[The Sociology of Food](#) - Jean-Pierre Poulain  
2017-02-09

A classic text about the social study of food, this is the first English language edition of Jean-Pierre Poulain's seminal work. Tracing the history of food scholarship, *The Sociology of Food* provides an overview of sociological theory and its relevance to the field of food. Divided into two parts, Poulain begins by exploring the continuities and changes in the modern diet. From the effect of globalization on food production and supply, to evolving cultural

responses to food - including cooking and eating practices, the management of consumer anxieties, and concerns over obesity and the medicalization of food - the first part examines how changing food practices have shaped and are shaped by wider social trends. The second part provides an overview of the emergence of food as an academic focus for sociologists and anthropologists. Revealing the obstacles that lay in the way of this new field of study, Poulain shows how the discipline was first established and explains its development over the last forty years. Destined to become a key text for students and scholars, *The Sociology of Food* makes a major contribution to food studies and sociology. This edition features a brand new chapter focusing on the development of food studies in the English-speaking world and a preface, specifically written for the edition.

**Learning To Talk** - Malcolm McIntosh  
2017-09-29

The UN Global Compact complements other corporate citizenship initiatives by promoting dialogue on the relationship between business and society. At the same time it is the only truly global corporate citizenship initiative. It is not an auditable standard; indeed, it is not a standard or a code in the way that these are normally viewed. It is a set of principles through

which business and the United Nations can work in partnership for global social development. For some businesses it is a simplified codification of their existing policies and management practices, but for many engagement represents a challenge and an opportunity to raise their game by aligning profitability with the common good. As the only genuinely global corporate citizenship initiative, the Global Compact draws its moral authority from the UN Secretary-General and its moral and political legitimacy from the UN as the only global political body. It can be viewed as a series of nested networks involving the Secretary-General's Office, the ILO, UNEP, UNHCHR, UNDP and UNIDO, business, NGOs and labour. It can variously be described as an international learning network, as a social network of people and organizations engaged in a global conversation, as a global public policy network, and as a multi-stakeholder dialogue. It is all of these things, but more than anything its greatest success has been in providing a convening platform for a growing global conversation about social development among a variety of actors. However the Global Compact is viewed, it is time to reflect on the first tentative steps of an initiative born in the aftermath of the Cold War, in the "triumph of global economic liberalism" and mass demonstrations against "globalisation". In its first few years, the world has experienced 9/11 and the Iraq War, not forgetting the forty or so civil wars that are ongoing at this time. Whatever is written about the UN Global Compact or its success will be tentative. But there can be some serious reflection on its aims and origins; some telling of stories of engagement; and discussion on how this initiative has quickly become an important reference point in the dialogue on global and corporate governance.

#### **Towards a New Industrial Democracy -**

Michael Poole 2017-10-03

This title, originally published in 1986, explores the political and economic conditions of the 1980s, and reflects the world-wide interest in industrial democracy. Each chapter analyses the main adaptations in policy, theory and experimentation that have occurred in industrial democracy in the 1980s. In particular, the role of managers is examined in depth and detail, since

these personnel have been responsible for a number of recent initiatives. The themes covered are vital for all those seeking new directions in the reform of modern industrial relations in the late 1980s and into the 1990s.

**Design Make Play for Equity, Inclusion, and Agency** - Harouna Ba 2021-08-17

This pioneering book offers a resource for educators, policymakers, researchers, exhibit designers, and program developers that illuminates creative, cutting-edge ways to inspire, engage, and motivate young people about STEM learning in both informal and formal education settings. A follow-up to the popular book *Design, Make, Play* (2013), this volume combines new research, innovative case studies, and practical advice from the New York Hall of Science (NYSCI) to define and illustrate a vision for creative and immersive learning, focusing on STEM learning experiences that are truly equitable and inclusive, and that foster learners' agency. Featuring contributions from program developers, facilitators, educators, exhibit designers, and researchers, the book provides real-world examples from informal and formal settings that fill the need for high-quality STEM learning opportunities that are accessible to all learners, including groups

underrepresented in STEM education and careers. Chapters of the book describe strategies such as using narratives to make engineering learning more inclusive, engaging English language learners in digital design, focusing on whole-family learning, and introducing underserved students to computational thinking through an immersive computer game. This book offers both a challenge and a guide to all STEM educators in museums, science centers, and other informal and formal education settings who are seeking out ambitious and more equitable forms of engagement. With leading-edge research and practical advice, the book provides appealing and accessible forms of engagement that will support a diverse range of audiences and deepen their approach to creative STEM learning. *The Gullah People and Their African Heritage* - William S. Pollitzer 2005-11-01

The Gullah people are one of our most distinctive cultural groups. Isolated off the South Carolina-Georgia coast for nearly three centuries, the native black population of the Sea Islands has developed a vibrant way of life that remains, in many ways, as African as it is American. This landmark volume tells a multifaceted story of this venerable society, emphasizing its roots in Africa, its unique imprint on America, and current threats to its survival. With a keen sense of the limits to establishing origins and tracing adaptations, William S. Pollitzer discusses such aspects of Gullah history and culture as language, religion, family and social relationships, music, folklore, trades and skills, and arts and crafts. Readers will learn of the indigo- and rice-growing skills that slaves taught to their masters, the echoes of an African past that are woven into baskets and stitched into quilts, the forms and phrasings that identify Gullah speech, and much more. Pollitzer also presents a wealth of data on blood composition, bone structure, disease, and other biological factors. This research not only underscores ongoing health challenges to the Gullah people but also helps to highlight their complex ties to various African peoples. Drawing on fields from archaeology and anthropology to

linguistics and medicine, *The Gullah People and Their African Heritage* celebrates a remarkable people and calls on us to help protect their irreplaceable culture.

**Amputation in Literature and Film** - Erik Grayson 2021-08-10

*Amputation in Literature and Film: Artificial Limbs, Prosthetic Relations, and the Semiotics of "Loss"* explores the many ways in which literature and film have engaged with the subject of amputation. The scholars featured in this volume draw upon a wide variety of texts, both lesser-known and canonical, across historical periods and language traditions to interrogate the intersections of disability studies with social, political, cultural, and philosophical concerns. Whether focusing on ancient texts by Zhuangzi or Ovid, renaissance drama, folktales collected by the Brothers Grimm, novels or silent film, the chapters in this volume highlight the dialectics of "loss" and "gain" in narratives of amputation to encourage critical dialogue and forge an integrated, embodied understanding of experiences of impairment in which mind and body, metaphor and materiality, theory and politics are considered as interrelated and interacting aspects of disability and ability.
