Capital Ideas - Jeffrey M. Chwieroth 2009-12-14
The right of governments to employ capital controls has always been the official orthodoxy of the International Monetary Fund, and the organization's formal rules providing this right have not changed significantly since the IMF was founded in 1945. But informally, among the staff inside the IMF, these controls became heresy in the 1980s and 1990s, prompting critics to accuse the IMF of indiscriminately encouraging the liberalization of controls and precipitating a wave of financial crises in emerging markets in the late 1990s. In *Capital Ideas*, Jeffrey Chwieroth explores the inner workings of the IMF to understand how its staff's thinking about capital controls changed so radically. In doing so, he also provides an important case study of how international organizations work and evolve. Drawing on original survey and archival research, extensive

interviews, and scholarship from economics, politics, and sociology, Chwieroth traces the evolution of the IMF's approach to capital controls from the 1940s through spring 2009 and the first stages of the subprime credit crisis. He shows that IMF staff vigorously debated the legitimacy of capital controls and that these internal debates eventually changed the organization's behavior--despite the lack of major rule changes. He also shows that the IMF exercised a significant amount of autonomy despite the influence of member states. Normative and behavioral changes in international organizations, Chwieroth concludes, are driven not just by new rules but also by the evolving makeup, beliefs, debates, and strategic agency of their staffs.

5000 Miles at 8000 RPM - Joe Berk 2015-09-19
5000 Miles At 8000 RPM is the story of how CSC Motorcycles brought the Zongshen RX3 250cc adventure touring motorcycle to America, including detailed, behind-the-scenes reports on Zongshen's manufacturing and quality assurance, the US Environmental Protection Agency and California Air Resources Board certification processes, CSC's dealer-free path to market, and the planning and execution of CSC's customer-centered adventure touring approach. The book includes detailed tales from the 1700-mile CSC Inaugural Baja Run and the 5000-mile Western America Adventure Ride, along with a no-holds-barred review of the RX3's strengths and weaknesses. 5000 Miles At 8000 RPM includes more than 70 color photographs. If you are a motorcycle enthusiast, this book is one you don't want to miss!

Please Be Careful What You Say - Angella Wynn 2021-10-19

Clean up on aisle 4! Have you ever been in a moment where you spilled something out of your mouth and it's all over the place and now you can't call it back? Yes! Clean up on Aisle 4! This read will cause you to first, take a hold of your thoughts, and second, cause you to taste your words before you serve them to someone else. Angella's personable experiences, from childhood to now, with words spoken to her or about her have put her in the seat with pen and paper to write. There are many challenges she faced: loss of parents, crippling disease, and more. Through her writing, you can take a ride down the path and hear the experiences of the hills and valleys that could have caused many words to be released from her, but with the help of the Holy Spirit, she chose a different course of action. Take a read and set your heart, mind, and mouth...and PLEASE BE CAREFUL WHAT YOU SAY! My prayer for every reader is to have a moment where their brain and senses come alive to the knowledge of the fact that our words carry weight.

The Pink Cookbook - 2007

'The Pink Cookbook' is a unique collection of recipes with one thing in common - all the contributors have been affected in some way by breast cancer. Not only is this a great opportunity to raise money for a worthwhile cause, but also to treat yourself or your loved ones to over 200 delicious, feel-good recipes. What better excuse to invite your family and friends over for a meal, cook a romantic dinner or get the girls round for a girls' night in! Within these pages you'll find dishes for every occasion, from breakfasts and light bites to exotic dinners, alongside quotes from the contributors and histories of the recipes. Whether you are vegetarian or meat-eater, in need of a comforting bowl of 'Sweet Lamb Tagine', a nutritious 'Strawberry and Pineapple Smoothie' or simply a decadent 'Butterscotch Brownie', 'The Pink Cookbook' will inspire keen cooks everywhere. Breast Cancer Care is the UK's leading provider of information, practical assistance and emotional support for anyone affected by breast cancer. Every year they give direct support to over 22,000 people with breast cancer or breast health concerns through their helpline, peer support and other direct services. In addition, they respond to two million requests for support and information about breast cancer or breast health concerns through their publications, website and outreach work. All Breast Cancer Care's services are free.

The Role of Renewable Energy Technology in Holistic Community Development -

Alexander Zahnd 2014-01-25

This thesis documents almost twenty years of the author's work on the development and implementation of a new approach to holistic community development in remote and disadvantaged villages in Nepal. It describes the theoretical basis of the work, the main research activities, and the practical outcomes of the implemented programs. One of the fundamental cornerstones of holistic community development is the provision of appropriate and sustainable solutions for the long-term development of local communities. This requires that people's own identified needs be recognized and addressed in partnership with them in holistic ways. The author explains the many synergies that result from this holistic approach to community

development. Another cornerstone of his approach is to utilise the communities' locally available renewable resources for long-term sustainable development. One of the key findings of the thesis is that improved access to energy services, such as cooking with a smokeless metal stove in a clean indoor environment, basic indoor lighting, and increased food production and safe food storage (through a greenhouse and a solar drier respectively), need to be at the very heart of any long-term holistic community development project. The thesis demonstrates that tapping into locally available renewable energy resources and converting them, through contextualized and locally manufactured renewable energy technologies, has a central role in long-term holistic community development programs. Such programs are successful because they provide both appropriate technologies and life-changing experiences for the local users involved.

Orogenic Andesites and Plate Tectonics - J. B. Gill 2012-12-06

Students of a phenomenon as common but complex as andesite genesis often are overwhelmed by, or overlook, the volume and diversity of relevant information. Thus there is need for periodic overview even in the absence of a dramatic breakthrough which "solves the andesite problem" and even though new ideas and data keep the issues in a state of flux. Thus I have summarized the subject through mid-1980 from my perspective to help clarify the long-standing problem and to identify profitable areas for future research. Overviews are more easily justified than achieved and there are fundamental differences of opinion concerning how to go about them. It is professionally dangerous and therefore uncommon for single authors, especially those under 35 such as I, to summarize a broad, active field of science in book-length thoroughness. Review articles in journals, multi-authored books, or symposia proceedings appear instead. The single-authored approach is intimidating in scale and can result in loss of thoroughness or authority on individual topics. The alternatives lack scope or integration or both.

Isde 1983 - Paul Clipper 2019-01-05

The 1983 Six Days in Wales was supposed to be America's great chance to finally come home with the World Trophy. The year before in Czechoslovakia, the American team, mudders all, came within a whisker of winning the great prize, and the bogs of Wales in 1983 were set for the final showdown. In the end, bad trouble was our constant companion in Wales, starting with the injury that sidelined one of our top Trophy Team members, and ending with unrelenting bad weather and subsequent machine breakdowns. This is the story of that week.

The Neurocognition of Dance - Bettina Bläsing 2010-07-02

Dance has always been an important aspect of all human cultures, and the study of human movement and action has become a topic of increasing relevance over the last decade, bringing dance into the focus of the cognitive sciences. This book discusses the wide range of interrelations between body postures and body movements as conceptualised in dance with perception, mental processing and action planning. The volume brings together cognitive scientists, psychologists, neuroscientists, choreographers, and ballet teachers, to discuss important issues regarding dance and cognition. First, scientists introduce ideas that offer different perspectives on human movement and therefore can be applied to dance. Secondly, professionals from the world of dance have their say, reporting on how their creative and pedagogical work relates to cognition and learning. Finally, researchers with personal links to the dance world demonstrate how neurocognitive methods are applied to studying different aspects related to dance. This book is suitable for students and professionals from the fields of psychology, neuropsychology, cognitive psychology, sport psychology and sport science,

movement science, motor control, motor development, kinesiology, dance, choreography, dance education and dance therapy; to teachers who want to teach dance to students of any age.

It Gets Even Better - Isabela Oliveira 2021-09-17

These stories are about identity, relationships, and community. They're about hope, acceptance, affirmation, and joy. And most of all, in a time when uncertainty feels inescapable and overwhelming, they're about taking one another by the hand and choosing together to embrace the unknown. The possibilities are endless. This anthology is full of uplifting, affirming short stories about queer possibility by an outstanding lineup of speculative fiction authors including Charlie Jane Anders, Zen Cho, Amy Griswold, Nibedita Sen, Merc Fenn Wolfmoor, and S.L. Huang.

Light-Emitting Diodes - E. Fred Schubert 2006-06-08

Revised and fully updated, the second edition of this graduate textbook offers a comprehensive explanation of the technology and physics of LEDs such as infrared, visible-spectrum, ultraviolet, and white LEDs made from III-V semiconductors. Elementary properties such as electrical and optical characteristics are reviewed, followed by the analysis of advanced device structures. With nine additional chapters, the treatment of LEDs has been vastly expanded, including new material on device packaging, reflectors, UV LEDs, III-V nitride materials, solid-state sources for illumination applications, and junction temperature. Radiative and non-radiative recombination dynamics, methods for improving light extraction, high-efficiency and high-power device designs, white-light emitters with wavelength-converting phosphor materials, optical reflectors, and spontaneous recombination in resonant-cavity structures are discussed in detail. With exercises, solutions,

and illustrative examples, this textbook will be of interest to scientists and engineers working on LEDs and graduate students in electrical engineering, applied physics, and materials science.

The Role of Pregnancy Nutrition in Maternal and Offspring Health - Ekaterina Maslova
2019-12-03

In pregnancy, maternal nutrition sustains and nourishes the developing child. Imbalances in either the direction of nutritional excess or deficiency can have adverse consequences for child health. In addition, more research now suggests that good pregnancy nutrition influences child health beyond pregnancy and delivery. This includes modifying the risk of child health outcomes as they enter childhood and adulthood through influences on placental development, hormonal pathways, and organ structure and function. Poor pregnancy nutrition may also compromise maternal health during pregnancy, which may have long-term consequences for women's health.

Understanding the biological and social mechanisms operating during pregnancy can help in the design of better clinical and public health interventions. This Special Issue on "The Role of Pregnancy Nutrition in Maternal and Offspring Health" includes etiological and mechanistic studies of pregnancy nutrition with short- and long-term maternal and child health outcomes, including original research, narrative reviews, and systematic reviews and meta-analyses. Together, this body of work provides important insights into the influence of dietary patterns, food groups, and nutrients on pregnancy outcomes, and long-term neurodevelopmental, respiratory, and metabolic health in the children. It also highlights nutritional consequences for specific groups of women, including those with pregnancy complications and eating disorders.

Radio Frequency and Microwave Electronics Illustrated - Matthew M. Radmanesh 2001
Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance

matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

14th International Conference on Hand-Arm

Vibration - Deutsche Gesetzliche Unfallversicherung (DGUV) 2019-05-30
 In May 2019, the Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung (IFA) was hosting the 14th International Conference on Hand-Arm-Vibration. The event is organised every four years under the auspices of international expert bodies at changing places. It is aimed at all stakeholders in the subject, whether experts from the occupational safety and health and research communities or management personnel in the areas of manufacture and design. Mechanized manual work is often associated with exposure to vibration that may impact adversely upon the health and well-being of the affected individuals. Besides impairments to comfort and performance, harm to the hand-arm system, possibly permanent, must be prevented as a matter of priority. In a world of work that is becoming more and more complex, combined exposures are also becoming increasingly relevant. What influence does hand-arm vibration have in conjunction with noise or whole-body vibration? What contribution can be made by medicine, diagnostics, epidemiology, measurement technology and prevention to the identification and containment of risks, and better still, to their elimination? What is the role of international regulatory activity in this context? The 14th International Conference on Hand-Arm Vibration aimed to address these and many other questions concerning hand-arm vibration, and to find answers relevant to the field.

Recent Advances in Mechanical Engineering - Anil Kumar 2021-05-25

This book presents the select proceedings of the second International Conference on Recent Advances in Mechanical Engineering (RAME 2020). The topics covered include aerodynamics and fluid mechanics, automation, automotive engineering, composites, ceramics and polymers processing, computational mechanics, failure and fracture mechanics, friction, tribology and surface engineering, heating and ventilation, air conditioning system, industrial engineering, IC engines, turbomachinery and alternative fuels, machinability and formability of materials, mechanisms and machines, metrology and computer-aided inspection, micro- and nano-

mechanics, modelling, simulation and optimization, product design and development, rapid manufacturing technologies and prototyping, solid mechanics and structural mechanics, thermodynamics and heat transfer, traditional and non-traditional machining processes, vibration and acoustics. The book also discusses various energy-efficient renewable and non-renewable resources and technologies, strategies and technologies for sustainable development and energy & environmental interaction. The book is a valuable reference for beginners, researchers, and professionals interested in sustainable construction and allied fields.
