**Ethnic Families in America** - Charles H. Mindel 1981

These differences are embedded in what are generally known as "ethnic groups." **Seduced by Story** - Peter Brooks 2022-10-18

In this spiritual sequel to his influential *Reading for the Plot*, Peter Brooks examines the dangerously alluring power of storytelling. "There's nothing in the world more powerful than a good story. Nothing can stop it. Nothing can defeat it." So begins the scholar and literary critic Peter Brooks's reckoning with today's flourishing cult of story. Forty years after publishing his seminal work *Reading for the Plot*, his important contribution to what came to be known as the "narrative turn" in contemporary criticism and philosophy, Brooks returns to question the unquestioning fashion in which story is now embraced as an excuse or explanation and the fact that every brand or politician comes equipped with one. In a discussion that ranges from

The Girl on the Train to legal argument, Brooks reminds us that among the powers of narrative is the power to deceive.

Good Morning, Midnight - Lily Brooks-Dalton 2017-07-04  
“A remarkable and gifted debut novel” (Colson Whitehead) about two outsiders—a lonely scientist in the Arctic and an astronaut trying to return to Earth—as they grapple with love, regret, and survival in a

world transformed. THE INSPIRATION FOR THE NETFLIX ORIGINAL FILM THE MIDNIGHT SKY, DIRECTED BY AND STARRING GEORGE CLOONEY Augustine, a brilliant, aging astronomer, is consumed by the stars. For years he has lived in remote outposts, studying the sky for evidence of how the universe began. At his latest posting, in a research center in the Arctic, news of a catastrophic event arrives. The scientists are forced to evacuate, but Augustine stubbornly refuses to abandon his work. Shortly after the others have gone, Augustine discovers a mysterious child, Iris, and realizes that the airwaves have gone silent. They are alone. At the same time, Mission Specialist Sullivan is aboard the Aether on its return flight from Jupiter. The astronauts are the first human beings to delve this deep into space, and Sully has made peace with the sacrifices required of her: a daughter left behind, a marriage ended. So far the journey has been a success.

But when Mission Control falls inexplicably silent, Sully and her crewmates are forced to wonder if they will ever get home. As Augustine and Sully each face an uncertain future against forbidding yet beautiful landscapes, their stories gradually intertwine in a profound and unexpected conclusion. In crystalline prose, Good Morning, Midnight poses the most important questions: What endures at the end of the world? How do we make sense of our lives? Lily Brooks-Dalton's captivating debut is a meditation on the power of love and the bravery of the human heart. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SHELF AWARENESS AND THE CHICAGO REVIEW OF BOOKS "Stunningly gorgeous . . . The book contemplates the biggest questions—What is left at the end of the world? What is the impact of a life's work?"—Portland Mercury "A beautifully written, sparse post-apocalyptic novel that explores memory, loss and identity . . . Fans of Emily St. John Mandel's Station Eleven

and Kim Stanley Robinson's Aurora will appreciate the Brooks-Dalton's exquisite exploration of relationships in extreme environments."—The Washington Post

Family Development: A

The material also discusses child abuse and neglect, social media and ethnicity, and the future of social policy on child and family development. **Children's needs - parenting capacity** - Hedy Cleaver  
2011-10-12

This second edition of "Children's needs - parenting capacity" updates the original exploration of the research literature in the light of legal and policy changes in England and findings from more recent national and international research. The edition has also been expanded to cover parental learning disabilities and how it may impact on

parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual circumstances. While some children grow up apparently unscathed, others exhibit emotional and behavioural disorders. This knowledge can inform practitioners undertaking assessments of the needs of children and their families and effective service responses. This publication is essential reading for practitioners, managers and policy makers concerned with improving the outcomes for children and families who are experiencing such problems.

**Go See the Principal** - Gerry Brooks 2020-04-07

He tells jokes with the kind of mocking humor that gets a laugh, yet can be safely shared in school. The Horror!...dreaded assessments. Family Life Education - David J. Bredehoft 2009

*First-year Maternal Employment and Child Development in the First 7 Years* - Jeanne Brooks-Gunn 2010

Using data from the first two phases of the NICHD Study of Early Child Care, the links between maternal employment in the first 12 months of life and cognitive, social, and emotional outcomes for children at age 3, age 4.5, and first grade are examined. Families in which mothers worked full time (55%), part time (23%) or did not work in the first year (22%) are compared. Most families involved non-Hispanic White children although some analyses did involve African-American children. Structural equation modeling results indicated that, on average, the associations between first-year maternal employment and later cognitive, social, and emotional outcomes are neutral because negative effects, where present, are offset by positive effects. The results confirmed that maternal employment in the first year of life may confer

both advantages and disadvantages and that for the average non-Hispanic White child those effects balance each other.

**Handbook of Resilience in Children** - Sam Goldstein  
2012-08-04

Today's children face a multitude of pressures, from the everyday challenges of life to the increasing threats of poverty, exploitation, and trauma. Central to growing up successfully is learning to deal with stress, endure hardships, and thrive despite adversity. Resilience - the ability to cope with and overcome life's difficulties - is a quality that can potentially be nurtured in all young people. The second edition of the Handbook of Resilience in Children updates and expands on its original focus of resilience in children who overcome adversity to include its development in those not considered at risk, leading to better outcomes for all children across the lifespan. Expert contributors examine resilience in relation to environmental stressors, as a

phenomenon in child and adolescent disorders, and as a means toward positive adaptation into adulthood. New and revised chapters explore strategies for developing resilience in the family, the therapist's office, and the school as well as its nurturance in caregivers and teachers. Topics addressed include: Resilience in maltreated children and adults. Resilience and self-control impairment. Relational resilience in young and adolescent girls. Asset-building as an essential component of treatment. Assessment of social and emotional competencies related to resilience. Building resilience through school bullying prevention programs. Large-scale longitudinal studies on resilience. The second edition of the Handbook of Resilience in Children is a must-have reference for researchers, clinicians, allied practitioners and professionals, and graduate students in school and clinical psychology, education, pediatrics, psychiatry, social work, school

counseling, and public health.

*Care and Custody* - Martha Gershun 2018-05

**Flourishing** - Corey L. M. Keyes 2003

Psychology has made great strides in understanding mental illness, but how much has it learned about mental health? When people want to reflect upon the good life and how to live it, they turn to philosophers and novelists, not psychologists. The emerging field of positive psychology aims to redress this imbalance. In *Flourishing*, distinguished scholars apply scientific analyses to study the good life, expanding the scope of social and psychological research to include happiness, well-being,

courage, citizenship, play, and the satisfactions of healthy work and healthy relationships. Their findings reveal that a sense of meaning and a feeling of richness emerge in life as people immerse themselves in activities, relationships, and the pursuit of intrinsically satisfying goals like overcoming adversity or serving one's community through volunteering. This provocative book will further define this evolving field.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine  
2016-11-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be

greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is

increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

### **Family Policy Matters -**

Karen Bogenschneider  
2003-01-30

Drawing on hundreds of studies in the last 20 years, the new edition of Family Policy Matters brings a fresh perspective to family policy, underscoring why it is needed, and outlining how policymaking should be approached. Author Karen Bogenschneider proposes a theoretical framework for conceptualizing policy issues in a way that holds the potential for overcoming controversy

and identifying common ground. This new edition includes updates on the most current research, including: \*new issues that have changed the political landscape for families (e.g. strengthening marriage initiative, same-sex marriage); \*an updated section on state statutes or Governor's orders that require family impact analysis; \*a new chapter on the history of family policy in this century; \*a new appendix on how to conduct a family impact analysis; and \*two new case studies on writing family policy newsletters for state policymakers and teaching family impact analysis to the general public. \*Instructor's Manual with sample syllabi for both undergraduate and graduate courses, suggested readings, assignments, and class activities, discussion questions, daily lesson plans, instructor insights, special presentations to enrich one's class, and PowerPoint slides. The targeted audience includes researchers interested in seeing their research and ideas

acted upon in the policy world; family professionals who work to connect research and policymaking; and instructors interested in making family

policy come alive for undergraduate and graduate students. This book is an ideal textbook for family policy courses.
