital and mobile technologies and government follows the example. These conference proceedings reflect on the impact of a permanently connected society on forms of governance and political communication. The CeDEM Asia 2016 brings together experts from academia and practitioners as well as representatives of business and policy makers. The conference provides a forum for transcontinental exchange and inspires the audience to consciously change and broaden their perspectives on their research.

World Cities and Nation States - Greg Clark 2016-11-10

World Cities and Nation States takes a global perspective to show how national governments and states/provinces/regions continue to play a decisive, and often positive, partnership role with world cities. The 16 chapter book is comprised of two introductory chapters, 12 central chapters that draw on case studies, and two summary chapters - draws on over 40 interviews with national ministers, city government officials, business leaders and expert academics.

[Megacity Seoul](#) - Yu-Min Joo 2019-01-09

In Asia, there are a growing number of gigantic megacities, accompanied by a series of speculative and extravagant megaprojects. Amid the fast-paced urban and development challenges, many Asian governments have been searching for replicable and inspirational cases in Asia. South Korea and its capital city, Seoul, are among frequently referenced models. However, South Korea's "economic miracle" in the late twentieth century has been mostly studied through an economic policy lens. This book revisits the development of South Korea by looking at its urban dimension and exploring the city of Seoul as a developmental megaproject. Offering an alternative to the focus on economic policies when it comes to explaining South Korea's development successes, Joo looks at the urbanization that took place under the guidance of the strong developmental state. She provides empirical evidence of the "property state" at work, both complementing and supporting the developmental state. She also analyzes why and how Seoul was able to emerge as an important Asian global city and a global front-runner in terms of ambitious and pioneering urban investments, despite its relatively recent history marked by massive slums and urban poverty. This book provides an analytical framework for studying South Korea's modern development under capitalism as a precursor to East Asian urbanism and development. It paints a comprehensive story of how cities have been politically and economically important to Korea's development experience and are increasingly becoming a new mode of development.

Smart cities - Netexplo

Globalizing Regional Development in East Asia - Henry Wai-chung Yeung 2013-09-13

Significant historical and geographical differences account for the many processes and trajectories of regional development in East Asia. These historical and geographical specificities in East Asia have prompted serious re-examination of existing theories in regional development, and in particular the "new regionalism" approach associated with such ideas as the learning region, institutional thickness, relational

assets, and regional innovation system. This book brings together a group of leading researchers specializing in local and regional development in East Asian economies. Through in-depth empirical studies of specific regions and localities, these authors offer fresh and innovative perspectives on how regions evolve and develop over time in the world's most dynamic macro-regional economy. In particular, their work points to the critical importance of local and trans-local processes in shaping regional development trajectories. The book is timely given that the debate on the nature and dynamics of regional development in both academic and policy circles has now moved on. From the earlier focus on endogenous regional assets (such as localized networks of association and trust), scholars and policymakers are now analyzing the complex relationship between economic globalization and regional change. This high calibre collection makes a significant contribution to the literature on local and regional development in Asia and provides an important resource for researchers, students, and policy makers interested in East Asia. This book was published as a special issue of *Regional Studies*.

Planning for Greying Cities - Tzu-Yuan Stessa Chao 2017-12-06

Planning for Greying Cities: Age-Friendly City Planning and Design Research and Practice highlights how modern town planning and design act as a positive force for population ageing, taking on these challenges from a user-oriented perspective. Although often related to 'healthy city' concepts, the contexts of age-friendly cities and communities (AFCC) were not emphasized until the early 2000s. Planning for Greying Cities is the first book to bring together fundamental and cutting-edge research exploring dimensions of age-friendly cities in different spatial scales. Chapters examine the ageing circumstances and challenges in cities, communities, and rural areas in terms of land use planning, urban design, transport planning, housing, disaster resilience, and governance and empowerment, with international case studies and empirical research results of age-friendly environment studies. It is essential reading for academics and practitioners in urban planning, gerontology, transport planning, and environmental design.

Walkable and Bikeable Cities - 2016

Seoul, Korea's Global City - Kyoung-Ho Shin 2020-05-27

Seoul, as one of Asia's rising global cities, has been a place where enormous changes in politics, industry, and culture have taken place over the last five decades. This book explores the new urbanism in Seoul from the perspective of global political economy, focusing on the contexts in which the city has witnessed the transformation of its population structure, such as the rise of the global urban middle class and the city's increased nodal function in commodity chains. The burgeoning signs of Seoul's status as a global city are discussed in terms of transnational tourism and the frequency of study abroad, the immigrant community, and cross-border cultural flows. Examining the labour structures within the city, economic growth policy, the role of advanced information technology, and neoliberal urban development, the authors also examine the local response in the city to its emerging status. A study of the development of the Korean capital and its deep embeddedness in the world economy, *Seoul, Korea's Global City* will appeal to scholars of sociology, geography and economics with interests in political economy, urban studies and Asian studies.

Road Infrastructure, Inclusive Development and Traffic Safety in Korea - OECD 2016-04-22

This report combines empirical research on the relationship between road infrastructure, inclusive economic development and traffic safety with an assessment of policies and governance structures to help governments find ways to create effective, safe and inclusive transport infrastructures.

[Sustainable Cities in Asia](#) - Federico Caprotti 2017-08-31

With Asia's cities undergoing unprecedented growth in the 21st century, lauded the 'urban century' by many, *Sustainable Cities in Asia* provides a timely examination of the challenges facing cities across the continent including some of the projects, approaches and solutions that are currently being tested. This book uses numerous case studies, analysing topical issues ranging from city cycling in India, to green spaces in China, to the use of community-led energy generation projects in post-Fukushima Japan. Containing contributions from an international team of scholars, it also takes a multi-disciplinary approach and draws on examples from a wide range of countries, including China, India, Japan, Korea, Taiwan, Singapore and the United Arab Emirates. Ultimately, by providing a comprehensive discussion of the broader debates around the shape of sustainable urbanism, it demonstrates that Asia is one of the most

active regions in terms of the development of sustainable city strategies. Tackling the contemporary issues of key importance for sustainability, such as property markets, migration and transport, this book will appeal to students and scholars of Urban Geography, Sustainability, Environmental Studies and Asian studies.

Social Economy in Asia - Euiyoung Kim 2021-02-25

In Social Economy in Asia: Realities and Perspectives, thirteen scholars from various academic disciplines analyze the reality and different understandings of the social economy in Asia. By providing detailed case studies, engaging in comparative and global discussions, and examining theoretical and policy-relevant implications, the contributors to this collection argue that the Asian social economy has uniquely benefited as a modern economic system with a human-centric approach.

'Difficult Heritage' in Nation Building - Hyun Kyung Lee 2019-04-23

This book explores South Korean responses to the architecture of the Japanese colonial occupation of Korea and the ways that architecture illustrates the relationship between difficult heritage and the formation of national identity. Detailing the specific case of Seoul, Hyun Kyung Lee investigates how buildings are selectively destroyed, preserved, or reconstructed in order to either establish or challenge the cultural identity of places as new political orders are developed. In addition, she illuminates the Korean traditional concept of feng shui as a core indigenous framework for understanding the relationship between space and power, as it is associated with nation-building processes and heritagization. By providing a detailed study of a case little known outside of East Asia, 'Difficult Heritage' in Nation Building will expand the framework of Western-centered heritage research by introducing novel Asian perspectives.
