One Is a Snail, Ten Is a Crab Big Book - April Pulley Sayre 2010-03-09

What do one hundred sunbathing snails have in common with ten crabs in inner tubes? Check out this mirthful counting book with a focus on feet. If one is a snail and two is a person, we must be counting by feet! Just follow the sign to the beach, where a bunch of fun-loving crabs, lounging dogs, gleeful insects, and bewildered-

looking snails obligingly offer their feet for counting in a number of silly, surprising combinations — from one to one hundred!

Math Mammoth Grade 6 Review Workbook - Maria Miller 2015-08-14

Math Mammoth Grade 6 Review Workbook is intended to give students a thorough review of sixth grade math, following the main areas of Common Core Standards for grade 6 mathematics. The book has both topical as well as mixed (spiral) review worksheets, and includes both topical tests and a comprehensive end-of-the-year test. The tests can also be used as review worksheets, instead of tests. You can use this workbook for various purposes: for summer math practice, to keep the child from forgetting math skills during other break times, to prepare students who are going into seventh grade, or to give sixth grade students extra practice during the school year. The topics reviewed in this workbook are: review of the four basic operations expressions and equations decimals ratios percent factoring fractions integers geometry statistics In addition to the topical reviews and tests, the workbook also contains many cumulative (spiral) review pages. The content for these is taken from the Math Mammoth Grade 6 Complete Curriculum, so this workbook works especially well to prepare students for grade 7 in Math Mammoth. However, the content follows a typical study for grade 6, so this workbook can be used no matter which math curriculum you follow. Please note this book does not contain lessons or instruction for the topics. It is not intended for initial teaching. It also will not work if the student needs to completely re-study these topics (the student has not learned the topics at all). For that purpose, please consider the Math Mammoth Grade 6 Complete Curriculum, which has all the necessary instruction and lessons.

Sixth Grade Summer - Kay D. Did 2015-07-10

Read about a neighborhood of All-American kids, growing up. The stories will make you laugh and maybe cry. School was cool! Freedom and free thinking ruled the day. Girls were going through a revolutionary change and boys didn't have a chance. The boys were learning that the girls really did have something special. Summer romance and first loves are some of the many stories; but baseball, treeforts, fighting and much more are part of the story. Who knew girls could become sharks?"Out of the depths of the dark sea, Candy appeared like a large shark, with deep, dark eyes. It was like a scene from a prison movie; she swam by my table and dumped chocolate milk in my lunch tray. The boys laughed and had a heyday with that one. We went out to recess. As soon as Russ, Skip and I hit the exit doors there appeared Candy and her goon squad of six girls. Betty Smith, the Amazon Woman, Janet Betts, Ms Butch America, and several other girls who had hair on their upper lips. Betty said to Skip, "You're gettin' your ass kicked shrimp!" This excerpt is just one of many fun filled, action packed tales.

Go Math! - Houghton Mifflin Harcourt

Publishing Company 2015

The Zones of Regulation - Leah M. Kuypers
2011

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students'

understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.
