Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Rather like the nerves in human body, communication forms the sinew and tendon of any social body. The quality of everyday life is not only affected by the way we design our work and institutions, but also (perhaps more importantly) by the way we interact and communicate with each other. This booklet attempts to help its readers to become more effective oral communicators in various scenarios. Every chapter in this booklet is largely divided into three parts: (1) reflective and motivational quotations, (2) guidelines for communication in a certain context, and (3) versatile phrases for that context. The quotations are intended to emotionally and philosophically motivate the readers to

strive for better communication. The guidelines are intended to cognitively guide the readers in their communication practices. And the versatile phrases are intended to logistically supply for the readers' communication practices.
