The Great Indoors - Ben Highmore 2014-01-02

'House' has long been synonymous with 'home': the significance of four walls and a roof lies far deeper than simply shelter from the elements. A house stands for sanctuary, family, belonging, privacy and our pasts: even when standardised as a 'Barratt Home' or modern housing estate, every house bears the stamp of the people who live in it, remaining a bastion of quirky individualism. The Great Indoors is the first cultural history of the family home in the twentieth century, comparable to Rachel Hewitt's Map of a Nation or Joe Moran's Queuing for Beginners. As society has changed, so has the house: the hall - which had its finest hour during the middle ages, when families and their servants ate, slept and socialised there together - has now been relegated to a mere passageway, only useful for getting to other (more private) rooms. Highmore shows how houses display the currents of class, identity and social transformation that are displayed in the arrangement and use of the family home. And he also offers an engaging and stimulating peek through the curtains to explain why the fridge is used as a communication centre, how the loo (or toilet) inspired its very own literary genre and what your furniture arrangement reveals about how you function as a family.

The Architecture of Happiness - Alain De Botton 2010-12-03

Bestselling author Alain de Botton considers how our private homes and public edifices influence how we feel, and how we could build dwellings in which we would stand a better chance of happiness. In this witty, erudite look at how we shape, and are shaped by, our surroundings, Alain de Botton applies Stendhal's motto that "Beauty is the promise of happiness" to the spaces we inhabit daily. Why should we pay attention to what architecture has to say to us? de Botton asks provocatively. With his trademark lucidity and humour, de Botton traces how human needs and desires have been served by styles of architecture, from stately Classical to minimalist Modern, arguing that the stylistic choices of a society can represent both its cherished ideals and the qualities it desperately lacks. On an individual level, de Botton has deep sympathy for our need to see our selves reflected in our surroundings; he demonstrates with great wisdom how buildings — just like friends — can serve as guardians of our identity. Worrying about the shape of our sofa or the colour of our walls might seem self-indulgent, but de Botton considers the hopes and fears we have for our homes at a new level of depth and insight. When shopping for furniture or remodelling the kitchen, we don't just consider functionality but also the major questions of aesthetics and the philosophy of art: What is beauty? Can beautiful surroundings make us good? Can beauty bring happiness? The buildings we find beautiful, de Botton concludes, are those that represent our ideas of a meaningful life. The Architecture of Happiness marks a return to what Alain does best — taking on a subject whose allure is at once tantalizing and a little forbidding and offering to readers a completely beguiling and original exploration of the subject. As he did with Proust, philosophy, and travel, now he does with architecture.

Examining Listening - Ardeshir Geranpayeh 2013-03-27

This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

Smart Swarm - Peter Miller 2011-04

How Understanding Flocks, Schools and Colonies Can Make Us Better at Communicating, Decision Making and Getting Things Done. The modern world may be obsessed with speed and productivity, but twenty-first century humans actually have much to learn from the ancient instincts of swarms. A fascinating new take on the concept of collective intelligence and its colourful manifestations in some of our most complex problems, Smart Swarm introduces a compelling new understanding of the real experts on solving our own complex problems relating to such topics as business, politics, and technology. Based on extensive globe-trotting research, this lively tour from National Geographic reporter Peter Miller introduces thriving throngs of ant colonies, which have inspired computer programs for streamlining factory processes, telephone networks, and truck routes; termites, used in recent studies for climate-control solutions; schools of fish, on which the U.S. military modelled a team of robots; and many other examples of the wisdom to be gleaned about the behaviour of crowds-among critters and corporations alike. In the tradition of James Surowiecki's *The Wisdom of Crowds* and the innovative works of Malcolm Gladwell, Smart Swarm is an entertaining yet enlightening look at small-scale phenomena with big implications for us all.

Pieces of Light - Charles Fernyhough 2013-03-19

Short-listed for the Royal Society Winton Prize for Science Books, the Best Book of Ideas Prize, and the Society of Biology Book Awards • Book of the Year: Sunday Times, Sunday Express, and New Scientist “In its stunning blend of the literary with the scientific, Pieces of Light illuminates ordinary and extraordinary stories to remind us that who we are now has everything to do with who we were once, and that identity itself is intricately rooted the transporting moments of remembrance. We are what we remember.” — André Aciman, author of Out of Egypt and Harvard Square A new consensus is emerging among cognitive scientists: rather than possessing fixed, unchanging memories, we create new recollections each time we are called upon to remember. As psychologist Charles Fernyhough explains, remembering is an act of narrative imagination as much as it is the product of a neurological process. In Pieces of Light, he illuminates this compelling scientific breakthrough in a series of personal stories, each illustrating memory's complex synergy of cognitive and neurological functions. Combining science and literature, the ordinary and the extraordinary, this fascinating tour through the new science of autobiographical memory helps us better understand the ways we remember—and the ways we forget.

Mohs Micrographic Surgery - Stephen N. Snow 2004

Mohs Micrographic Surgery, an advanced treatment procedure for skin cancer, offers the highest potential for recovery—even if the skin cancer has been previously treated. This procedure is a state-of-the-art treatment in which the physician serves as surgeon, pathologist, and reconstructive surgeon. It relies on the accuracy of a microscope to trace and ensure removal of skin cancer down to its roots. This procedure allows dermatologists trained in Mohs Surgery to see beyond the visible disease and to precisely identify and remove the entire tumor, leaving healthy tissue unharmed. This procedure is most often used in treating two of the most common forms of skin cancer: basal cell carcinoma and squamous cell carcinoma. The cure rate for Mohs Micrographic Surgery is the highest of all treatments for skin cancer—up to 99 percent even if other forms of treatment have failed. This procedure, the most exact and precise method of tumor removal, minimizes the chance of regrowth and lessens the potential for scarring or disfigurement
