Life Is What You Make It - Peter Buffett 2011-05-03

From composer, musician, and philanthropist Peter Buffett comes a warm, wise, and inspirational book that asks, Which will you choose: the path of least resistance or the path of potentially greatest satisfaction? You may think that with a last name like his, Buffett has enjoyed a life of endless privilege. But the son of billionaire investor Warren Buffett says that the only real inheritance handed down from his parents was a philosophy: Forge your own path in life. It is a creed that has allowed him to follow his own passions, establish his own identity, and reap his own successes. In Life Is What You Make It, Buffett expounds on the strong set of values given to him by his trusting and broadminded mother, his industrious and talented father, and the many life teachers he has met along the way. Today's society, Buffett posits, has begun to replace a work ethic, relishing what you do, with a wealth ethic, honoring the payoff instead of the process. We confuse privilege with material accumulation, character with external validation. Yet, by focusing more on substance and less on reward, we can open doors of opportunity and strive toward a greater sense of fulfillment. In clear and concise terms, Buffett reveals a great truth: Life is random, neither fair nor unfair. From there it becomes easy to recognize the equal dignity and value of every human life—our circumstances may vary but our essences do not. We see that our journey in life rarely follows a straight line but is often met with false starts, crises, and blunders. How we push through and persevere in these challenging moments is where we begin to create the life of our dreams—from discovering our vocations to living out our bliss to giving back to others. Personal and revealing, instructive and intuitive, Life Is What You Make It is about transcending your circumstances, taking up the reins of your destiny, and living your life to the fullest.

Becoming the Iceman - Wim Hof 2011-11

Becoming the Iceman is a project inspired by Wim and Justin to show the world that anyone can adopt the ability to become an Iceman or Icewoman. The project's goal is to show that the ability to control the body's temperature is not a genetic defect in Wim, but an ability that can be adopted by everyone. For many generations, we have been taught to fear the cold: "Don't forget your jacket You don't want hypothermia, do you?" "Put your gloves on before you get frostbite "Of course, these are consequences of extreme cold exposure, but with the proper understanding, anyone can learn to use the cold as a natural teacher. You may have seen Wim Hof on television running barefoot through the snow or swimming in ice-cold waters. While performing those incredible feats, Wim remained completely warm and comfortable the entire time Wim is the epitome of what can happen if someone uses the cold to train the body. Like any new tool, you must understand how it works before you can use it efficiently. This pertains to the cold as well. You may be wondering, "How can you prove that anyone can learn this ability? Well, as of Fall 2009, Justin Rosales had no experience with the cold whatsoever. He was a college student attending Penn State University. After Justin's friend, Jarrett, showed him one of Wim's videos on YouTube, he became exceedingly interested in understanding this ability. He wanted to see if it was possible for anyone to learn. In Spring 2010, after speaking to Wim for several months via email, Wim invited Justin to attend his workshop in Poland. After many weeks of working as a dishwasher, Justin was able to pay for the trip and learn the technique of the Iceman. With more training and countless experiences with the cold, Justin began to slowly adapt. The length of time he could remain exposed increased dramatically. He quickly realized that the technique to withstand the cold was, indeed, an ability that could be learned by everyone. This book tells the tale of Wim and Justin's journey to *Becoming the Iceman*

You are fairly certain that you will never get to take a second trip to this destination; this will be your one opportunity. Now imagine that someone informs you that there are several people in your neighborhood who have been to that country, explored every corner. Some of them enjoyed the journey and have few regrets, but others wish they could take the trip again knowing what they know now. Would you not invite them over for dinner, ask them to bring their photographs, listen to their stories, and hear their advice? This is precisely the journey explored in this book. Dr. John Izzo and his colleagues interviewed over 200 people over the age of sixty (up to 106 years of age) who were identified by others as having lived happy lives and as having found purpose and contentment. The interviewees ranged from aboriginal elders to town barbers, from Holocaust survivors to former CEO's. In these interviews, each person was asked to reflect back on his or her life to identify the sources of happiness and meaning as well as lessons learned, regrets, major crossroads, and what did not contribute to meaning in their lives. Based on these interviews, and Dr. Izzo's twenty years experience helping people find more spirit and purpose, the book explores the secrets to finding contentment, happiness, and purpose. Using a powerful narrative voice, Dr. Izzo helps the reader understand the common themes from the lives of those interviewed, the commonality of what really matters in their lives, and especially how to put this wisdom into practice.

From Strength to Strength - Arthur C. Brooks 2022-02-15

The roadmap for finding purpose, meaning, and success as we age, from bestselling author, Harvard professor, and the Atlantic's happiness columnist Arthur Brooks. Many of us assume that the more successful we are, the less susceptible we become to the sense of professional and social irrelevance that often accompanies aging. But the truth is, the greater our achievements and our attachment to them, the more we notice our decline, and the more painful it is when it occurs. What can we do, starting now, to make our older years a time of happiness, purpose, and yes, success? At the height of his career at the age of 50, Arthur Brooks embarked on a seven-year journey to discover how to transform his future from one of disappointment over waning abilities into an opportunity for progress. *From Strength to Strength* is the result, a practical roadmap for the rest of your life. Drawing on social science, philosophy, biography, theology, and eastern wisdom, as well as dozens of interviews with everyday men and women, Brooks shows us that true life success is well within our reach. By refocusing on certain priorities and habits that anyone can learn, such as deep wisdom, detachment from empty rewards, connection and service to others, and spiritual progress, we can set ourselves up for increased happiness. Read this book and you, too, can go from strength to strength.

The midtwenties through the midthirties can be a time of difficult transition: the security blankets of college and parents are gone, and it's suddenly time to make far-reaching decisions about career, investments, and adult identity. When author Christine Hassler experienced what she calls the "twenties triangle", she found that she was not alone. In fact, an entire generation of young women is questioning their choices, unsure if what they've been striving for is what they really want. They're eager to set a new course for their lives, even if that means giving up what they have. Hassler herself left a fast-moving career that wasn't right for her and instead took the risk of starting her own business. Now, based on her own experience and interviews with hundreds of women, she shares heartfelt stories on issues from career to parents to boyfriends to babies. Yet she also provides practical exercises to enable today's woman to chart a new direction for her life.

Split-Second Persuasion - Kevin Dutton 2011-02-03

An "entertaining" look at the psychology and neuroscience behind the act of influencing others (Kirkus Reviews). People try to persuade us every day. From the news to the Internet to coworkers and family, everyone and everything wants to influence our thoughts in some way. And in turn, we hope to persuade others. Understanding the dynamics of persuasion can help us to achieve our own goals—and resist being manipulated by those who don't necessarily have our best interests at heart. Psychologist Kevin Dutton has identified a powerful strain of immediate, instinctual persuasion, a method of influence that allows people to disarm skepticism, win arguments, and close deals. With a combination of astute methods and in-depth research in the fields of psychology and neuroscience, Dutton's fascinating and provocative book: Introduces the natural super-persuaders in our midst: Buddhist monks, magicians, advertisers, con men, hostage negotiators, and even psychopaths. Reveals which hidden pathways in the brain lead us to believe something even when we know it's not true. Explains how group dynamics can make us more tolerant or deepen our extremism. Illuminates the five elements of SPICE (simplicity, perceived self-interest, incongruity, confidence, and empathy) for instantly effective persuasion. "[Split-Second Persuasion] offers some powerful insights into the art and science of getting people to do what you want." —New Scientist
