Corporate Law and the Theory of the Firm - Wm. Dennis

Huber 2020-05-08

Dozens of judicial opinions have held that shareholders own corporations, that directors are agents of shareholders, and even that directors are trustees of shareholders' property. Yet, until now, it has never been proven. These doctrines rest on unsubstantiated assumptions.

In this book the author performs a rigorous, systematic analysis of common law, contract law, property law, agency law, partnership law, trust law, and corporate statutory law using judicial rulings that prove shareholders do not own corporations, that there is no separation of ownership and control, directors are not agents of shareholders, and shareholders are not investors in

corporations. Furthermore, the author proves the theory of the firm, which is founded on the separation of ownership and control and directors as agents of shareholders, promotes an agenda that wilfully ignores fundamental property law and agency law. However, since shareholders do not own the corporation, and directors are not agents of shareholders, the theory of the firm collapses. The book corrects decades of confusion and misguided research in corporate law and the economic theory of the firm and will allow readers to understand how property law, agency law, and economics contradict each other when applied to corporate law. It will appeal to researchers and upper-level and graduate students in economics, finance, accounting, law, and sociology, as well as attorneys and accountants.

The Rise of the Uncorporation - Larry E. Ribstein 2010

"So far the analysis of business associations largely has been limited to corporations. Yet

unincorporated firms, including general and limited partnerships and limited liability companies, comprise about a third of the firms in the United States, and even larger percentages elsewhere in the world. The Rise of the Uncorporation covers the history, law, and finance of unincorporated firms." --Book Jacket.

The Governance of Close Corporations and Partnerships - Joseph McCahery 2004

This volume focuses upon the processes by which new business organization forms have developed in the US, UK, and continental Europe. Part I addresses the theoretical developments in partnership and close corporation law. In Part II, the contributors offer insights into the forces shaping the evolution of partnership-type business forms in the US, UK, and several European jurisdictions, and Part III provides detailed analyses of the Limited Liability Company (LLC), Limited Liability Partnership (LLP), the European Private Company,

and the Dutch partnership form. The debate on the design of business organization forms adapted to meet the current needs of a range of closely held firms has gained momentum amid the continuing pressures to supply the most competitive business form for small and medium-sized enterprises (SMEs). Which economic and political forces are responsible for the emergence of new limited liability forms for SMEs? Over the last decade this question has often been addressed, as corporate law scholars, practitioners, and policymakers have increasingly directed their attention towards introducing partnership-type business forms. In the US, states have incentives to take a proactive attitude towards legislative innovations in the field of business organization law, so as to capture and retain closely held firms. In recent years, a rapid succession of statutory innovations of partnership forms (such as the introduction of the LLC and rapid adoption of the LLP) have transformed

business organization law. Similar processes can also be identified in the UK and continental Europe. While the EC has pursued the harmonization of the law of public corporations, there has been no real attempt to adopt a series of similar measures for the benefit of closely held firms. A group of European business leaders and experts, however, have drafted recently a business organization statute appropriate for SMEs engaged in cross-border business.

The Anatomy of Corporate Law - Reinier Kraakman

2009-07-23

This is the long-awaited second edition of this highly regarded comparative overview of corporate law. This edition has been comprehensively updated to reflect profound changes in corporate law. It now includes consideration of additional matters such as the highly topical issue of enforcement in corporate law, and explores the continued convergence of corporate law across jurisdictions. The authors start from the premise that corporate (or company) law across jurisdictions addresses the same three basic agency problems: (1) the opportunism of managers vis-à-vis shareholders; (2) the opportunism of controlling shareholders vis-à-vis minority shareholders; and (3) the opportunism of shareholders as a class vis-à-vis other corporate constituencies, such as corporate creditors and employees. Every jurisdiction must address these problems in a variety of contexts, framed by the corporation's internal dynamics and its interactions

with the product, labor, capital, and takeover markets. The authors' central claim, however, is that corporate (or company) forms are fundamentally similar and that, to a surprising degree, jurisdictions pick from among the same handful of legal strategies to address the three basic agency issues. This book explains in detail how (and why) the principal European jurisdictions, Japan, and the United States sometimes select identical legal strategies to address a given corporate law problem, and sometimes make divergent choices. After an introductory discussion of agency issues and legal strategies, the book addresses the basic governance structure of the corporation, including the powers of the board of directors and the shareholders meeting. It proceeds to creditor protection measures, related-party transactions, and fundamental corporate actions such as mergers and charter amendments. Finally, it concludes with an examination of friendly acquisitions, hostile

takeovers, and the regulation of the capital markets.

Comparative Company Law -

Carsten Gerner-Beuerle
2019-05-06

Comparative Company Law provides a systematic and coherent exposition of company law across jurisdictions, augmented by

extracts taken from key judgments, legislation, and scholarly works. It provides an overview of the legal framework of company law in the US, the UK, Germany, and France, as well as the legislative measures adopted by the EU and the relevant case law of the Court of Justice. The comparative analysis of legal frameworks is firmly grounded in legal history and legal and economic theory and bolstered by numerous extracts (including extracts in translation) that offer the reader an invaluable insight into how the law operates in context. The book is an essential guide to how company law cuts across borders, and how different jurisdictions shape the corporate lifespan from its formation by way of incorporation to its demise (corporate insolvency) and eventual dissolution. In addition, it offers an introduction to the nature of the corporation, the framework of EU company law, incorporation and corporate

representation, agency problems in the firm, rights of stakeholders and shareholders, neutrality and defensive measures in corporate control transactions, legal capital, piercing the corporate veil, and corporate insolvency and restructuring law.
