Jazz Sells: Music, Marketing, and Meaning -

Mark Laver 2015-02-11
Jazz Sells: Music, Marketing, and Meaning examines the issues of jazz, consumption, and capitalism through advertising. On television, on the Internet, in radio, and in print, advertising is a critically important medium for the mass dissemination of music and musical meaning. This book is a study of the use of the jazz genre as a musical signifier in promotional efforts, exploring how the relationship between brand, jazz music, and jazz

discourses come together to create meaning for the product and the consumer. At the same time, it examines how jazz offers an invaluable lens through which to examine the complex and often contradictory culture of consumption upon which capitalism is predicated.

Autos and Progress - Joel Wolfe 2010-02-16
Autos and Progress reinterprets twentieth-century Brazilian history through automobiles, using them as a window for understanding the

nation's struggle for modernity in the face of its massive geographical size, weak central government, and dependence on agricultural exports. Among the topics Wolfe touches upon are the first sports cars and elite consumerism; intellectuals' embrace of cars as the key for transformation and unification of Brazil; Henry Ford's building of a company town in the Brazilian jungle; the creation of a transportation infrastructure; democratization and consumer culture; auto workers and their creation of a national political party; and the economic and environmental impact of autos on Brazil. This focus on Brazilians' fascination with automobiles and their reliance on auto production and consumption as keys to their economic and social transformation, explains how Brazil--which enshrined its belief in science and technology in its national slogan of Order and Progress--has differentiated itself from other Latin American nations. Autos and Progress engages key issues in Brazil around the

meaning and role of race in society and also addresses several classic debates in Brazilian studies about the nature of Brazil's great size and diversity and how they shaped state-making.

This collection examines how greed should be understood and appraised. Roundly condemned by virtually all religions, greed receives mixed appraisals in the domains of business and economics. The volume examines these mixed appraisals and how they fare in light of their implications for greed in our everyday world. Greed in children is uniformly criticized by parents, other adults, and even children's peers. However, in adulthood, greed is commended by some as essential to profit-seeking in business and for offering the greatest promise in promoting economic prosperity for everyone. Those who advocate a more permissive position on greed in the adult world

typically concede that some constraints on greed are needed. However, the supporting literature offers little analysis of what greed is (as distinct from, for example, the effort to meet modest needs, or the pursuit of ordinary self-interested ends). It offers little clarification of what sorts of constraints on greed are needed. Nor is careful attention given to difficulties children might have in making a transition without moral loss from regarding greed as inappropriate to its later qualified acceptance. Through a secular approach, this book attempts to make significant inroads in remedying these shortcomings.

Future Powertrain

Technologies - Stephan

Rinderknecht 2020-12-17

Among the various factors greatly influencing the development process of future powertrain technologies, the trends in climate change and digitalization are of huge public interest. To handle these trends, new disruptive technologies are integrated

into the development process. They open up space for diverse research which is distributed over the entire vehicle design process. This book contains recent research articles which incorporate results for selecting and designing powertrain topology in consideration of the vehicle operating strategy as well as results for handling the reliability of new powertrain components. The field of investigation spans from the identification of ecologically optimal transformation of the existent vehicle fleet to the development of machine learning-based operating strategies and the comparison of complex hybrid electric vehicle topologies to reduce CO2 emissions.

Advantages and Weaknesses of the Volkswagen Group (VW). Value Chain and SWOT Analysis -

Moniruzzaman Kiron
2019-11-11

Submitted Assignment from the year 2018 in the subject Business economics - Industrial Management, grade: A, , language: English, abstract: This report analyzes the Volkswagen Group (VW) Company's current operations and provide strategic recommendations to the board of directors of the company. This report describes on how to analyze the external and internal environment of the company by analytical frameworks. It starts with Company Background, where the company's mission and current operations will be described. Next is the Environmental Analysis, where a the SWOT analysis is applied for the company with consideration of Porter's Five Forces model and Value Chain

Analysis. Then, the paper identifies what the company's current sustainable competitive advantages and its weaknesses are. Recommendation on how to tackle these weaknesses will be given afterwards. For a huge company like Volkswagen it takes a lot of effort to maintain their great brand reputation, to sustain that they have to make sure they fulfill the needs and wants of their customers and satisfy them. Although the brand portfolio includes brands like Skoda, Bugatti and Lamborghini the company still ranks high in the mind of customers. Even so having some problems in the automotive industry recently they must start looking forward and try finding solution as it might affect their brand image which can cause them huge loss and maintain the trust and build a relation among their customers as well. Volkswagen items are strongly connected with so much feelings as security and sense of pride.

The Middle Class in World Society - Christian Suter

2020-05-21

This volume delves into the study of the world's emerging middle class. With essays on Europe, the United States, Africa, Latin America, and Asia, the book studies recent trends and developments in middle class evolution at the global, regional, national, and local levels. It reconsiders the conceptualization of the middle class, with a focus on the diversity of middle class formation in different regions and zones of world society. It also explores middle class lifestyles and everyday experiences, including experiences of social mobility, feelings of insecurity and anxiety, and even middle class engagement with social activism. Drawing on extensive fieldwork and in-depth interviews, the book provides a sophisticated analysis of this new and rapidly expanding socioeconomic group and puts forth some provocative ideas for intellectual and policy debates. It will be of importance to students and researchers of sociology, economics, development

studies, political studies, Latin American studies, and Asian Studies.

Faster, Higher, Farther: How One of the World's Largest Automakers Committed a Massive and Stunning Fraud - Jack Ewing 2017-05-23

"A rich history of a company whose cars, for better and worse, have touched millions of lives, a character study of a brilliant but deeply flawed leader, and a case study in how a corporate culture can turn toxic." —Bethany McLean, New York Times Book Review

Faster, Higher, Farther chronicles a corporate scandal that rivals those at Enron and Lehman Brothers—one that will cost Volkswagen more than \$22 billion in fines and settlements. Through meticulous reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install "defeat devices" in diesel vehicles that unlawfully lowered CO2 levels during emissions testing, and how the fraud was committed, covered up, and finally detected. *Faster, Higher,*

Farther is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.

The People's Car - Bernhard Rieger 2013-04-09

Bernhard Rieger reveals how a car commissioned by Hitler and designed by Ferdinand Porsche became a global commodity on a par with Coca-Cola. The Beetle's success hinged on its uncanny ability to capture the imaginations of executives, engineers, advertisers, car collectors, suburbanites, hippies, and everyday drivers across nations and cultures.

Global Cities - Robert Gottlieb 2018-08-28

How Los Angeles, Hong Kong, and China deal with such urban environmental issues as ports, goods movement, air pollution, water quality, transportation, and public space. Over the past four decades, Los Angeles, Hong Kong, and key urban regions of China have emerged as global cities—in financial, political, cultural, environmental, and demographic terms. In this book, Robert Gottlieb and Simon Ng trace the global emergence of these urban areas and compare their responses to a set of six urban environmental issues. These cities have different patterns of development: Los Angeles has been the quintessential horizontal city, the capital of sprawl; Hong Kong is dense and vertical; China's new megacities in the Pearl River Delta, created by an explosion in industrial development and a vast migration from rural to urban areas, combine the vertical and the horizontal. All

three have experienced major environmental changes in a relatively short period of time. Gottlieb and Ng document how each has dealt with challenges posed by ports and the movement of goods, air pollution (Los Angeles, Hong Kong, and urban China are all notorious for their hazardous air quality), water supply (all three places are dependent on massive transfers of water) and water quality, the food system (from seed to table), transportation, and public and private space. Finally they discuss the possibility of change brought about by policy initiatives and social movements.

Faster, Higher, Farther -

Jack Ewing 2018-04-05

A shocking exposé of Volkswagen's fraud by the New York Times reporter who covered the scandal. Updated with a New Afterword by the Author. When news of Volkswagen's clean diesel fraud first broke in September 2015, it sent shockwaves around the world. Overnight, the company long associated

with quality, reliability and trust became a universal symbol of greed and deception. Consumers were outraged, investors panicked, the company embarrassed and facing bankruptcy. As lawsuits and criminal investigations piled up, by August 2016 VW had settled with American regulators and car-owners for \$15 billion, with additional fines and claims still looming. In *Faster, Higher, Farther*, Jack Ewing rips the lid off the scandal. He describes VW's rise from "the people's car" during the Nazi era to one of Germany's most prestigious and important global brands, touted for being "green." He paints vivid portraits of Volkswagen chairman Ferdinand Piëch and chief executive Martin Winterkorn, arguing that their unremitting ambition drove employees, working feverishly in pursuit of impossible sales targets, to illegal methods. With unprecedented access to key players and a ringside seat during the course of the legal proceedings, *Faster, Higher,*

Farther reveals how the succeed-at-all-costs culture prevalent in modern boardrooms led to one of corporate history's farthest-reaching cases of fraud--with potentially devastating consequences. As the future of one of the world's biggest companies remains uncertain, this is the extraordinary story of Volkswagen's downfall.

The Volkswagen Beetle - Jonathan Wood 2008-03-04

The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by

Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce *Allemagne d'aujourd'hui, n° 227/janvier-mars 2019* - Brigitte Lestrade 2019-03-07 Vu de l'extérieur, la transition énergétique allemande fait

Elgar Introduction to

Theories of Organizational Resilience - Luca Giustiniano 2018

With organizational environments becoming more unstable, uncertain and equivocal, the concept of resilience has become increasingly significant for management studies. Resilience connotes organizational, team and individual capacities to absorb external shocks and to learn from them, while simultaneously preparing for and responding to external jolts. This book pinpoints the essential aspects of managerial and organizational resilience and offers insights that stimulate critical thinking. As the concept of resilience is essentially made up of contrasting forces, the volume presents some innovative synthetic interpretation that allows a deeper comprehension of the phenomenon and provides managers and policy-makers with a solid basis for taking their decisions.
